

L-Università
ta' Malta

UNDERGRADUATE
PROSPECTUS
2022 & 2023

Foreword

For nearly two years, our campus was almost completely stripped of its former activity. At long last, our university is back to life. Once again, students are attending in-person lectures in class rooms and events of every kind are making a much-anticipated comeback. This is the crux of the university experience: students enrol on courses not only to study and obtain a formal qualification but also to mingle with like-minded individuals and engage in extra-curricular activities.

Your experience as an undergraduate student will probably be your first taste of tertiary level education. For centuries, *L-Università ta' Malta* (UM) has served the nation by consistently raising the bar in the education and sophistication of its citizenry, providing a formative experience that prepares for an array of different callings and professions, all of which pivotal to the nation's progress. Recognize, too, however, that a university education also serves to inculcate an understanding and appreciation of the arts and the sciences delivered within a humanist context that releases a person from the bondage of ignorance, intolerance and bigotry. Oftentimes, this role of universities is downplayed or not sufficiently valorized when it should perhaps be on top of the national education agenda, if we truly want our democracies to work and to prosper.

I encourage you to make good use of your time as an undergraduate. The campus is brimming with a selection of events and opportunities. There are many choices which might take you on a path towards realisation of your untapped potential. Try to get involved in student activism by joining one of the several student organisations, participate in an enriching student exchange programme, and be on the lookout for events that are organised from time to time by the communities at UM.

Now more than ever, technology plays a key role in our everyday life and we, at *L-Università ta' Malta*, are no exception. You can download the My UM app in order to keep abreast with the latest updates and to receive real-time

notifications, say, when exam results are published. You can also follow our portal Newspoint for the latest on campus and do follow us on our social media channels if you want to participate more fully with the thriving academic and student life at Tal-Qroqq.

This year we launched the Help Hub which brings together many of the key services offered to students at UM in one easily accessible place. Located within Students' House, the Hub is a one-stop-shop intended to help with advice and information about such things as admission requirements, finance issues, accommodation, access arrangements, exchange programmes and more.

Choosing *L-Università ta' Malta* means that you are opting for a tried and tested higher education institution that excels in pedagogy and research and is committed to providing you the best quality education in these Islands. Welcome on board at *L-Università ta' Malta* and good luck with your studies.

Welcome to the University of Malta

📍 **MSIDA CAMPUS**
University of Malta
Msida, MSD 2080
Malta

Over its 400-year history, the University of Malta has been the hub for international academic exchange on the island. The University seeks to carry out academic research and to provide a vibrant higher education setting in the humanities, engineering, ICT, medical and natural sciences, as required for Malta's economic, social and cultural development. Over 11,300 students, including around 1,500 international students from 127 different countries, follow full-time or part-time undergraduate and postgraduate courses at the University. There are a further 1,900 pre-tertiary students at the Junior College, which also forms part of the University.

With English as its language of instruction and wide-ranging support services to meet the needs of its local and international community, the University consistently seeks to embark on projects and initiatives in order to continue boosting its international student figures and extending its network to new partners in order to create sustainable collaborations in diverse fields of interest.

The University today is composed of fourteen faculties, a number of interdisciplinary institutes and centres and three schools. Well over 3,500 students graduate in various

disciplines annually. The courses at the University are designed to produce highly qualified professionals with experience in research, who will play key roles in industry, commerce and public affairs in general.

Besides the main campus situated at Msida, there are other campuses: one in Valletta, one in Marsaxlokk and another in Gozo. The Valletta Campus, housed in the Old University Building, dates back to the founding of the *Collegium Melitense* in 1592. This Campus serves as a prestigious setting for international conferences and seminars and houses the Conferences and Events Unit as well as the Research, Innovation & Development Trust (RIDT).

The Institute for Sustainable Energy, with its state-of-the-art Solar Research Lab, is located at the Marsaxlokk Campus. On Malta's sister island, the Gozo Campus assists in the logistical aspects of degree and diploma courses offered in Gozo by the University of Malta and caters for the needs of the Gozitan University students. This campus also provides a venue for short courses and seminars and houses the Hans Güsten Atmospheric Research Centre within the Department of Geosciences.

About Malta

As an international student, one of the most important considerations when choosing a university to pursue further studies is where the university is located. Malta is the ideal place for a myriad of reasons. Situated at the crossroads of the Mediterranean, the Maltese Islands have long been considered as the lifeline between Africa and Europe. This has led to the Islands being ruled by a succession of sovereigns, leaving their imprints on many facets of Maltese culture, ranging from the warm and welcoming character of the Maltese people to the entrepreneurial spirit of the Maltese businessperson.

The many civilisations that have inhabited Malta through the ages have also bequeathed the Islands with a rich history, steeped in tradition. Despite their small size, spanning just over 300km² in land, the Maltese Islands can boast of three UNESCO World Heritage sites and more monuments per square kilometre than any other country in Europe. The Maltese love to have a reason to party, and the Carnival celebrations and the village festa season will surely provide a welcome diversion from your studies. This year, Valletta is hosting the role of European Capital of Culture.

One of the main benefits of coming to Malta to study is surely the temperate climate, with mild winters and warm summers. The pleasant weather and the number of beaches that dot the coastline make for a perfect combination to spend balmy afternoons. The calm waters also lend themselves to a relaxing cruise around the Islands, or diving and water sports for the more adventurous. Comino, a smaller island with only a hotel, is famous for the crystal clear turquoise waters of the aptly-named Blue Lagoon.

For a relaxing break, you just need to hop on the ferry to the sister island of Gozo, which enjoys a quieter pace of life. With its picturesque views and winding lanes and alleys, you will return to your studies refreshed and energised. The Islands are also perfect for those who would rather indulge themselves in nightlife entertainment. Paceville, not far away from the University, is the nightlife mecca on the island, brimming with clubs, bars and all types of leisure establishments. If you are content to linger over dinner, Malta is famous for its restaurants and wine bars, some of them offering spectacular seascapes.

With Malta's small size, it is very easy and quick to get around the Island, especially with the many direct bus

routes to and from University. The cost of bus tickets is reasonable, and the average bus ride takes 20 to 30 minutes. With Malta's proximity to other countries and the many direct flight connections, it is also very easy to explore the Mediterranean and European culture during recesses.

Students registered for studies at the University of Malta are spoilt for choice when it comes to accommodation. Malta offers a variety of accommodation options for students, located around and close to the University campus, to suit different needs and budgets. Students are free to choose the lodging which suits them best. You may also opt for Hotel Kappara, which is just minutes away from the University in Kappara (San Ġwann) or the University Residence, situated in Lija. The Residence also operates a courtesy bus service to and from University, which runs on a regular basis.

When it comes to studying at the University of Malta, the main advantage is surely that the language of instruction is English.

The University of Malta traces its origins to the founding of the *Collegium Melitense* which was set up in 1592. Despite its extensive history, the University of Malta has kept abreast of all academic and technological innovations.

When you choose to study at the University of Malta, you will not only be joining a forward-looking and professional institution, but you will also have the opportunity to experience living on one of the most idyllic islands in the Mediterranean.

Why should I be interested in continuing my studies at University?

As you leaf through this prospectus, the likelihood is that a number of questions will be racing through your mind: Where do I go from here? Which course should I choose? What will I get out of it? How many career opportunities may present themselves once I complete it successfully? More often than not, you will find that the answers to questions like these can be found by discussing your career aspirations with your nearest and dearest as well as with professionals in the particular field or sector you are interested in.

For some of you, the way forward has always been clear. For others, however, the process of distinguishing which path to take requires more thought. It can also happen that, even after completing a course, some may remain unsure what to do next. In itself, this is not necessarily a bad thing because it may serve as a springboard to be creative and use the skills acquired and apply them in different circumstances. In the fast and ever-changing globalised world we live in, matching graduates' qualifications and skills to the demands of the working world calls for you to keep an open and creative mind. The years you will spend at our University should not be just about acquiring academic credentials, but most importantly, about being open to learning experiences that will provide you with the opportunity to link such credentials to the particular interests and the reality you live in.

A good balance of academic credentials, flexibility and a willingness to explore new grounds could be a winning formula towards a fulfilling career that will give you the chance to be a catalyst for change, and ensure success for yourself and for society at large. At our University you can rest assured that you will find the support you need as you start your journey towards the discovery of that knowledge, that is rewarding in its own right, and the fulfilment of your aspirations.

International Students

The International Office is responsible for implementing the University's internationalisation strategy, particularly in the area of relations with other institutions and foreign entities, engaging internationally, supporting international activities of the UM locally and abroad and acting as the support office for all international students enrolling at the University of Malta. The office also manages several mobility actions including the highly popular Erasmus+ programme through which close to 500 students are received per year and around 400 UM students are sent abroad each year. Around one tenth of the student population at the University is international, originating from around 92 different countries reading programmes at foundation, undergraduate, masters and doctoral level. The richness and diversity is celebrated and the International office acts to support all of these students to ensure a memorable experience. The International Office provides guidance and advice with pre-departure arrangements, receives students and organises orientation sessions at the start of the academic year. Through the year we support students with advice and administrative support in relation to their stay in Malta and their studies at the UM. The website of the International Office (um.edu.mt/international) is the main tool for prospective and current students to access information relevant to their arrival and stay in Malta.

Secure English Language Test

The language of Instruction and assessment at the University of Malta is English. Applicants who have completed their secondary education overseas are obliged to satisfy the University's English Language requirement by presenting a Secure English Language Test (SELT) result at the required levels.

The following are the main Examining Boards recognised by the University for this purpose:

	TOEFL	Academic IELTS	CAMBRIDGE ****
	Internet-Based (iBT)		
Foundation Studies Course/Junior College	61 with a minimum score of 17 in the writing component	5.5 overall with a minimum of 5.0 in the reading and writing components	First Certificate with a pass at Grade C or better
Undergraduate Course	80 with a writing score of at least 20	6.0 overall with no less than 6.0 in Writing and no less than 5.5 in every other element	Advanced Certificate with a pass at Grade C or better

TOEFL and IELTS score reports will only be valid if issued within 2 years from the date of commencement of the course at the University of Malta.

The test result must be obtained by the following dates:

- For admission to courses commencing in October by **30 September**
- For admission to limited number courses commencing in October by **31 August**

If the test result is not submitted by these dates, applicants will not be admitted to the course even if all other entry requirements are satisfied.

Applications for University Courses commencing in October 2022

1. Interested persons who wish to apply for courses commencing in October 2022 are invited to apply through the Online Application facility via um.edu.mt/apply Applicants who will be sitting for their Matriculation Certificate examinations for the first time in 2022, or who will be awarded their Matriculation Certificate in 2022, should apply online by the deadline of **21 July 2022 at 14:00 (CEST)**. Information about the online application and the list of courses available can be accessed from um.edu.mt/admissions

Applications Deadline

2. Applications for all courses are to be submitted against the relevant application fee as follows:
 - a) Applicants holding University of Malta degrees and diplomas, the Matriculation Certificate, MCAST and MCAST-BTEC Diplomas and Degrees, ITS Diplomas, the ACCA qualification, the International Baccalaureate (IB) Diploma, the European Baccalaureate (EB) Diploma, City & Guilds Diplomas, the Certificate in Banking of the Chartered Institute of Bankers, are requested to submit their application by **21 July 2022 at 14:00 (CEST)** against a fee of €25.
 - b) Applicants presenting overseas qualifications are requested to submit their application up to **21 July 2022 at 14:00 (CEST)** against a fee of €95.
 - c) The closing date for submission of applications for the Doctor of Medicine and Surgery (M.D.) course from applicants presenting overseas qualifications; or from non-Maltese applicants presenting the IB Diploma or EB Diploma who are not in possession of a SEC pass in Maltese and who intend to register for the Medical Maltese Proficiency course being offered by the University of Malta; or Maltese applicants who in terms of the Admissions Regulations, are exempted from possessing a SEC pass in Maltese and who intend to register for the Medical Maltese Proficiency course; or applicants with an undergraduate qualification awarded from an institution other than the University of Malta is **15 March 2022 at 14:00 (CET)**. The closing date for other applicants is the **21 July 2022 at 14:00 (CEST)**. No late applications will be accepted after these dates.
 - d) In cases where proficiency/aptitude or other tests are required, the courses may have different deadlines to the ones indicated here. For information regarding the deadline for such courses, please refer to the list of courses available at um.edu.mt/admissions

Late Applications

3. Late Applications for available courses may be submitted as follows:
 - Applicants falling under section 2(a) may submit a late online application by not later than **15 September 2022 at 14:00 (CEST)** against a fee of €60.
 - Applicants falling under section 2(b) may submit a late online application by not later than **15 September 2022 at 14:00 (CEST)** against a fee of €125. However, applicants who require a visa to travel to Malta may be considered for entry in October 2023 if the course will be on offer.

Late applications will NOT be accepted for:

- a) **the M.D. Course and**
- b) **Courses/Areas in which the number of students that can be accepted is limited.**

Furthermore, Late applications will NOT be accepted for all other courses requiring passes in a proficiency/aptitude or other tests set by the individual Faculties/Institutes/Centres/Schools prior to admission.

Students' Advisory Services

4. The Students' Advisory Services are available for advice and information to prospective students daily by appointment. For an appointment one may kindly fill in the online form on **um.edu.mt/sas/appointments**

Payment of Application Fees

5. Application fees may be paid through the secure payment facility. Once you click the 'Pay to Submit Application' button which is found at the bottom of the last page in the online application, you will be prompted to input the card holder's details which include the card number, card expiry date, CVV number and other security details (if paying using VISA) and the card holder's name. Other alternative methods of payment include payment via Internet Banking, at any BOV or HSBC branch in Malta and Gozo (for local residents only) or at the Maltapost branch at the Msida Campus. All application fees are non-refundable.

Adult Learners

6. In terms of the Admissions Regulations, the University may consider admitting persons as regular students if they will have reached the age of 23 by the beginning of the course for which they would have applied. Admittance is not based on age only and such applicants are normally assessed through an interview and/or other forms of assessment to ascertain that they have an adequate academic background to be able to follow their selected course with profit.
7. Applying under the 'maturity (adult learners) clause' does not automatically guarantee entry to all courses offered by the University of Malta. Faculties/Institutes/Centres/School may lay down different requirements for adult learners, such as, but not solely, attending for a selection interview, sitting for proficiency tests, and/or presenting the European Computer Driving Licence (ECDL) Standard Certificate. It is best to liaise directly with the Faculty concerned or the Student Advisory Services to determine what the requirements would be. Over and above this, all applicants who completed their secondary education overseas would need to present a Secure English Language Test (SELT) result. Adult learners are not exempted from this requirement. More details about SELT can be accessed from: **um.edu.mt/englangreq**

8. The closing date for receipt of applications from applicants in terms of the 'maturity (adult learners) clause' for courses requiring passes in a proficiency/aptitude or other tests set by the individual Faculties/Institutes/Centres/School prior to admission (excluding courses/areas where a limited number of students is indicated) is **31 August 2022 at 14:00 (CEST)**.

Recognition of Prior Learning

9. The Recognition for Prior Learning (RPL) is the process of recognising learning obtained through formal, non formal and informal learning other than the mainstream certification. Such learning can also include the acquisition of competencies gained through educational institutions such as schools, colleges, workplaces, life and work experiences, or even through personal interests. During the RPL process University applicants will be assisted to collate a portfolio of their learning experiences. For further information kindly refer to: um.edu.mt/sas/rpl

Other Information

10. Requests for change of course which are made between the **21 July (after 14:00 CEST)** and **15 September 2022 14:00 (CEST)** are subject to a fee of €35. Requests for change of course made from the **15 September 2022 after 14:00 (CEST)** onwards are subject to a late fee of €45. Such changes will only be possible for certain courses. Further information regarding change of course can be accessed from: um.edu.mt/journey/admissionsadvice/admissionsfaqs
11. Local candidates who are awaiting examination results from overseas boards are to submit a scanned copy of the result slip by email to admissions@um.edu.mt or by hand to Room 113, Admissions and Records Office, Administration Building by **31 August 2022**. Applicants must quote their I.D. number or application reference number when submitting such documents.
12. Candidates sitting for one or more Matriculation Certificate Examinations during the September Examination Session need not present their results when these are published since the results will be forwarded by the MATSEC Support Unit directly to the Admissions and Records Office.

Applications Deadline for courses commencing in October 2023

- The closing date for submission of applications for the Doctor of Medicine and Surgery (M.D.) course from applicants presenting overseas qualifications; or from non-Maltese applicants presenting the IB Diploma or EB Diploma who are not in possession of a SEC pass in Maltese and who intend to register for the Medical Maltese Proficiency course being offered by the University of Malta; or Maltese applicants who in terms of the Admissions Regulations, are exempted from possessing a SEC pass in Maltese and who intend to register for the Medical Maltese Proficiency course; or applicants with an undergraduate qualification awarded from an institution other than the University of Malta will be published on um.edu.mt/admissions. The closing date for other applicants is **20 July 2023 at 14:00 (CEST)**.
- Applicants presenting overseas qualifications for courses other than the M.D. Course: **20 July 2023 at 14:00 (CEST)**
- Applicants presenting local qualifications: **20 July 2023 at 14:00 (CEST)**
- Late applications: **15 September 2023 at 14:00 (CEST)**. However, overseas applicants who require a visa to travel to Malta may be considered for entry in October 2024 if the course will be on offer.

Entry Requirements for Undergraduate Courses

To be accepted as **regular students**, applicants must satisfy the General Entry Requirements for admission, namely:

- the Matriculation Certificate (*refer to pages 234 and 235*); and
- passes at Grade 5 or better in the Secondary Education Certificate (SEC) examinations in English Language, Maltese* and Mathematics,

provided that if a pass in Maltese, and/or English Language, and/or Mathematics is obtained at Advanced or Intermediate Matriculation Level, a pass in such subjects in the Secondary Education Certificate Examination is not required.

Applicants must also satisfy any other **Special Course Requirements** indicated for the course/area of study of their choice.

The regulations and bye-laws for a course of studies may specify other requirements for admission to that course.

The Admissions Board may allow non-Maltese applicants to offer instead of Maltese, another language as approved by the Admissions Board, provided that such other language cannot be English and applicants whose mother tongue is English shall be required to offer a language other than English instead of Maltese.

However, for the M.D. course, all non-Maltese applicants who are not in possession of a SEC pass in Maltese at Grade 5 or better must present a Medical Maltese Proficiency Certificate which is awarded if applicants pass an examination set by the University.

Maltese applicants who, in terms of regulation 12(5)(a) of the Admissions Regulations 2016, are exempted from possessing a Secondary Education Certificate pass in Maltese, are required to present the Medical Maltese Proficiency Certificate awarded by the University of Malta prior to the commencement of the M.D. Course.

However, where course regulations or bye-laws specify Maltese as a Special Course Requirement, the required pass in Maltese must be obtained at the level and grade as stipulated in the respective course regulations or bye-laws.

In the case of applicants who pursued their secondary education outside Malta, the University may consider and accept comparable qualifications, provided that the mix of subjects and levels of the qualifications presented are comparable to the subjects and levels required for the award of the Secondary Education Certificate and Matriculation Certificate.

To be accepted as **probationary students**, applicants must:

- (a) be 18 years of age by 31 December of the year during which the course for which they apply commences; and
- (b) be in possession of the required Secondary Education Certificate (SEC) passes at grade 5 or better in English, Maltese and Mathematics as indicated in regulation 12(1)(b) of the Admissions Regulations, 2016; and
- (c) have sat all six subjects as specified in regulation 5(2)(a) as indicated in the Matriculation Certificate Regulations, 2013; and
- (d) have attempted to improve their Matriculation Certificate by sitting for the required subject or subjects at the MATSEC Second Session of examinations (normally held in September) of the year during which the course for which they apply commences; and
- (e) have obtained EITHER a pass grade in at least one subject from each Group 1, 2 and 3 and in Systems of Knowledge and obtained between 38 and 42 points, as indicated in the Matriculation Certificate Regulations, 2013;

OR

not less than 44 grade points but lack a pass grade in one subject from one of the Groups 1, 2 or 3 or in Systems of Knowledge

OR

lack not more than a grade (such as a D instead of a C, but not an F instead of a pass grade E) in a subject or subjects indicated as special course requirements (Advanced or Intermediate level) for the course applied for, as long as they have obtained a pass grade in at least one of the subjects from each Group 1, 2 and 3 and in Systems of Knowledge and not less than 38 points

provided that these provisions shall not be applicable to the following:

- (i) courses which are restricted to a limited number of applicants, if all places have been filled by fully qualified applicants. Should any places remain vacant after the results of the MATSEC Second Session of examinations, the Faculty Admissions Committee concerned shall have sole discretion to decide on the criteria for choosing applicants for admission as probationary students in terms of these regulations;
- (ii) courses that are not governed by the General Regulations for Undergraduate Courses; and
- (iii) courses that may be accessed through a Certificate course at level 4 of the Malta Qualifications Framework (MQF) designed for the purpose of providing an alternative route to a higher-level Undergraduate Course, unless the Board concerned makes a specific recommendation to the Admission Board.

Bachelor of Arts / Bachelor of Arts (Honours)

The Faculty of Arts offers full-time courses leading to the Bachelor of Arts and Bachelor of Arts (Honours) degrees. During their first year, all students follow two areas of study. In the second year, students may opt to either continue following two areas of study for the Bachelor of Arts degree or concentrate on one of their chosen areas of study for the Bachelor of Arts (Honours). The Faculty's undergraduate programmes are a balance of compulsory study-units and elective ones, allowing students to pursue their individual interests. This makes it possible for undergraduate students to participate in student mobility programmes both in Europe and elsewhere. For information regarding the areas of study in which the degrees of Bachelor of Arts and Bachelor of Arts (Honours) may be awarded, please refer to: um.edu.mt/l/4q9Fx

ENTRY REQUIREMENTS

General Entry Requirements together with any Special Course Requirements outlined below:

Pink areas of study in the table on page 28 do not have any Special Course Requirements.

- * If either **English**, or **French**, or **German**, or **Italian**, or **Maltese** is chosen, an Advanced Level pass at Grade C or better in the subject.
- *1 If **International Relations** is chosen, an Advanced Level pass at Grade C or better, in *either* **Arabic**, or **Economics**, or **French**, or **German**, or **History**, or **Russian**, or **Spanish**, or a pass in **Chinese** obtained in the Chinese University/ College Entrance Examination (Gaokao).
- *2 If **Sociology** is chosen, an Advanced Level pass in any of the following subjects: **Sociology, Philosophy, Geography, Economics, History, Home Economics & Human Ecology, Information Technology, Marketing, Religious Knowledge, Theatre & Performance.**
- *3 If **Spanish and Latin American Studies** is chosen, an Advanced Level pass at Grade C or better, in **Spanish.**
- *4 If **Communication Studies** is chosen, an Intermediate Level pass in **English.**
- *5 If **History**, or **European and Global History** is chosen, an Advanced Level pass in **History.**
- *6 **Contemporary Mediterranean Studies** cannot be combined with areas of study in Group D or Group E.
- *7 If **Fine Arts** is chosen, applicants are required to submit a portfolio which shall be assessed during an interview. A pass in the interview is mandatory.
- *8 If **Music Studies** is chosen, applicants shall undertake an interview and an audition. Applicants with at least an Intermediate level pass at Grade C or better in **Music** shall be exempted from both the interview and audition. Information about the interview and audition will be available at: um.edu.mt/performingarts/music/auditionguidelines
- *9 If **Dance Studies** is chosen, applicants are required to complete an interview, an audition and submit a completed medical fitness form. Those applicants who are unable to attend the interview and dance audition in person, may arrange to complete the process through electronic means of communication.

The Admissions Board, acting on the advice of the Faculty Board, may admit applicants in possession of a Diploma from the University of Malta into the second year of the Course for the Honours degree; provided that the Diploma falls within one of the areas of study offered by the Faculty of Arts, and provided also that the average mark for study-units covered in the Diploma is not less than 65%. Such students may be required to follow a programme of study as directed by the Board of Studies.

For a detailed overview of the areas of study, please refer to: um.edu.mt/courses

The interview criteria for the Fine Arts area of study and information for applicants in terms of the 'maturity (adult learners) clause' will be available at: um.edu.mt/arts

AREAS OF STUDY

Anthropology

Are you curious to learn about other peoples and places? Studying anthropology gives you the opportunity to explore different cultures around the globe. How do societies differ? Do differences matter? How do cultures change over time? Anthropologists answer these questions by living with and becoming part of the society in a process known as participant observation. Studying anthropology helps you develop the ethnographic research skills necessary and apply these experiences and structured observations to answer concrete questions. Our courses cover a diversity of topics and regions. Studying anthropology can be a life-transforming journey into what makes us human.

Archaeology

Archaeology is the study of the human past using material remains. The Department of Classics and Archaeology runs two degrees in Archaeology: B.A. and B.A.(Honours). Both courses are designed to provide a strong foundation in all aspects of Archaeology, including theoretical and practical methods used by archaeologists, as well as to develop knowledge in particular subject areas pertinent to the prehistory and ancient history of the Mediterranean. The courses on offer equip students with a wide set of transferable skills, and prepares them for a range of career paths, both within the world of archaeology and heritage studies, and beyond.

Classics

Classics is one of the most interdisciplinary of all subjects. The B.A. degree in Classics is devoted to the teaching of the classical languages, Latin and Greek, and analytical reading of ancient texts. You do not need to have any knowledge of Greek and Latin, as we start from scratch. Our programme also features study-units on historical, literary, and social aspects of Greece and Rome. Besides formal teaching methodologies, we also exploit innovative approaches of presentation and drama, thus providing space for your creativity.

A degree in Classics will equip you with a set of invaluable linguistic, presentational, and analytical skills that are highly transferable and open many doors to different career paths, such as the culture and creative industries, heritage, and education.

Communication Studies

The Communications Studies area falls under the Department of Media and Communications, Faculty of Media and Knowledge Sciences. It is jointly a theory and practice-based course. The theoretical core explores Mass Media and Communications research. In turn, this provides the knowledge base for creative production. There are a number of broad streams in the course, since it touches on a number of diverse areas. These include Journalism, Graphic Design, the Moving Image, Internet Communications, Media and Communications in Society, and Marketing Communications. Study units in photography, video production, audio, design, and social media provide for the practice.

Contemporary Mediterranean Studies

The Contemporary Mediterranean Studies course (CMS) offers students the chance to study this contained landmass with a difference. Scholars have been debating whether the Mediterranean consists of a variety of different cultures and whether behind the disparate cultures there is a common world that can be studied through a different disciplinary approach. For this reason, this course is built on study units that are offered by different departments within the Faculty of Arts that, when grouped together, delineate an area of study which is a discipline on its own. Thus, CMS is intended to help the student to better understand not only why it is important to study the contemporary Mediterranean world, but also how it can be studied and what should be studied.

Students following this course will acquire skills in the field of humanities that can be put into practice in different professional and/or specialized fields. What follows are a few of the opportunities of employment awaiting students following this course. They can find employment in cultural industries, foreign affairs, public administration, publishing, journalism, and media.

Image courtesy of Dr Simon Mercieca

Dance Studies

Studying Dance at the University of Malta means engaging with dance practice in a dynamic and international environment, where students are exposed to dance techniques (including ballet and contemporary), choreographic practices, and technological mediations in performance. You, the future dance artist, will be provided with the skills necessary to contribute to the contemporary performing arts scene as performers, choreographers, teachers, dance journalists, managers and administrators in dance schools, therapists, and community dance workers. The Department of Dance Studies offers two undergraduate programmes: the Bachelor in Dance Studies (Hons) provides a full dance specialisation, while the Bachelor of Arts option allows the study of dance with another humanities subject for a more cross-disciplinary approach.

English

Studying English language and literature offers access to a wealth of inspiration and creativity, while also developing skills that are essential for today's global environment. It is an opportunity to explore how literature makes sense of the world through stories, poems, novels and plays, and how English reflects and is shaped by its speakers worldwide. As a student of English, you will gain a much deeper appreciation of canonical works of literature, while at the same time broadening your understanding of what English literature is. You will also sharpen and develop your own ability to write, read, analyse and persuade.

French

The Department of French offers a comprehensive programme of studies that provides a wide range of subjects dealing with French and Francophone studies, including literature (from the Middle Ages to contemporary writers), linguistics, language and language learning, film and visual arts. A degree in French can lead to teaching, interpretation and translation related jobs, diplomatic and government service (at EU and world level), business, journalism, tourism or cultural management. Our department offers a solid formation of general culture, essential to any liberal profession. Spoken in five continents, French is an official language of the EU, the UN, UNESCO and NATO.

À bientôt!

Geography

Geography matters in a globalised world dealing with concerns over population growth, environmental threats, expanding cities, resource exploitation, pollution, climate change, migration, well-being and social justice. Geographers acquire knowledge, skills and competences about complex human-environment relationships through a rich programme in physical and human geography, fieldwork and use of technology. Critical thinking is encouraged throughout.

Geographers are recognised as highly employable professionals in the public sector dealing with land use, planning, transport, environment and resources, tourism and public health, and the private sector in the fields of environmental management, geotechnical surveying, planning, land and real estate management, and marine affairs.

German

The B.A. General and B.A. Honours courses in German offer a rich programme combining language practice, linguistics, literature and cultural studies of the German-speaking countries. With a communicative and interactive approach, students are supported in developing their language proficiency in German as well as general communication skills, analytic abilities and creative thinking – highly important transferable skills for modern job markets and for life. Graduates of the B.A. in German are able to tap a wide range of working opportunities: from teaching to translating, from tourism to companies with connections to the German-speaking countries, from European institutions to the cultural sector.

History / European and Global History

History is a high intellectual and practical pursuit. Our graduates are employed in embassies, EU institutions, the public service, education, the media, heritage, and sometimes the most unexpected places. History makes sense of the world we live in. When we hear of China today, we recall how it was always key to global politics. We treat with caution the talk about civilizational clashes with Islam, because we are not blinkered. We know there is nothing new in Russia's ambiguous relations with its western neighbours. We know that our world is made by human strife and creativity but also by brutality. We were not born yesterday.

History of Art / Fine Arts

Follow a path in fine arts and art history. We engage with culture, with creative thought and with works of art. We ask questions about them and anchor them in the world around us.

International Relations

Studying International Relations means engaging with and shaping contemporary global issues: global justice poverty, migration, warfare, security, human rights, and environmental destruction. We examine politics across the globe: the Middle East, East Asia, Sub-Saharan Africa, as well as transatlantic relations between Europe, Russia, the United States and Latin America. International leadership requires holistic and interdisciplinary approaches and solutions, and the Department of International Relations helps its students to build the necessary skillsets to comprehend and address the strategic challenges of our times.

Italian

Explore Italy's literature, language and the very same culture that helped inspire some of the most illuminating minds in history. Studying Italian means perfecting your linguistic tools and enjoying literature, art, music and cinema in innovative ways that will enable you to discover the beauty of Italy while reflecting on various aspects of society, history and humanity. As a fresh graduate, you will possess a rich cultural education and a wealth of transferable skills including adaptability, the ability to work closely with others in a team, attention to detail and critical thinking.

Knowledge and Information Management

Information is a human right. Providing proper access to information is contributing to a more equitable world. In this climate of change, the right information and its correct management will remain at the core of future social and economic development. The Department of Library Information, and Archive Sciences (DLIAS) provides the education to succeed in this contemporary information age. It empowers future information practitioners to acquire the skills to preserve and create access to the legacy of the past. Our Bachelor in Knowledge & Information Management presents unique opportunities to build knowledge and skills in diverse information professions, from archives to libraries, and bridge with other cultural and heritage institutions. Join us and discover how information professionals can contribute to change the world around them!

Linguistics (offered through the Institute of Linguistics and Language Technology)

Are you interested in language as an aspect of human behaviour and in how languages are used in society and technology? Then Linguistics may be the course for you!

Language is what distinguishes humans from other species. Linguists look for patterns to better understand the power of language in all sorts of interaction, whether human-human or human-machine. Linguistics can equip you with analysis and problem-solving skills also useful in dealing with many other real-life situations. Our students have gone on to pursue careers in diverse areas where an in depth understanding of how language works is important: content writing, cultural mediation, forensics, interpretation, journalism, language teaching or school administration, as well as the translation and the human language technology industries.

Malti

Id-Dipartiment tal-Malti jaħdem biex iġib 'il quddiem l-istudju tal-ilsien Malti, tal-letteratura Maltija, u tal-Malti bħala lsien barrani permezz ta' korsijiet ta' filgħodu u ta' kors ta' filgħaxija, iċ-Ċertifikat fil-Qari tal-Provi fil-Malti, bi sħab mal-Kunsill tal-Malti. Jipprovdi programmi ta' studju lil studenti minn dipartimenti oħra, bħal tal-Komunikazzjoni, tal-Politika Pubblika u tal-Mediċina. Fl-aħħar snin żviluppa programmi fl-użu tal-Malti f'oqsma speċjalizzati, bħall-Malti għall-professjonisti mediċi, għall-ħaddiema soċjali, għall-amministraturi pubbliċi, u għall-ġurnalisti u x-xandara. Issir ħidma f'għadd ta' proġetti ta' riċerka fuq temi bħad-djaletti tal-Malti, it-tradizzjoni orali, it-terminoloġija, l-analizi ta' manuskritti qodma, il-grammatika u l-ortografija tal-Malti, il-kritika u t-teorija letterarja, u tal-Malti fl-informatika.

Middle Eastern and Asian Languages and Cultures

Arabic, Chinese, and Hebrew—these eastern languages are the soul of the Department of Middle Eastern and Asian Languages and Cultures. Whether you call them passports, bridges, or sails, these languages embark you on a journey of discovery. The tactile experience of twisting new sounds around and working your hand to write in new ways stays with you forever, even if you don't become fluent. Soon you'll find that intuition takes you to deeper levels of understanding. Start your own journey east and see what Arabic, Chinese, or Hebrew will teach you about yourself and the world!

Music Studies

The Bachelor of Arts Honours programme in Music is designed to provide a comprehensive immersion in every aspect of music as a cultural phenomenon. You will explore the connections between music and the other performing arts, particularly theatre and dance, and work with other students on a variety of performance opportunities. You can expect to participate in a thriving performance and composition environment and have opportunities to work with a wide range of professional artists, academics, and practitioners. You will also be able to participate in an Erasmus+ mobility programme.

The Bachelor of Arts programme in Music offers a rich course of study in the history, theory, and practice of music. During the course you will follow a range of theoretical, historical and practical study-units in music, ranging from music in different cultures to performance practice and technique. You are also encouraged to participate in an Erasmus+ mobility programme, as we believe a multicultural and international learning experience will provide a holistic academic journey.

Philosophy

There comes a time in our own life that certain questions begin crossing our minds. We ask ourselves: what kind of relationships do we want to establish with our friends or partners? We might ask some other more urgent questions: is this world or this life all there is? Is there perhaps another world or even another life apart from this one? And if there is, how would we know about it? If you are looking for answers to these questions, then by engaging in philosophy, you will join others who, like you, are also interested in finding out what life is about, in finding out, what Viktor Frankl has observed is 'Man's Search for Meaning.'

Psychology

Choosing psychology as an area of study means that this subject is of interest to you. Psychology is a broad discipline and can offer something to everyone. Throughout their studies, students who are undertaking degrees with Psychology as an area of study are encouraged and supported in learning about the diverse areas in this discipline. Students attend core study-units that include developmental psychology, social psychology and psychopathology, amongst others. Furthermore, students can choose elective study-units that appeal to their personal curiosity, including work psychology, the psychology of communication and learning disabilities, to name but a few.

Sociology / Social Studies

If you are curious about the ways individuals interact under the influence of culture, beliefs, motivations and constraints, then our Sociology or Social Studies programmes are for you. If you aim to understand how some groups are disadvantaged, oppressed or exploited, or why it is that some privileges are reproduced through generations, then these are other reasons for you to join us. Our graduates' best asset is their versatility in the work force. They are equipped with research skills and a mind-set that is tuned into looking for what is not necessarily obvious, and the ability to bring ideas together from a broader perspective to present clear, focused and coherent arguments. Indeed, our graduates are employed in sectors that range from journalism to research, from care management to education and community support.

Spanish and Latin American Studies

Spanish is the second most spoken language in the world. Linguistic and cultural proficiency in Spanish is an asset in the liberal professions. Our Department delivers courses that are professionally oriented and intellectually stimulating. We impart knowledge of Spanish-speaking societies and create the optimal framework for our students' full personal and intellectual development. We offer a rich interdisciplinary curriculum encompassing language and linguistics, literature, history, art, music, film, and Portuguese. Our teaching is interactive and encourages critical and creative thinking. We also focus on providing support to our students in order to ensure their success at university and in their future careers.

Theatre

Studying Theatre for a B.A. helps you understand how theatre and performance develop across time and cultures and also gives you the tools to speak and write about performance in an informed way. It also gives you opportunities to come into contact with many of the skills involved in theatre-making, from acting to directing, from script-writing to designing sound and lighting through the many performances you can involve yourself in as part of the course. While your studies will help you understand theatre in relation to other arts and human activities, they will equip you with skills to work in theatre and the more general cultural sector.

Bachelor of Humanities

The concept behind this degree programme is that students are free to build their own undergraduate programme by registering for any study-units (time-table permitting) from any area of study which they consider most suitable for their academic interest and career plans. During the course, Bachelor of Humanities students may register for up to 45 ECTS credits (25% of ECTS credits) from the same area of study. The course structure hinges on the fact that students graduate in Humanities as a broad discipline, rather than specialising in one area of study.

Diploma in Chinese

The Diploma in Chinese aims to offer a thorough grounding in the basics of the structure and grammar of the Chinese language through exposition and constant exercises both during lectures and at home. Some study-units in Chinese culture will also be offered. Once the basic foundations have been learnt, students are expected to demonstrate their knowledge by reading and interpreting Chinese texts and holding conversations in Chinese.

Diploma in German

Eligible for tax rebates under the Get Qualified Scheme

This part-time evening course is specifically designed for members of the general public who use or would like to use German in their professional life. Since the German and Maltese economies are strongly linked and the German language is increasingly important within the EU, the Department of German offers this opportunity for those seeking to improve their language skills and cultural understanding of the German-speaking countries. The course focuses on general and business communication as well as more specialised topics, tailored to the students' needs.

ENTRY REQUIREMENTS

General Entry Requirements together with a minimum level of B1 in German according to the Common European Framework of Reference for Languages (CEFR) or the Certificate in German awarded by the University of Malta.

Applicants shall provide certification to attest their level of German, or if they do not have such certification, they shall be required to undertake a placement test conducted by the Department of German.

Certificate in German

The German and Maltese economies are strongly linked through industry and bilateral tourism. The Department of German has recognised the need to develop a course in German to offer a unique opportunity to those seeking career developments in industry, in financial services, and in the tourism sector, as well as to persons who would like to extend their knowledge of German culture and traditions. The programme is divided into three main modules, covering language, german economy and business life, and german culture respectively. Applicants should preferably have some prior knowledge of German.

On successful completion of the course, applicants will be eligible to join the course leading to the Diploma in German the next time it is offered.

ENTRY REQUIREMENTS

General Entry Requirements together with a minimum level of A1 according to the Common European Framework of Reference for Languages (CEFR) in German.

Applicants shall provide certification to attest their level of German, or if they do not have such certification, they shall be required to undertake a placement test conducted by the Department of German.

Diploma in Language Proficiency

The Diploma in Language Proficiency in German starts from language Level B1 (CEFR) and covers speaking, listening, reading, and writing skills. It is open to all University students and to the general public. The programme is based on a communicative approach and, depending on the students' interests, can also include training in different areas such as academic writing, business, and medicine. With one session per week, it leads to language Level C1.

For further information regarding the levels of the Common European Framework of Reference for Languages, please refer to: <http://bit.ly/Kz8cDt>

ENTRY REQUIREMENTS

General Entry Requirements

Applicants for the Diploma Course may be exempted from elements of the programme if they can provide accredited certification in the language and if they are deemed able to follow the course with profit by the Board of Studies.

The Diploma Course may be taken concurrently with any University undergraduate or postgraduate course, whether followed on a full-time or a part-time basis.

Certificate in Language Proficiency

The Certificate in Language Proficiency is an initiative of the Faculty of Arts aimed to promote proficiency in foreign languages. In today's multi-cultural and multi-linguistic world, sound knowledge of one or more foreign languages is a must, and it is one of the most sought-after skills by both local and international employers. The Faculty of Arts, therefore, is offering all University current students the opportunity to study a foreign language from scratch or to strengthen their knowledge of a language they have already studied at SEC, Intermediate, or Advanced levels. The general public may also apply for particular areas but acceptance is dependent upon UM students' registration numbers in the course.

ENTRY REQUIREMENTS

General Entry Requirements

The Certificate Course may be taken concurrently with any University undergraduate or postgraduate course, whether followed on a full-time or a part-time basis.

The link towards the Certificate for Language Proficiency course, which is solely applicable for UM current students or prospective students joining another course in October 2022, will be communicated in due course.

French area of study is opened only to UM current students. The rest of the areas of study are open to both current UM students and the general public.

Diploma fil-Letteratura Maltija

This multidisciplinary course introduces students to the changing cultural contexts of Maltese literature, illustrating how literary texts can be adapted to different forms of presentation, broadcasting, and publication. The course also addresses the creative interaction between Maltese literature and other artistic media, such as music, and imparts related skills such as the editorial process involved in publication, innovative critical methods for reviewing Maltese authors, and the adoption of literary techniques for one's own creative writing.

Dan il-kors multidixiplinarju jintroduċi lill-istudenti għal kuntesti kulturali ġodda tal-letteratura Maltija, u juri kif xogħlijiet letterarji jistgħu jiġu adattati għal forom differenti ta' preżentazzjoni, xandir, u pubblikazzjoni. Il-kors se jindirizza wkoll l-interazzjoni kreattiva bejn il-letteratura Maltija u forom oħra ta' arti, bħalma hija l-mużika, u se jgħallem ħiliet relevanti bħalma huma l-proċess editorjali meħtieġ għall-pubblikazzjoni, metodi kritiċi ġodda biex jinkitbu reċensjonijiet fuq awturi Maltin, u t-tħaddim tat-tekniki letterarji fil-kitba kreattiva.

Diploma in Maltese History in Context

Eligible for tax rebates under the Get Qualified Scheme

This programme of study will enable students to gain a deep understanding of the history of Malta, set within its international context. It aims to deliver a structured programme of learning through which a student with little or no knowledge of History will be able to build up their expertise. Key international debates such as encounters or clashes of civilization, imperialism and postcolonialism, will be addressed through the Maltese example by placing them in a context of engagements with other cultures. History is far more than names, dates, rulers and wars. History is the study of human beings in time, across time and in various places.

Bachelor of Science (Honours) in Built Environment Studies

The Bachelor degree in Built Environment Studies provides the entry level to a number of professional or second-tier Master degree courses offered by the Faculty for the Built Environment. The course covers a range of study-units of relevance to the professional disciplines that students may wish to follow in subsequent years, whilst allowing them a high degree of choice so that their studies can be better tailored to their aptitudes and career ambitions. The programme is intended to be multi-disciplinary and to give better opportunities for trans-European student exchanges. The course introduces a wide range of disciplines, relevant for the study of Architecture, Structural or Civil Engineering, Spatial Planning, Management, Environmental Performance, and particularly Materials and Construction Technology subjects.

Bachelor of Science (Honours) in Spatial Planning

This course has been developed in order to address the much-needed strategic and all-encompassing approach to the practice of urban planning, which moves beyond the conventional and limited land-use approach of town planning that has been largely concerned with development control. The course embraces pertinent subjects that are relevant to diverse prospective students who may have different backgrounds. The objective is to start creating a new breed of spatial planners who have a broad spectrum of knowledge covering a number of different pillars as defined by the Royal Town Planning Institute's Policy Statement on Initial Planning Education.

ENTRY REQUIREMENTS

General Entry Requirements

Admission to the Course may, with the approval of Senate, be restricted to applicants who are nominated by the Planning Authority provided that such applicants are eligible for admission into the course. Such restriction shall be announced at the time of the call for applications.

📍 um.edu.mt/ds

📍 um.edu.mt/admissions

Master of Dental Surgery

The Master of Dental Surgery is targeted at students wishing to obtain a degree in Dentistry. The programme trains students sufficiently in dental science using an evidence-based approach to produce a dental surgeon with good communicative skills and a broad academic and practical education in all areas of clinical dentistry. The successful student is enabled to practise dentistry with other dental and healthcare professionals in both private and institutional healthcare systems.

ENTRY REQUIREMENTS

General Entry Requirements together with:

- a) **two** Advanced Level passes at Grade C or better in **Biology and Chemistry**; *and*
- b) an Intermediate Level pass at Grade C or better in **Physics**,

provided that all passes in these Special Course Requirements have been obtained together in one session of examinations (i.e. one sitting) and are from one recognised examining board.

A pass obtained in a session of examinations which is held after the results of a previous session were published shall be deemed to be a pass obtained in a session that is distinct from the previous one. This also applies to the second session of the Matriculation Examination offered by the MATSEC Board of the University of Malta according to the provisions of the Matriculation Examination Regulations and this notwithstanding any other regulation governing the award of the Matriculation Certificate.

This course is also open to applicants in possession of the Bachelor of Science (Honours) in Dental Hygiene or Dental Technology obtained with at least Second Class (Honours).

Prior to enrolling for the Course, accepted applicants are also required to undergo an occupational health assessment as detailed in the Occupational Health Protocol approved by the Faculty Board, so as to ascertain that they are fit for the duties related to their proposed studies. Students who do not fulfil this requirement shall be barred from attending the clinical placements.

Bachelor of Science (Honours) in Dental Hygiene

Dental hygiene is an allied profession to dentistry. Its aims, however, are more specific and focused on one of its disciplines, that is the prevention and management of the two most common dental diseases - dental caries and periodontal disease. The programme spans over three academic years, inclusive of two semesters per year and two summer periods. The programme exposes students to the theoretical and scientific foundation of the profession, while also becoming skilful in clinical practice within the professional environment of the teaching hospital.

ENTRY REQUIREMENTS

General Entry Requirements together with *either* an Advanced Level pass in **Biology** or an Intermediate Level pass at Grade C or better in **Biology**.

Applicants in possession of a pass with Merit or better in the Diploma in Dental Surgery Assistance shall be considered as having satisfied both the general and special entry requirements.

Prior to enrolling for the Course, accepted applicants are also required to undergo an occupational health assessment as detailed in the Occupational Health Protocol approved by the Faculty Board, so as to ascertain that they are fit for the duties related to their proposed studies. Students who do not fulfil this requirement shall be barred from attending the clinical placements.

Bachelor of Science (Honours) in Dental Technology

This programme delves into the art and science of dental technology. Dental technologists construct orthodontic appliances, full dentures, partial dentures, crowns and bridges from a dentist's prescription. Technologists may also produce speciality items such as surgical splints and sports mouth guards, as well as implant-related restorations. Dental technologists have to be artistic and precise in their work because of the high-precision manual work involved. As part of the dental team and working together with the dentist, they strive to produce the best possible solutions for the patient's aesthetic and functional requirements.

ENTRY REQUIREMENTS

General Entry Requirements together with *either* an Advanced Level pass in **Chemistry** or an Intermediate Level pass at Grade C or better in **Chemistry**.

Applicants in possession of a pass with Merit or better in the Diploma in Dental Surgery Assistance shall be considered as having satisfied both the general and special entry requirements.

Prior to enrolling for the Course, accepted applicants are also required to undergo an occupational health assessment as detailed in the Occupational Health Protocol approved by the Faculty Board, so as to ascertain that they are fit for the duties related to their proposed studies. Preparatory Course for the Diploma in Dental Surgery Assistance

The preparatory course for the Diploma in Dental Surgery Assistance introduces the applicants to the dental clinical environment and their role as part of the dental team. A basis in knowledge of human and oral anatomy, physiology and biochemistry is provided. The skills necessary for clinical work, including health and safety and cross infection control concepts, ethics, the practice of first aid and the properties and handling of instruments and materials are both taught and practised via clinical rotations. Learning is supported by seminars in academic writing, reading and speaking. Upon successful completion the student proceeds to the Diploma Course

ENTRY REQUIREMENTS

- a) **six** passes at Grade 5 or better in the Secondary Education Certificate Examination including **English Language, Maltese, Mathematics, and Biology or Chemistry**; or
- b) the MCAST Diploma in Applied Science; or
- c) the MCAST-BTEC Diploma in Health and Social Care.

Prior to enrolling, accepted applicants are also required to undergo an occupational health assessment as detailed in the Occupational Health Protocol approved by the Faculty Board, so as to ascertain that they are fit for the duties related to their proposed studies. Students who do not fulfil this requirement shall be barred from attending the clinical placements.

Diploma in Dental Surgery Assistance

Eligible applicants are first enrolled in the preparatory course. On successful completion of this course, students are enrolled in the Diploma course. This course exposes students to the theoretical and scientific foundation of the vocation, whilst allowing them to become skilful in clinical practice within the professional environment of the University's dental teaching facilities. The course is intended for students interested in the dental profession. Successful completion of the Diploma Course will enable students to enrol in the Faculty's Bachelor courses. Alternatively, job opportunities exist within the private sector and government health services.

ENTRY REQUIREMENTS

- a) successful completion of the Preparatory Course for the Diploma in Dental Surgery Assistance offered by the University of Malta; or
- b) the MCAST Diploma for Dental Surgery Assistants or equivalent.

Prior to enrolling, accepted applicants are also required to undergo an occupational health assessment as detailed in the Occupational Health Protocol approved by the Faculty Board, so as to ascertain that they are fit for the duties related to their proposed studies. Students who do not fulfil this requirement shall be barred from attending the clinical placements.

Bachelor of Commerce / Bachelor of Commerce (Honours)

Eligible for tax rebates under the Get Qualified Scheme

The Bachelor of Commerce is a full-time degree course leading to the Bachelor of Commerce (Honours) course. The first year is common to all students. During the second and third years, however, students major in two areas choosing from Accountancy, Banking and Finance, Economics, Insurance, Management, Marketing, and Public Policy. The overall objectives of the Bachelor of Commerce undergraduate degree programme is to provide the participants with a high-quality and a career-oriented education for a diverse student population. It is an inter-disciplinary programme covering a wide range of subjects and areas of study. The course provides the participants with a broad understanding of the complexity and dynamics present in contemporary business and public organizations. It trains the participants to gain the conceptual skills and an analytical approach necessary to tackle the problems facing organizations in today's environment.

Students who successfully complete the Bachelor of Commerce degree and who major in Accountancy as one of the main areas, may opt to read for a Master in Accountancy provided they obtain the required grades as specified in the Master course bye-laws. Students who successfully complete the Bachelor of Commerce degree and who major in one of the following areas: Management, Marketing, or Public Policy may opt to read for the Master of Science in Strategic Management and Marketing / Digital Marketing / Public Policy provided they obtain the required grades as specified in the M.Sc. course bye-laws.

ENTRY REQUIREMENTS

General Entry Requirements together with an Intermediate Level pass in **Pure Mathematics**,

provided that applicants wishing to choose Accountancy as an area of specialisation in Year 2 of the Course must also be in possession of a pass at Advanced Matriculation level in **Accounting** at the time of applying for the Course.

Applicants wishing to choose 'Banking and Finance' as one of the two areas of specialisation in Year 2 of the course may also be admitted into the course if they are in possession of an Intermediate Level pass in **Pure Mathematics** and *either*:

- a) the Certificate in Banking of the Chartered Institute of Bankers (comprising six subjects); *or*
- b) the MCAST Advanced Diploma in Financial Services; *or*
- c) any other qualifications deemed relevant by the Faculty Board, provided that the qualifications comprise not less than 120 ECTS credits and are offered at MQF Level 4 or higher.

Applicants wishing to choose 'Insurance' as one of the two areas of specialisation in Year 2 of the course may also be admitted into the course if they are in possession of an Intermediate Level pass in **Pure Mathematics** and *either*:

- a) the Certificate in Insurance of the Chartered Institute of Insurance; *or*
- b) the MCAST Advanced Diploma in Insurance; *or*
- c) the International Certificate in Enterprise Risk Management of the Institute of Risk Management; *or*
- d) the Certificate in Risk Management in Financial Services of the Institute of Risk Management,

provided that applicants wishing to choose Banking and Finance as the other main area of specialisation in Year 2, may also be admitted if they also satisfy the requirements for the Banking and Finance area of study mentioned above.

Bachelor of Commerce in Economics and Management

The Bachelor of Commerce (part-time) programme brings together the fields of Economics and Management. The programme aims to provide participants with a high-quality course in a range of topics from both areas of study. Participants will be provided with a diverse range of tools to broaden their understanding of the complex and dynamic underpinnings of the economy and the skills required for the running of an organisation. The course aims to enhance the capability of participants in developing effective strategies and taking effective decisions in their future job careers.

Bachelor of Arts (Honours) in Politics and Governance

The programme is intended to contribute to the political formation of citizens who are interested in politics and governance or are actively engaged in Maltese public life, through political parties, journalism and the social media, local councils, communities, civil society associations, non-governmental and business organisations or aspire to be future politicians. It reaches out to occupational and social groups for whom politics and governance are central concerns. This programme will provide students with the principal theoretical frameworks and application of politics as a discipline; the concepts of national and international political systems, values and ideas; the role and analysis of political actors in shaping and defining politics and the multifaceted dimension of governance. The programme will also teach interested students to connect trends and patterns when reading political scenarios and apply the tools and skills in diverse political contexts.

Bachelor in Work and Human Resources (Honours)

(Offered under the auspices of the Centre of Labour Studies in collaboration with the Faculty of Economics, Management and Accountancy.)

As organisations strive to adapt to the ever increasing challenges of globalisation, the need for skilled and qualified human resources professionals increases. This programme of study aims to fill a gap in this much needed area of specialisation. Students are provided with sound underpinning knowledge and the necessary skills to work professionally in settings related to human resources. The programme of studies covers the following six major themes: Work, Labour Market and Society; Organisational Behaviour and Development; Industrial and Employee Relations; Work Design and Occupational Health and Safety; Personal and Occupational Skills Development; and Research.

ENTRY REQUIREMENTS

General Entry Requirements

Applicants in possession of the **Diploma in Social Studies (Industrial Relations)**, the **Diploma in Gender, Work and Society**, or the **Diploma in Social Studies (Gender and Development)** of the University of Malta with an average mark of 60%, or a comparable qualification in an area related to Industrial Relations or Labour Studies or Gender Studies who have obtained credits for study-units considered by the Board of Studies to be equivalent to those in the programme of study, may also be admitted to the Course. Such applicants may be allowed by the Board of Studies to transfer these credits to the Course. The number of credits so transferred shall not exceed 60 ECTS credits.

Applicants in possession of the Diploma in Social Studies (Gender and Development) are required to obtain up to 16 ECTS credits as directed by the Board of the Centre prior to acceptance on the Course.

Information for applicants in terms of the 'maturity (adult learners) clause' will be available at: um.edu.mt/I/G3KSS

Higher Diploma in Administration and Management

The Higher Diploma in Administration and Management familiarises participants with a range of management theories and proven practices appropriate to contemporary organisations. The course is relevant for those who have supervisory and/or managerial experience and wish to develop further their existing management skills through a specific academic programme. The first year concentrates on the building of generic knowledge and skills, appropriate for general managerial capability. During the second year, participants focus on improving their competence at departmental or functional level. The third year study-units aim to give an integrative approach to managerial proficiency.

for **Science with specialisation in Physics**: *either* an Advanced Level pass at Grade C or better in **Physics** and an Intermediate Level pass at Grade C or better in **Pure Mathematics** *or* an Advanced Level pass at Grade C or better in **Pure Mathematics** and an Intermediate Level pass at Grade C or better in **Physics**.

Bachelor of Science (Honours) in Technical Design and Technology

The concept behind this undergraduate degree in Technical Design and Technology is the liberal study of technology and the flexibility of employment. Within this degree, the learner develops foundation knowledge and hands-on skills about the domains of technological design and manufacturing processes, graphical communication, engineering drawing, electrical and electronic circuits, materials, mechanical structures and mechanisms. The degree offers the opportunity to view technological products as user-centred and discusses the development of values related to technology and its uses by modern society. Apart from encouraging enterprising job initiatives, this degree is the ideal springboard for employment within professions that communicate technology such as the Master in Teaching and Learning degree.

ENTRY REQUIREMENTS

General Entry Requirements together with an Advanced Level pass at Grade C or better in any subject.

Admission to this course is also open to applicants in possession of:

either:

- i. **five** passes at Grade 5 or better in the Secondary Education Certificate Examination, including **English Language** and **Maltese**, and
- ii. the Advanced Technicians Diploma of the City and Guilds of London Institute, or the MCAST-BTEC Higher National Diploma in Electrical Engineering Level 5, or the MCAST-BTEC Higher National Diploma in Electronic Engineering Level 5, or the MCAST-BTEC Higher National Diploma in Mechanical Engineering Level 5, or a qualification considered equivalent by the University Admissions Board on the recommendation of the Faculty Board;

or

- a) **five** passes at Grade 5 or better in the Secondary Education Certificate Examination, including **English Language and Maltese**; and
- b) an MCAST Advanced Diploma Level 4 of one of the following Institutes: (a) Institute of Engineering and Transport, (b) Institute for the Creative Arts, (c) Institute of Information and Communication Technology, (d) Institute of Applied Sciences.

For me, the Bachelor of Science (Honours) in Technical Design and Technology course was the ideal choice, since it provided the core essentials, which not only enabled me to grasp the techniques as a designer, but also equipped me with the practical skills which helped me to better understand the manufacturing industry. The knowledge and skills which I have acquired will be crucial in my current endeavour, the Master in Teaching and Learning in Design and Technology, values which I will then transmit to my future students, all through effective pedagogy.

AREAS OF STUDY

- Electrical and Electronic Engineering
- Mechanical Engineering

The Bachelor of Engineering (Honours) course develops the fundamental scientific and mathematical knowledge, engineering design, analysis and practice together with the interdisciplinary economic, ethical and social skills necessary for the different engineering-related job markets offered in various local and international industrial sectors such as the aerospace, biomedical, maritime, energy, telecommunications, electronics and manufacturing industries as well as that of building services. The course focuses on two main universal engineering areas of studies; Electrical and Electronic Engineering or Mechanical Engineering.

The Electrical and Electronic Engineering programme addresses the fundamental concepts in electrical engineering, electronics, signal processing and control systems. Students will be able to choose a variety of study-units geared towards the fields of energy generation, conversion, storage and smart distribution, renewable energy, green transportation, electronic sensing, acquisition and measurement, electronic product development, automated systems, autonomous vehicles/robots and software algorithms for signal, image and video processing.

The Mechanical Engineering programme addresses the fundamental concepts in mechanical, manufacturing and materials engineering, and then focuses on one of three streams as selected by the student: Applied Materials in Engineering; or Applied Mechanics and Thermofluids Engineering; or Industrial and Manufacturing Engineering. Students will be able to choose a variety of study-units geared towards fields such as aerospace engineering, automotive engineering, biomaterials, biomechanics, building services, energy, maritime engineering, nanomaterials, polymer and composites manufacture, quality and reliability engineering, robotics and automation, structural integrity, surface engineering, tool design and manufacture.

October 2022 and 2023

COURSE
FINDER

This course is recognised by the local Engineering Profession Board as a prerequisite for the application of the Engineering Warrant (Ing.) and is also internationally recognised by the European Federation of National Engineering Associations (FEANI - Eur.Ing.).

The Mechanical Engineering area of study is also accredited by the Institution of Mechanical Engineers (I.Mech.E.) U.K and by the Royal Institute of Naval Architects (R.I.N.A.) U.K. on behalf of the Engineering Council U.K. as, in part, satisfying the requirements of a Chartered Engineer (CEng - second cycle degree) and fully meeting the requirement of an Incorporated Engineer (IEng). The Mechanical Engineering area of study is also recognised by the European Network for the Accreditation of Engineering Education (ENAAE) and labelled as a first cycle Engineering degree under the EUR-ACE programme.

ENTRY REQUIREMENTS

Either

- a) satisfy the General Entry Requirements together with **two** Advanced Level passes at Grade C or better in **Pure Mathematics and Physics**

or

- b) be in possession of the **Certificate in Engineering Sciences** from the University of Malta.

The Faculty Board may also consider applicants in possession of a qualification at MQF Level 5 in an engineering domain, together with passes in the Secondary Education Certificate Examination at Grade 5 or better in English Language, Maltese, Mathematics and Physics, to join the Course. Such applicants shall be required to present with the qualification they submit for entry, a detailed transcript showing their performance during their studies. They shall further be required to attend for an interview to assess whether they have the necessary aptitude to follow the Course with profit.

My time spent reading for a Bachelor in Engineering (Honours) in Mechanical Engineering was a truly enriching experience. As an engineering student, I was introduced to a wide array of fields, which gave me the ability to tackle several engineering challenges with the right knowledge, a scientific perspective, and through the use of a systematic approach. Being a student within the Faculty of Engineering has also equipped me with the soft skills necessary to chart my course through the engineering industry, especially through my student activism within the University Engineering Students' Association (UESA).

JEANICE MALLIA

B.Eng. (Hons)(Melit.)

Certificate in Engineering Sciences

The Certificate in Engineering Sciences is a one-year certificate course intended to prepare students with the knowledge, skills and competencies necessary to follow the B.Eng. (Hons) course. During the course, students will be studying mathematics and physics, bringing the student's knowledge and understanding of these two subjects to the level which meets the specific requirements of the B.Eng. (Hons) degree course. The programme also includes studies specific to the engineering profession. Through engineering workshops and laboratories, the programme will complement theoretical skills with practical skills in mechanical fitting, machining and manufacturing, electrical installations, electronics and control engineering. Moreover, a unit in computer systems and programming will help to prepare you to become a modern engineer.

ENTRY REQUIREMENTS

Either

have obtained a minimum of 36 points in examinations taken as part of the Matriculation Certificate *and* be in possession of passes in the Secondary Education Certificate Examination at Grade 5 or better in **English Language**, **Maltese** and **Mathematics** together with a pass at Advanced Matriculation Level in one of the following subjects: **Applied Mathematics**, **Chemistry**, **Computing**, **Engineering Drawing**, **Graphical Communication**, **Information Technology**, **Pure Mathematics**, **Physics** or other science/numeric subjects as approved by the Faculty Board;

or

be in possession of a qualification at MQF Level 4 in an engineering domain, as well as passes in the Secondary Education Certificate Examination at Grade 5 or better in **English Language**, **Maltese** *and* **Mathematics**.

Applicants may be required to attend for an interview to assess whether they have the necessary aptitude to follow the Course with profit.

Bachelor of Science (Honours) in Applied Biomedical Science

Applied Biomedical Science deals with the study of the techniques and procedures involved in the collection and analysis of samples taken from the human body to enable the identification of pathological conditions.

It also provides the diagnostic tool for medical care within the laboratory. The aim of the Bachelor of Science (Honours) in Applied Biomedical Science programme is to produce high-quality graduates with expertise in all the experimental and routine aspects of a pathology laboratory and with the theoretical knowledge and practical skills required for the study and interpretation of pathological processes. Graduates in Applied Biomedical Science are registered with the Council for the Professions Complementary to Medicine (CPCM), and can then seek employment as medical laboratory scientists in Clinical Laboratories. Graduates can also work in industry or embark on a career in academic research.

ENTRY REQUIREMENTS

General Entry Requirements together with:

- two** Advanced Level passes at Grade C or better in **Biology and Chemistry**; *and*
- a pass at Intermediate Level in one of the following subjects: **Applied Mathematics, Computing, Information Technology, Physics** and **Pure Mathematics**.

Preparatory Course for Bachelor of Science (Honours) in Nursing

The preparatory course provides a pathway towards a career in nursing by enabling students to develop the skills required for academic success. It is designed to address the needs of those individuals who are interested in pursuing a degree programme in nursing but do not have the required entry qualifications. The aim is, therefore, to equip students with the key skills that would prepare them for successful engagement in undergraduate degree nurse education. The course addresses three main areas of study, namely: academic skills, nursing as a profession and basic biomedical science. On successful completion of the preparatory course programme, students will be able to progress to the B.Sc. (Hons) Nursing course offered by the Faculty of Health Sciences.

ENTRY REQUIREMENTS

- a) passes at Grade 3 or better in the Secondary Education Certificate Examination in **six** subjects, including **Maltese, English Language** and **Mathematics**; *or*
- b) passes in the Secondary Education Certificate Examination in **six** subjects, including: **Maltese, English Language, Mathematics** and either **Biology** or **Health and Social Care**, together with a pass at Advanced Level in any other subject; *or*
- c) the MCAST-BTEC Extended Diploma in Health and Social Care (Health Studies) or the MCAST Advanced Diploma in Health Sciences, or equivalent.

Applicants who would have successfully completed the Certificate in Clinical Nursing Practice course with the same area of study for which they are being accepted, will be allowed to transfer the study-units passed during the Certificate course to the course leading to the Degree on condition that they renounce the Certificate.

Bachelor of Science (Honours) in Nursing

The overall aim of the Bachelor of Science (Honours) in Nursing course is to prepare qualified nurses who are able to provide optimal evidence-based patient-centred care in contemporary health care settings. The course provides students with an understanding of nursing's distinct knowledge base, as well as knowledge derived from the other life and social sciences. It also aims to equip students with the ability to perform the required clinical skills competently and in full knowledge of the current evidence. The programme conforms to the European Union Directive on Nursing Education and secures graduates recognition as first-level nurses across EU member states.

ENTRY REQUIREMENTS

General Entry Requirements together with successful completion of the Values-Based Test held by the Faculty of Health Sciences.

Admission to this course is also open to applicants in possession of a pass in the 60 ECTS credits of the Preparatory Course specifically related to Nursing. Applicants are required to complete the Preparatory Course programme immediately prior to the commencement of the Course.

Applicants in terms of the 'maturity (adult learners) clause' are directed to apply for the Preparatory Course for the Bachelor of Science (Honours) in Nursing programme. If they are in possession of related qualifications or work experience in the healthcare sector, they may submit an application to be considered for direct entry to the Bachelor of Science (Honours) in Nursing course through the Recognition of Prior Learning process. Bachelor of Science (Honours) in Occupational Therapy

Occupational Therapy is one of the foremost rehabilitation professions providing services in hospitals, outpatient clinics, schools and the community. Occupational therapists are concerned with empowering people to accomplish independence in occupations, which are the range of human activities required to participate in life throughout the stages of human development. Through the course programme, the students will acquire a body of knowledge and skills that will enable them to assess and treat a range of client populations. Occupational therapy is ideal for anyone who is interested in becoming a professional capable of enabling others achieve competence in their occupations for a better quality of life.

ENTRY REQUIREMENTS

General Entry Requirements together with an Advanced Level pass at Grade C or better in **Biology**.

As Occupational Therapy becomes a more established profession within various hospital, clinical, residential, scholarly, and community settings, the Bachelor of Science (Honours) in Occupational Therapy continues to cement itself as a worthwhile endeavour, since it provides the essential preparation for most settings. It allows you to experience the roles and interventions of Occupational Therapists in real-time across various settings, and to identify areas of special interest which would lead to continual career progression and professional development.

Bachelor of Science (Honours) in Physics, Medical Physics and Radiation Protection

(under the auspices of the Faculty of Health Sciences and the Faculty of Science)

This programme is for those students who would like to read for a degree in both Physics and its most attractive applications in society at present – Medical Physics and Radiation Protection. It opens the door to careers in all areas of Physics, as hospital Medical Physicist (Medical Physicist is a warranted health care profession and Medical Physicists at Expert level are a legal requirement of EU Directive 2013/59/EURATOM) and Radiation Protection Expert (also a legal requirement of EU Directive 2013/59/EURATOM) as well as medical research, medical device industry, university career, medical device sales, physics education and others. Students will study with others from both the Faculty of Science and the Faculty of Health Sciences to ensure that they are capable of bridging the gap between pure physics and its applications in healthcare. The course is future looking and very multidisciplinary and includes not only physics, mathematics, medical physics and radiation protection but also essential anatomy, physiology, ICT, ethics, management and legal issues.

ENTRY REQUIREMENTS

General Entry Requirements together with:

either

- a) an Advanced Level pass at Grade C or better in **Physics** and an Intermediate Level pass at Grade C or better in **Pure Mathematics**;

Whilst filling in the online application for this course applicants must have their Police Certificate of Conduct at hand as they are required to include certain details from the Police Certificate of Conduct in the application form.

On acceptance on the course, applicants will be asked to submit an original Police Certificate of Conduct (not more than 6 months old) to the Faculty of Science.

Diploma in Health Studies (Nursing)

In view of global developments and evolving realities in the health and social care fields, Malta is seeking to establish a national nurse workforce which comprises staff registered nurses holding a nurse's qualification at a minimum level of EQF level 5. In view of this, the Diploma in Health Studies (Nursing) programme will be offered once again to all qualified nurses who, to-date, hold an EQF level 4 nurse qualification. The 60 ECTS programme, consists of theoretical and practical components and involves the in-class and online participation of the students, together with practice in simulated and actual clinical settings. Assessments along the programme vary across examinations, assignments and the assessment of practical performance of the students.

ENTRY REQUIREMENTS

- a) a qualification in Nursing deemed suitable by the Faculty Board and pegged at least at Level 4 on the Malta Qualifications Framework; or
- b) a professional qualification deemed by Senate to be comparable to the qualification indicated above.

Once accepted on the Course, students are required to undergo an occupational health assessment so as to ascertain that they are fit for the duties related to their proposed studies. Students who do not fulfil this requirement may be barred from progressing with their studies. Failure to disclose information about a physical or mental health problem that could affect patient safety is considered to be a serious breach of the University Suitability to Practise Regulations.

Certificate for Graduates of Non-EU/EEA Nursing Programmes

The purpose of this programme is to address the gaps between the undergraduate training of nurses qualified in non-EU/EEA countries and the requirements for nurse training as stipulated by EU regulations. Through a combination of theoretical and practical study-units the programme is adjusted to meet the needs of different applicants with varying nursing qualifications. The core components of the programme address the over-arching requirements of the EU directive, and enable students to consolidate their clinical competencies, understand different healthcare systems, and work as a nurse in healthcare systems within an EU-member state.

ENTRY REQUIREMENTS

- a) a qualification in Nursing deemed suitable by the Board of Studies and recognised at least at Level 5 on the Malta and European Qualifications Frameworks; or
- b) a professional qualification deemed by Senate to be comparable to the qualification indicated above; or
- c) a recognised qualification in Nursing pegged at MQF Level 4 on the Malta Qualifications Framework together with a recognised qualification in an area related to Nursing pegged at MQF Level 5 on the Malta Qualifications Framework. Such applicants may be required to successfully complete additional study-units.

In addition to the qualifications listed above, applicants shall be required to provide evidence that they are in possession of the licence to practice as a nurse awarded by the relevant regulatory council of the country from where the qualification was awarded.

Capping applies to both full-time and part-time modes. 20 students will be accepted to the course independently of whether they opt for the full-time or part-time mode of study. Qualified applicants shall be accepted on a first-come first-served basis.

NOTES

Whilst filling in the online application for one of the full-time courses (except for the Certificate for Graduates of Non-EU/EEA Nursing Programmes) offered by the Faculty of Health Sciences, applicants need to have their Police Certificate of Conduct at hand as they are required to include certain details from the Police Certificate of Conduct in the application form.

On acceptance, applicants for the Bachelor of Science (Honours) (full-time), the Bachelor of Science (Honours) Nursing (part-time) and the Preparatory course for the Bachelor of Science (Honours) in Nursing are required to submit a recent Police Certificate of Conduct (not more than 6 months old) to the respective Departmental Secretary at the Faculty of Health Sciences (Block A, Level 1, Mater Dei Hospital). It is advisable that this mandatory document is submitted by hand. Further instructions will be communicated to accepted applicants at a later stage.

Prospective applicants for the Bachelor of Science (Honours) in Health Science, Bachelor of Science (Honours) in Nursing (Elderly Care), Preparatory course for the Bachelor of Science (Honours) in Nursing, and capped courses, are kindly requested to access the following link for further information regarding admission: um.edu.mt/healthsciences/study

In courses where a limited number of students is indicated, applicants who apply by the first deadline and are fully qualified by **31 August** will be considered first and will be placed in rank order.

If, after this initial ranking, vacant places are still available, and if applicants would have obtained the necessary qualifications by **30 September**, they shall be considered for selection to take up any remaining places.

All applicants for full-time courses are required to undergo a medical fitness test as directed by the Faculty Board so as to ascertain that they are fit for the duties related to their proposed studies.

As potential future health care professionals, students are required to undergo an occupational health assessment, as detailed in the Occupational Health Protocol approved by the Faculty Board, so as to ascertain that they are fit for the duties related to their proposed studies. Students who do not fulfil this requirement may be barred from progressing with their studies. Failure to disclose information about a physical or mental health problem (that could affect their safety or that of others; including patients, clients, students and staff), would be considered to be contrary to the University Suitability to Practice Regulations.

Applicants choosing a limited number course offered by the Faculty of Health Sciences will only be able to change the order of their preferences until the 31 August at 14:00 (CEST). Once a letter of acceptance is issued for the applicants' first preference course, the application for the second preference course will be automatically withdrawn.

Bachelor of Science (Honours) (Computer Engineering)

The Computer Engineering degree targets the increasing demand in computer systems development and communication systems. This degree equips students with engineering skills to develop systems that are capable of capturing data from the environment through various devices and sensors, shape this data to match the communication channel and protect it, transmit information to a remote site, and process the received data for consumption on the receiving device. The skills developed provide a good combination of hardware design tool insight and software knowledge to manage and control computer systems. This degree is suitable for students interested in Microelectronic Circuit Design, Embedded Systems, Computer Systems Infrastructure, Telecommunications, Multimedia Data Manipulation and Transmission.

ENTRY REQUIREMENTS

Either

General Entry Requirements together with:

- a) **two** Advanced Level passes at Grade C or better in **Pure Mathematics** and in one of the following subjects: **Applied Mathematics, Biology, Chemistry, Computing*** and **Physics**; and
- b) an Intermediate Level pass in **Physics**, if not presented at Advanced Level

Or

Successful completion of the **Certificate in Engineering Sciences** from the University of Malta.

**Please refer to the information on the Matriculation Examination on pages 234 and 235*

Admission to this course is also open to applicants in possession of:

- i. passes in the Secondary Education Certificate Examination including **English Language, Mathematics and Maltese**; and
- ii. the MCAST-BTEC Higher National Diploma (HND) in an area deemed to be relevant to the Course by the Faculty Board;

Or

the **Certificate in ICT Foundation Studies** from the University of Malta.

Bachelor of Science (Honours) (Computing Science)

The Computing Science degree responds to the demand for the development of robust software that is capable of solving complex problems on resource constrained processing devices, such as mobile computing. This degree prepares the student for the development of efficient software solutions using a variety of programming paradigms, construct distributed and concurrent systems, handle complex data structures in near real-time in the context of specific hardware configurations, as well as reason about software and results using logical formal methods. This degree is suitable for students interested in all aspects of the science of computation, including certain computational aspects of machine learning, networked and high-performance solutions, secure and verifiable results, multimedia data processing, measurable software development, and graphics.

ENTRY REQUIREMENTS

General Entry Requirements together with:

- two** Advanced Level passes at Grade C or better in **Pure Mathematics** and in any other subject; and
- an Intermediate Level pass in any subject (*excluding the subjects presented at Advanced Level*).

Admission to this course is also open to applicants in possession of the **Certificate in ICT Foundation Studies** from the University of Malta.

Bachelor of Science in Information Technology (Honours) (Artificial Intelligence)

The degree responds to the ever-growing need of building systems that are autonomous or that can assist in decision-making processes. It prepares students to develop algorithms for problems where the optimal solution is either too complex or has excessive time complexity. Such algorithms are based on learning from experience in a supervised or an unsupervised way. Topics that are covered include big data, creative technologies, gaming, artificial vision, natural language processing and robotics. It provides a balance between theoretical and applied aspects in its taught and research components, with the aim of strengthening career prospects in the industry and academia.

ENTRY REQUIREMENTS

General Entry Requirements together with **two** passes at Grade C or better in **Pure Mathematics and Computing** provided that one of these passes is at Advanced Level and the other pass is at least at Intermediate Level.

Admission to this course is also open to applicants in possession of the **Certificate in ICT Foundation Studies** from the University of Malta.

Admission to this course is also open to applicants in possession of:

- i. an Advanced Level pass at Grade C or better in **Pure Mathematics**, or at a corresponding level of other examinations recognised by Senate for the purpose of the Admissions Regulations; *and*
- ii. *either* the Diploma of the City and Guilds of London Institute Course No.7235 in Applied Information Technology *or* the MCAST-BTEC Extended Diploma in IT *or* the MCAST Advanced Diploma in IT *or* the MCAST-BTEC Higher National Diploma (HND) in Computing.

Bachelor of Science in Information Technology (Honours) (Computing and Business)

The Computing and Business degree deals with the steady increase in demand of software solutions for the business sector. This degree provides students with insight into the main technical aspects of software development while exposing them to business related aspects, an ability to identify technological solutions for specific business problems, and sensitivity to specific cross-disciplinary topics that constitute the more commercial dimension of information technology. This degree is suitable for students interested in developing software for business organisations, understanding and applying algorithms used in trading, banking and investment, marketing, and other commercial activity. Students in this degree can specialise in either Computing for Business, Computing for Finance or Computing for Marketing and thus gain knowledge and skills in management, generic business, financial and marketing realities depending on the specialisation chosen.

ENTRY REQUIREMENTS

General Entry Requirements together with:

- Advanced Level passes at Grade C or better in **two** of the following subjects: **Accounting, Applied Mathematics, Biology, Chemistry, Computing****, **Economics, English, Information Technology****, **Marketing, Philosophy, Physics, Pure Mathematics**; and
- an Intermediate Level pass at Grade C or better in **Pure Mathematics***; and
- an Intermediate Level pass in **Computing*** or **Information Technology***.

Bachelor of Science in Information Technology (Honours) (Software Development)

The Software Development degree aims to produce software developers who can create solutions constrained by stakeholder requirements. Such solutions are driven by the need to satisfy real-world activities while also requiring understanding and qualification of the software development process itself. This degree provides the students with the necessary skills to analyse real-world processes and arrive at solutions that suit all the involved stakeholders using the most suitable technologies. The degree is suitable for students interested in developing applicative software of measurable quality, the design of information and database-oriented systems, understanding software engineering practices, getting introduced to software project management, enterprise resource planning, e-service and mobile application design, and Cloud-based solutions.

ENTRY REQUIREMENTS

General Entry Requirements together with:

Certificate in ICT Foundation Studies

The Certificate in ICT Foundation Studies is a one-year certificate course that equips students with fundamental knowledge in mathematics, programming and science content, together with English language proficiency, needed for Bachelor programmes offered by the Faculty of ICT. It provides a path for students who do not immediately qualify for entry to the Faculty of ICT undergraduate programmes because they do not meet either the general course requirements or the special course requirements.

ENTRY REQUIREMENTS

Admission to this course is open to applicants aged not less than 18 years within three calendar months from the date of commencement of the course and be in possession of:

Either

- a) a minimum of 36 points in examinations taken as part of the Matriculation Certificate *and* passes in the Secondary Education Certificate Examination at Grade 5 or better in **English Language, Maltese and Mathematics**;

or

- b) be in possession of a qualification at MQF Level 4 in an ICT domain, together with passes in the Secondary Education Certificate Examination at Grade 5 or better in **English Language, Maltese and Mathematics**.

Applicants may be required to attend for an interview to assess whether they have the necessary aptitude to follow the course with profit.

Bachelor of Laws (Honours)

The Bachelor of Laws (Honours) degree provides a comprehensive knowledge of, and training in, the core legal subjects of a substantive law nature. The main areas of the law covered in this course include Public Law, Civil Law, Criminal Law, International Law, Commercial Law, European and Comparative Law, Environmental and Resources Law, Media and Communications and Technology Law, and Legal History and Methodology. Though not a degree leading directly to the pursuit of a specific profession, the areas covered may equip students with knowledge and skills which may be utilised in other careers (as in the public service, banking and in other commercial occupations). The course will also enable students to pursue a range of postgraduate studies. At the University of Malta, students may, amongst others, then read for the degree of the Master of Advocacy, the Master of Notarial Studies, the Master of Laws in European and Comparative Law, the Master of Laws in European Business Law, the Master of Laws in Energy, Environmental and Climate Change Law, the Master of Laws in International Law, the Master of Arts in Financial Services, the Master of Arts in Law and the Master of Arts in Mediation.

ENTRY REQUIREMENTS

General Entry Requirements together with:

- two** Advanced Level passes at Grade C or better in **English and Maltese**; and
- three** Intermediate Level passes, one of which at Grade C or better, in subjects chosen as follows: one subject from **Group 2**, one subject from **Group 3**, and another subject (except *English and Maltese*); or
- a degree at MQF level 6 in any area of study awarded by the University of Malta or any other higher education institution recognised by Senate, and a pass at Grade C or better at Advanced level or equivalent in Maltese, provided that if the degree is in **Maltese** a pass at Grade C or better at Advanced Level or equivalent in English is also required.
- applicants considered as “Adult Learners” (mature applicants) in terms of paragraph (c) of regulation 6 of the Admissions Regulations shall also be in possession of a pass at Grade C or better at Advanced Level in **English** and in **Maltese** or equivalent. Such applicants shall also be required to submit with their application a letter written in English giving their motivation for applying for the course together with a copy of their Curriculum Vitae (C.V.).

Higher Diploma of Legal Procurator

The Higher Diploma of Legal Procurator is a course tailor-made to prepare prospective Legal Procurators. Through this Higher Diploma, holders of this award can sit for the warrant exam of Legal Procurator. The course covers the substantive and procedural laws which a Legal Procurator would practise in the profession is imparted. This programme leads to the profession of Legal Procurator but not to the professions of advocate or notary public nor is it intended to enable students to pursue postgraduate courses.

ENTRY REQUIREMENTS

General Entry Requirements together with:

- a) **two** Advanced Level passes at Grade C or better in **English and Maltese**; and
- b) **three** Intermediate Level passes, one of which at Grade C or better, in subjects chosen as follows: **one** subject from **Group 2**, **one** subject from **Group 3**, and another subject (*except English and Maltese*); or
- c) a degree at MQF level 6 in any area of study awarded by the University of Malta or any other higher education institution recognised by Senate, and a pass at Grade C or better at Advanced level or equivalent in **Maltese**, provided that if the degree is in Maltese a pass at Grade C or better at Advanced Level or equivalent in English is also required.
- d) applicants considered as "Adult Learners" (mature applicants) in terms of paragraph (c) of regulation 6 of the Admissions Regulations shall also be in possession of a pass at Grade C or better at Advanced Level in **English** and in **Maltese** or equivalent. Such applicants shall also be required to submit with their application a letter written in English giving their motivation for applying for the course together with a copy of their Curriculum Vitae (C.V.).

Bachelor of Communications (Honours)

The Bachelor of Communications (Honours) is a theory and practice-based course in which students analyse and gain skills in different aspects of Media and Communications. The areas of study include journalism; design and visual communications; marketing communications; film; video and broadcasting; and internet communications. Students also explore human communications in different contexts, as well as the latest media and communication trends and technologies in various settings. By the end of their course students will have analytical knowledge in all the areas listed. They will also have practical skills in many of the production-based topics. In the third year of the course, students are encouraged to focus on one of the media and communications areas of study. A placement, a dissertation and a mentored project consolidate this focus. Job opportunities include, among others, careers in journalism, the media, film, public relations, advertising, corporate communications, design, digital and online publishing, broadcasting or marketing positions.

Bachelor of Fine Arts (Honours) in Digital Arts

The Bachelor of Fine Arts (Honours) in Digital Arts programme is a practice-based undergraduate award in digital art and design practice and theory. It offers a learning environment in which historical traditions and new practices confront and influence each other within a contextual, cultural and theoretical framework. The course offers students a choice of two specialisation routes, namely Visual Communications (Graphic Design) and Animation. On completion of this course, students will be equipped with the core professional tools required by the design and animation industries. The course also prepares students for further research at Master's level in these specialised fields.

ENTRY REQUIREMENTS

General Entry Requirements together with an Advanced Level pass in **Art**.

Admission to this course is also open to applicants in possession of:

- a) the **Diploma in Design Foundation Studies** from the University of Malta; or
- b) a qualification comprising not less than 60 ECTS credits (or equivalent), pegged at Level 5 on the Malta Qualifications Framework in an area deemed relevant by the Faculty Board, together with an Advanced Level pass at Grade C or better in one of the following subjects **English, Graphical Communication, History, Information Technology, Marketing, Philosophy, Sociology**, or a subject (other than Art) deemed comparable by the Faculty Board, together with passes at SEC Level at Grade 5 or better in **English Language, Mathematics and Maltese**; or
- c) a transcript showing passes in 120 ECTS credits in respect of the first two years of study in a three-year MCAST Bachelor's degree course in an Art and Design related subject, together with passes at SEC Level at Grade 5 or better in **English Language, Mathematics and Maltese**.

All applicants shall be required to attend for an interview and present to an interviewing board a portfolio of their recent works. Applicants who are unsuccessful in the interview shall not be admitted to the Course.

- *4 If *either Communication Studies or European Studies* is chosen, an Intermediate level pass in **English.**
- *5 If *either European and Global History, or History* is chosen, an Advanced Level pass in **History.**
- *6 If **Music Studies** is chosen, applicants shall undertake an interview and an audition. Applicants with at least an Intermediate Level pass at Grade C or better in Music shall be exempted from both the interview and audition. The audition guidelines are available at: um.edu.mt/performingarts/music/auditionguidelines.
- *7 If **Fine Arts** is chosen, applicants are required to submit a portfolio which shall be assessed during an interview. A pass in the interview is mandatory.

Diploma in Journalism

The Diploma in Journalism is intended for students who plan to build a career in media research, journalism and/or broadcasting. It also provides a qualification for journalists who are already in the job. The programme provides students with an overview of research tools and communication skills that contribute toward effective communication expertise in the workplace. More specifically students follow, among others, courses in print, broadcast and online journalism; reporting; information law; writing proficiency; media ethics; and internet communications. Independent analytical work is carried out and presented in the form of a long essay. The Diploma provides graduates with a research and skill-based approach to journalistic work.

Doctor of Medicine and Surgery

The Doctor of Medicine and Surgery course is divided into two parts: the Pre-Clinical Part, of two years' duration, and the Clinical Part, of three years' duration. During the first two years, students gain early exposure to the clinical setting through practical sessions in dissection labs. Students are assigned to clinical attachments in various wards during the last three years to enable them to gain adequate clinical skills. One of the main aims of the course is to provide students with clinical exposure in a hospital environment.

ENTRY REQUIREMENTS

General Entry Requirements together with:

- two** Advanced Level passes at Grade B or better in **Biology** and **Chemistry**; *and*
- an Intermediate Level pass at Grade B or better in **any** subject taken in the Matriculation Examination except for the Environmental Science and Systems of Knowledge;

provided that all passes in these Special Course Requirements are obtained together in one session of examinations (i.e. one sitting) and are from recognised examining boards from the same country.

A pass obtained in a session of examinations which is held after the results of a previous session were published shall be deemed to be a pass obtained in a session that is distinct from the previous one. This also applies to the second session of the Matriculation Examination offered by the MATSEC Board of the University of Malta according to the provisions of the Matriculation Examination Regulations, 2013 and this notwithstanding any other regulation governing the award of the Matriculation Certificate.

Applicants in possession of **one** of the following degrees obtained from the University of Malta together with a SEC Level pass in **Maltese** at Grade 5 or better may also apply:

- a **Bachelor of Science** with a classification of Category II or better or a **Bachelor of Science (Honours)** with a classification of Second Class (Honours) or better, in both cases with Biology and Chemistry as principal

- areas, or a **Bachelor of Science (Honours)** with a classification of Second Class (Honours) or better in *either* Biology or in Chemistry or in Chemistry with Materials; or
- b) a **Bachelor of Science (Honours)** with a classification of Second Class (Honours) or better in one of the following: Applied Biomedical Science (or Medical Laboratory Science), Applied Food and Nutritional Sciences, Community Nursing, Community Midwifery, Communication Therapy, Health Science, Mental Health Nursing, Midwifery, Nursing, Occupational Therapy, Physiotherapy, Podiatry, and Radiography; or
 - c) a **Bachelor of Pharmacy (Honours)** with a classification of Second Class (Honours) or better; or
 - d) a **Bachelor of Science (Honours) in Pharmaceutical Science** with a classification of Second Class (Honours) or better; or
 - e) a **Bachelor of Dental Surgery** with a classification of Second Class (Honours) or better if awarded from July 2009 onwards; or
 - f) the degree of **Master of Dental Surgery**; or
 - g) a **Bachelor of Science (Honours) in Medical Biochemistry** with a classification of Second Class (Honours) or better; or
 - h) a **Master of Pharmacy** with a classification of Merit or better; or
 - i) a **Bachelor of Science (Honours) in Pharmaceutical Technology** with a classification of Second Class (Honours) or better; or
 - j) a **Bachelor of Science (Honours) in Pharmacology** with a classification of Second Class (Honours) or better awarded from July 2024 onwards.

During the first year of the Course, accepted applicants are also required to undergo an occupational health assessment, as detailed in the Occupational Health Protocol approved by the Faculty Board, so as to ascertain that they are fit for the duties related to their proposed studies. Students who do not fulfil this requirement may be barred from progressing with their studies. Failure to disclose information about a physical or mental health problem that could affect patient safety is considered to be a serious breach of the University Suitability to Practise Regulations.

All applicants are also required to be in possession of a pass in the Secondary Education Certificate in **Maltese** except that:

- a) Maltese applicants who, in terms of regulation 12(5) of the Admissions Regulations, 2016 are exempted from possessing a pass in the Secondary Education Certificate in Maltese are required to present the Medical Maltese Proficiency Certificate awarded by the University of Malta prior to the commencement of the Course; *and*
- b) non-Maltese applicants are required to present the Medical Maltese Proficiency Certificate awarded by the University of Malta, or a pass in the study-unit in Medical Maltese as part of the Certificate in Medical Foundation Studies, prior to the commencement of the Course,

provided that applicants presenting overseas qualifications and a pass in the Secondary Education Certificate examination in Maltese shall be exempted from presenting the Medical Maltese Proficiency Certificate.

The Secondary Education Certificate pass in Maltese, or the Medical Maltese Proficiency Certificate (if applicants are eligible for exemption from the SEC in Maltese), is required for admission to both Year 1 and Year 3 of the Course.

No late applications for this course will be accepted.

Bachelor of Science (Honours) in Medical Sciences

This is an intercalated degree aimed specifically at second year M.D. students who wish to spend an extra year focused on methodology of medical research. Following that year, students shall progress to the third year of the M.D. course, according to the course regulations.

ENTRY REQUIREMENTS

Applicants who successfully complete the first two years of the Doctor of Medicine and Surgery Course may opt to join Year 3 of the Bachelor of Science (Honours) in Medical Sciences.

Bachelor of Science (Honours) in Medical Biochemistry

The Bachelor of Science (Honours) in Medical Biochemistry course deals with the study of human biology at the molecular level, where biology meets chemistry. Medical Biochemistry is the interface between cellular biology, medicine and chemistry that results in disease and how this knowledge may be applied to the development of therapeutic agents and diagnostic technologies. This course focuses on the link between scientific knowledge, experimentation and application. The student will develop a strong foundation in processes that determine the functions of the cell and the human.

ENTRY REQUIREMENTS

General Entry Requirements together with:

- a) **two** Advanced Level passes at Grade C or better in **Biology** and **Chemistry**; *and*
- b) an Intermediate Level pass in **one** of the following subjects: **Computing**, **Physics** or **Pure Mathematics**.

Department of Pharmacy Courses

Bachelor of Science (Honours) in Pharmaceutical Science

The programme is aimed at developing the students' skills with regard to the production, supply and use of medicines within the local and EU legal framework; the application of chemistry and biological sciences' principles to the development, formulation and use of drugs; the safeguarding of patient safety and the promotion of rational use of medicines; and scientific report writing. Holders of this degree may then opt to read for the Master of Pharmacy course provided that other requirements are also satisfied.

ENTRY REQUIREMENTS

General Entry Requirements together with:

- a) **two** Advanced Level passes at Grade C or better in **Chemistry** and in one of the following subjects: **Biology, Computing, English, Philosophy, Physics; and**
- b) an Intermediate Level pass at Grade C or better in **Pure Mathematics**.

During the first year of the Course, accepted applicants are also required to undergo an occupational health assessment, as detailed in the Occupational Health Protocol approved by the Faculty Board, so as to ascertain that they are fit for the duties related to their proposed studies. Students who do not fulfil this requirement may be barred from progressing with their studies. Failure to disclose information about a physical or mental health problem that could affect patient safety is considered to be a serious breach of the University Suitability to Practise Regulations.

Whilst filling in the online application for this course applicants must have their Police Certificate of Conduct at hand as they are required to include certain details from the Police Certificate of Conduct in the application form.

On acceptance on the course, applicants will be asked to submit an original Police Certificate of Conduct (not more than 6 months old) to the Faculty of Medicine & Surgery.

Bachelor of Science (Honours) in Pharmaceutical Technology

The programme is intended to provide an understanding of the underlying scientific basis of current and future operations and processes involved in the development, manufacture and handling of medicines and medical devices and development of skills in distribution, dispensing and compounding of medicines, including extemporaneous preparations and intravenous admixtures. Graduates are prepared to pursue careers as scientists and researchers in the pharmaceutical industry and in pharmaceutical and healthcare organisations.

ENTRY REQUIREMENTS

General Entry Requirements together with an Advanced Level pass at Grade D or better in **Chemistry**.

Admission to this course is also open to applicants in possession of:

- i) the MCAST Diploma for Pharmacy Technicians, and an Advanced Level pass in **Chemistry**, and a pass at SEC Level at Grade 5 or better in **Maltese**, or
- ii) be registered as a pharmacy technician with the Pharmacy Council, and have 2 years of experience as a pharmacy technician in a pharmaceutical setting, and an Advanced Level pass at Grade D or better in **Chemistry**.

The Bachelor of Science (Honours) in Pharmaceutical Technology is ideal for individuals who are aiming to opt for a career within the pharmaceutical industry. The balanced mixture of theoretical and practical sessions furnishes students with the adequate skills and knowledge to work within various areas of the industry. Apart from opening doors to various career opportunities, one might also choose to further their studies, depending on their area of expertise.

Bachelor of Science (Honours) in Pharmacology

The programme equips students with a sound knowledge of both theoretical and practical aspects of pharmacology, which have been carefully pitched to address current developing and future scientific trends. These includes major areas such as, clinical and molecular pharmacology, pharmacokinetics, pharmacodynamics, pharmacogenomics, drug regulatory frameworks and digital therapeutics. Training will be provided in qualitative and quantitative research, together with hands-on experience in various laboratory techniques, such as cell culturing, drug assays, various types of DNA and RNA analysis, and computational drug design. Students will graduate with a set of transferable skills which are applicable to both the academic and industrial employment fields.

ENTRY REQUIREMENTS

General Entry Requirements together with:

- a) an Advanced Level pass at Grade C or better in **Biology** and
- b) passes at Intermediate Matriculation Level in **Chemistry** and in **one** of the following subjects: **Computing, Physics, Information Technology, Pure Mathematics** or **Applied Mathematics**.

Bachelor of Science (Honours)

Bachelor of Science (Honours) degree programmes can be either of three or four years' duration. Three-year single Honours programmes are offered in Biology, Chemistry, Chemistry with Materials and Computational Physics. The four-year joint Honours programmes allow students to choose from a number of subject area combinations with at least one from Biology, Chemistry, Geosciences, Mathematics, Physics, and Statistics & Operations Research. Other possible combination subject areas include Computing Science and Banking & Finance, in collaboration with the Faculty of Information and Communication Technology, and the Faculty of Economics, Management and Accountancy respectively as well as Philosophy in collaboration with the Faculty of Arts. All Bachelor of Science (Honours) programmes prepare students to internationally accepted high standards which can either lead to direct employment or to access postgraduate research programmes.

Banking and Finance

The Department of Banking and Finance offers an interesting and rewarding undergraduate major within the Faculty of Science. Students taking Statistics and Operations Research, Mathematics or Physics can take Banking and Finance as their second major with the Faculty of Science. The programme in Banking and Finance is improved yearly to make the study-units more relevant and interesting. This four-year programme provides students with an excellent background to proceed to the M.Sc. in Banking and Finance or the M.B.A. degree. Banking and Finance graduates within the Faculty of Science will also be able to start the C.F.A. (Chartered Financial Analyst) and/or the F.R.M. (Financial Risk Management) courses.

Biology

The Department of Biology aims to provide students with the best possible taught and research programmes in order to instil a sound theoretical and practical background to the subject, as well as provide them with the necessary skills. This will enable future graduates to contribute effectively to the world's changing needs and requirements within the biological sciences. Graduates in Biology successfully take up careers in industry, teaching, fisheries and aquaculture, environmental consultancy, and natural resource management, amongst others. The Department is currently undergoing rapid development and expansion.

Chemistry

Society needs chemists to meet everyday challenges. The Department of Chemistry produces graduates prepared for careers in academia, applied or industrial research, medicine and the health professions, and education, as well as in governmental organisations. Students are provided with a complete education of traditional and modern chemistry principles, including a laboratory experience within the curriculum and in close collaboration with academic advisors.

The Department offers single honours programmes in Chemistry and Chemistry with Materials and also joint degree programmes with other areas of science, namely Biology, Physics, Statistics & Operations Research and Mathematics. All programmes provide skills applicable to working in the chemical and allied industries and fulfil the requirements for postgraduate studies in chemistry and related fields.

The B.Sc. (Hons) Chemistry 3-year single honours degree provides students with an in-depth understanding of the facts and concepts pertaining to the practice of modern chemistry. The programme includes units in Biological Chemistry,

Microbiology, Pharmacology and Organic Synthesis that will give graduates sufficient knowledge required for flexibility in employment within the pharmaceutical, biochemical and biotechnological sectors.

Chemistry with Materials

A 3-year single honours degree producing chemistry graduates who also have knowledge of basic engineering concepts and materials science, intended to render graduates flexible enough to work in areas where knowledge of both chemistry and materials are essential.

Computational Physics

Apart from the understanding of physics concepts, the degree in Computational Physics covers foundation topics in mathematics and computing required to model processes both theoretically and numerically. The teaching methodology emphasises the interlinking between these three aspects through both theoretical and practical applications.

The range of skills acquired during the course includes analytical analysis, physical and mathematical modelling, computational modelling, quantitative and qualitative interpretation of data and problem solving. The degree provides a solid background for postgraduate studies while also incorporating hands-on experience which is highly valued by prospective employers, especially in computationally intensive industries, such as online gaming, insurance, finance, and technical design.

Computational Science

The Computing Science programme focuses on computer programming, providing students with the scientific and engineering skills for constructing, analysing and maintaining complex software systems. The programme also gives students the knowledge of novel programming techniques and approaches which are used to develop software for more complex architectures and technologies, including big data, cloud and mobile computing. Furthermore, the programme also covers topics such as Computer Graphics, Multimedia Content and Transmission and Real-time Computing – knowledge of which is becoming increasingly essential for those seeking to work on applications such as game development, robotics, mobile app development and social networking.

Geosciences

The Geosciences undergraduate programme provides a rigorous and holistic education in a wide spectrum of the earth sciences, combined with field, experimental and computational training, and hands-on experience with modern equipment and facilities. Study areas include geology and geophysics, marine geology and seafloor exploration, physical oceanography, atmospheric science and air quality, and climate science. There is an ever-increasing demand, in government and private institutions, for accurate and updated scientific data, information and analysis in the context of environmental/geoscientific monitoring, operational activities, geohazards, natural resources, decision-making and planning. Geosciences graduates will possess the skills and flexibility to meet these demands. The degree also provides an excellent platform for postgraduate studies and research in the geosciences.

Mathematics

Mathematics underlies the pursuit of every scientific endeavour and is an essential tool in facilitating scientific inquiry. The Department of Mathematics fully acknowledges this essential role of mathematics in science education and understands the ever-increasing need for sound mathematical skills by contributing to a number of joint Honours degrees and to courses offered by other faculties. Our undergraduate mathematics programme contains a range of compulsory study-units in the first two years, allowing easy specialisation in the third and fourth years to areas of expertise within the Department where a choice of streams is available. The fields of research are Graph Theory and Combinatorics, Functional Analysis, General and Set-Theoretic Topology, Mathematical Physics and Biomathematics. Postgraduate courses are also offered.

Philosophy

The study of philosophy is suitable for those interested in discussing the questions that challenge us as humans. Have you, for example, ever wondered if this life is the best life you will ever experience? How do you judge an action or a person as good or bad or a work of art as beautiful or awful? If you think about such questions, then philosophy is the subject for you. By studying philosophy you will learn to think about these issues in a rational way, arguing for the truth; and you will also learn how to communicate your ideas.

Physics

Physics aims to understand how the universe works on every scale. At the tiniest level, quantum mechanics portrays the counter-intuitive behaviour of particles, whereas Einstein's theory of relativity describes the universe on the largest scales. Physics is also an applied science, with myriad technological applications. There is a growing demand for physicists in almost any field of science and technology, finance, gaming, insurance, economy, health, education, business, and technology. A subject combination that includes physics as a major component provides students with many interesting and challenging career options. This is also the key to furthering studies at M.Sc. and Ph.D. levels, locally and abroad. The study of physics promotes the acquisition of a range of transferable skills, most importantly, a refined problem solving aptitude.

Statistics & Operations Research

The need for statisticians continues to increase as the demand for statistical analysis and predictive modelling augments. One of the aims of this degree in Statistics and Operations Research is to prepare students for a career as professional statisticians who can cope with statistical challenges encountered in jobs that require statistical skills. With a degree in Statistics and Operations Research one would enhance job prospects in almost any field, including science, finance, gaming, insurance, economy, health, education, market research, business and technology. This degree provides good preparation for students who wish to pursue their studies at M.Sc. or Ph.D. levels.

AREAS OF STUDY

Applicants are required to choose either one area of study from the following: (Duration: 3 years Full-time)

- Biology
- Chemistry
- Chemistry with Materials
- Computational Physics
- Physics

OR two areas of study in one of the following combinations: (Duration: 4 years Full-time)

- Banking & Finance *and* Mathematics
- Banking & Finance *and* Physics
- Banking & Finance *and* Statistics & Operations Research
- Biology *and* Chemistry
- Biology *and* Mathematics
- Biology *and* Physics
- Biology *and* Statistics & Operations Research
- Chemistry *and* Mathematics
- Chemistry *and* Physics
- Chemistry *and* Statistics & Operations Research
- Geosciences *and* Mathematics
- Geosciences *and* Physics
- Geosciences *and* Statistics & Operations Research
- Mathematics *and* Computing Science
- Mathematics *and* Philosophy
- Mathematics *and* Physics
- Mathematics *and* Statistics & Operations Research

Bachelor of Science (Honours) in Physics, Medical Physics and Radiation Protection

(under the auspices of the Faculty of Health Sciences and the Faculty of Science)

This programme is for those students who would like to read for a degree in both Physics and its most attractive applications in society at present – Medical Physics and Radiation Protection. It opens the door to careers in all areas of Physics, as hospital Medical Physicist (Medical Physicist is a warranted health care profession and Medical Physicists at Expert level are a legal requirement of EU Directive 2013/59/EURATOM) and Radiation Protection Expert (also a legal requirement of EU Directive 2013/59/EURATOM) as well as medical research, medical device industry, university career, medical device sales, physics education and others. Students will study with others from both the Faculty of Science and the Faculty of Health Sciences to ensure that they are capable of bridging the gap between pure physics and its applications in healthcare. The course is future looking and very multidisciplinary and includes not only physics, mathematics, medical physics and radiation protection but also essential anatomy, physiology, ICT, ethics, management and legal issues.

ENTRY REQUIREMENTS

General Entry Requirements together with:

either

- an Advanced Level pass at Grade C or better in **Physics** and an Intermediate Level pass at Grade C or better in **Pure Mathematics**;

or

- an Advanced Level pass at Grade C or better in **Pure Mathematics** and an Intermediate Level pass at Grade C or better in **Physics**.

Bachelor of Arts (Honours) in Criminology

* Eligible for tax rebates under the Get Qualified Scheme

Criminology is multidisciplinary. It answers crime-related questions with the help of knowledge brought in from various fields. Consequently, the Criminology degree covers areas such as Policing; Corrections; Intergenerational Transmission of Crime; Forensics; Terrorism; Geo-spatial Analysis of Crime; Psychology, Psychiatry and Biology of Crime; Cybercrime; Criminal Investigations; Crime and Criminal Profiling; Domestic Violence; Hate Crimes and other crime-related areas of study. It has a solid grounding in Research Methods as well. Criminologists do not only answer the questions of who infringes the criminal laws and why, but also come up with solutions to reduce crime, help victims and rehabilitate offenders.

Bachelor of Arts

AREAS OF STUDY

- Disability Studies and European Studies
- Disability Studies and Gender & Sexualities
- Disability Studies and Psychology
- Gender & Sexualities and European Studies
- Gender & Sexualities and Psychology

Disability Studies

The programme of studies offers a diversity of topics related to disability, from empowerment, to rights, to policies to art and cultural representation. It has been devised with the aim of exposing you as future professionals to the challenges that disabled people face in all walks of life. This is done from both a theoretical and experiential perspective through the involvement of disabled people in the delivery of the lectures. If you have an interest in disability issues and want to engage with and learn more about this field, then this course will help you to achieve those goals.

European Studies

European Studies is a multidisciplinary subject area involving the politics, economics, history and law of European integration and the EU in particular. Students acquire knowledge and competence in, amongst others, the functioning of the EU institutions, EU treaties and laws, the economics of European Integration, small states and the EU, Euro-Mediterranean relations, EU social policy, climate change and EU environmental policy, the EU's external relations and the Common Foreign and Security Policy. Graduates of the Institute work with the EU institutions, in the Maltese public service, in business, the media, consultancy, NGOs. Students often also continue their studies with the Masters in European Politics, Economics and Law offered by the Institute.

Gender and Sexualities

This programme of studies stems from the need to offer students the possibility to engage in studies related to gender and sexualities at undergraduate level. The programme of studies offers a range of topics related to gender, sexualities and diversity, from rights, to policies, to art and cultural representation. It has been devised with the aim of exposing students and future professionals to the realities faced by a large proportion of our population. This is done from both a theoretical and an experiential perspective through the additional involvement of people working in the sector as well as members of different minority communities in the delivery of the lectures.

Psychology

Choosing psychology as an area of study means that this subject is of interest to you. Psychology is a broad discipline and can offer something to everyone. Throughout their studies, students who are undertaking degrees with Psychology as an area of study are encouraged and supported in learning about the diverse areas in this discipline. Students attend core study-units that include developmental psychology, social psychology and psychopathology, amongst others. Furthermore, students can choose elective study-units that appeal to their personal curiosity, including work psychology, the psychology of communication and learning disabilities, to name but a few.

ENTRY REQUIREMENTS

General Entry Requirements together with any Special Course Requirements outlined below:

If **European Studies** is chosen, an Intermediate Level pass in **English**

If either **Disability Studies** or **Gender and Sexualities** or **Psychology** are chosen, no Special Course Requirements are applicable.

Bachelor of Arts (Honours) in Social Policy / Social Work

This Honours programme leads to a degree in either Social Policy or Social Work. The first year of the course, however, is common to both degrees. Students who go on to read for a Bachelor of Arts (Honours) in Social Work in the second part of the course will become equipped with the necessary social work knowledge, values and skills required to practice as social workers. On the other hand, students who proceed to the Bachelor of Arts (Honours) in Social Policy will learn about the organisation, management and provision of welfare services and social policy and how these can be administered in public and private sectors, as well as in non-governmental organisations.

ENTRY REQUIREMENTS

General Entry Requirements

Applicants in possession of the **Diploma in Social Work** of the University of Malta, or a comparable qualification in an area related to Social Work or Social Policy or who have obtained credits for study-units considered by the Faculty Board to be equivalent to those in the Course may also be admitted to the Course. Subject to certain conditions, such applicants may be allowed by the Faculty Board to transfer these credits to the Course. The number of credits so transferred shall not exceed those obtainable in one year of the Course.

Information for applicants in terms of the 'maturity (adult learners) clause' will be available at: um.edu.mt/socialwellbeing

Whilst filling in the online application for this course, applicants must have their Police Certificate of Conduct at hand as they are required to include certain details from the Police Certificate of Conduct in the application form.

Higher Diploma in Gerontology and Geriatrics

The Higher Diploma in Gerontology and Geriatrics represents an essential response to the increasing number of older persons currently being registered all over the world, including Malta. The Higher Diploma targets students who are seeking to expand their knowledge of gerontology and geriatrics settings through a recognised university programme. It provides a broadly-based, multidisciplinary perspective on ageing, later life, and older persons, whilst also disseminating knowledge and skills related to clinical and practical interventions with older persons. The Higher Diploma exposes the students to the practical application of gerontological and geriatric research findings.

Certificate in Safeguarding of Children and Young People

(Offered under the auspices of the Faculty of Theology and the Faculty for Social Wellbeing)

Eligible for tax rebates under the Get Qualified Scheme

The Certificate in Safeguarding is a one-year course aimed at introducing participants to the standards and main areas of concern regarding safeguarding of minors. It equips participants with the basic knowledge and skills to promote the welfare of minors, recognise and respond effectively to abuse, and understand the depth of traumas caused by abuse. It presents students with key principles of self-care and fundamental ethical and legal obligations for working with minors. The Certificate is an inter-faculty programme of the Faculty of Theology and the Faculty for Social Wellbeing, offered in collaboration with the Department of Civil Law and the Safeguarding Commission.

Bachelor of Arts (Honours) in Theology / Bachelor of Arts (Honours) in Theology with a subsidiary area

* Eligible for tax rebates under the Get Qualified Scheme

The programme for this course introduces the student to a comprehensive study of the biblical sources of Christianity as well as its history, and its doctrinal, ethical and pastoral aspects, including its relations to economics, politics, culture and biotechnology. It is recommended to students wishing to have a good grounding for the teaching of religion at secondary school level or to exercise certain forms of pastoral ministry and community work; students who wish to prepare for further specialised training in Theology; and students who want to relate faith to their own work, professional or social responsibilities. Full-time applicants may choose either Theology as the Single Honours main area of study or Theology as the Honours main area of study with one of the following subsidiary areas: Philosophy, or Physics. Part-time applicants are required to choose Theology as the Single Honours main area of study.

ENTRY REQUIREMENTS

General Entry Requirements together with any Special Course Requirements outlined below:

- **Mathematics:** an Advanced Level pass at Grade C or better in **Pure Mathematics**
- **Philosophy:** no Special Course Requirements.
- If **Physics** is chosen, *either* an Advanced Level pass at Grade C or better in **Pure Mathematics** *and* an Intermediate Level pass at Grade C or better in **Physics** **OR** an Advanced Level pass at Grade C or better in **Physics** *and* an Intermediate Level pass at Grade C or better in **Pure Mathematics**.

The B.A. (Hons) in Theology with Theology as a single honours main area of study is also offered at the University of Malta - Gozo Campus spread over 5 years of part-time study during the evening.

Bachelor of Arts in Theology and Human Studies

AREAS OF STUDY

Applicants are required to choose only one subject as their second area from the list below:

- Anthropology*
- Archaeology*
- Communication Studies*²
- English*¹
- European and Global History*³
- French*¹
- German*¹
- History*³
- History of Art*
- Italian*¹
- Linguistics*
- Middle Eastern and Asian Languages and Cultures (Arabic)*
- Middle Eastern and Asian Languages and Cultures (Hebrew)*
- Middle Eastern and Asian Languages and Cultures (Near Eastern Studies)*
- Music Studies*⁵
- Philosophy*
- Psychology*
- Social Studies*
- Sociology*⁴
- Spanish and Latin American Studies*¹

The Bachelor of Arts in Theology and Human Studies programme meets a variety of educational needs through the combination of Theology with a number of areas of humanistic studies. It provides a good base for students wishing to qualify as teachers of Religion at secondary school level (after pursuing studies in a teacher training course). It is also recommended for students who would like to prepare for church or community related work, including work in religious tourism, through the combination of Theology with Sociology, Psychology, Communication Studies, Philosophy, History or a language subject.

ENTRY REQUIREMENTS

Bachelor of Science (Honours) in Air Transport

This part-time course is offered jointly with Embry-Riddle Aeronautical University and leads to the award of a dual degree from the two institutions.

If you are a professional pilot licensed to fly turbine powered aircraft, seeking to develop or strengthening your career path through formal university education and qualification, then the Bachelor of Science (Honours) in Air Transport will help you to achieve that goal. This part-time course is offered jointly with Embry-Riddle Aeronautical University and is part of a dual degree programme that will award you with a Bachelor of Science degree in Aeronautics. You will be enrolled with both Embry-Riddle Aeronautical University - Worldwide and the University of Malta and will graduate from both universities with the two awards. The programme structure and delivery is specifically tailored for the combined needs of the professional pilot and airline industry, allowing you to continue working as a professional pilot whilst studying at your own pace and to immediately apply the learning outcomes at your place of work to the benefit of your organisation.

ENTRY REQUIREMENTS

General Entry Requirements together with an Advanced Level pass in **Physics** or a comparable qualification.

The Board of the Institute may require adult learners (mature applicants) to follow and pass a number of additional study-units to make up for the missing requirements. Such study-units will be offered to applicants against a fee.

The Course shall be open to professional air transport pilots who are licensed to fly turbine powered aircraft.

Information for applicants in terms of the maturity (adult learners') clause is available at: um.edu.mt/I/72h0K

Pre-Tertiary Institute Certificate in Baroque Architecture

The Pre-tertiary Institute Certificate course in Baroque Architecture is intended to provide a broad but thorough grounding of Baroque architecture by reconciling the theoretical aspects with practical site work, allowing participants to pursue their own specialisation or field of interest in greater depth through project work and hands-on experience. It is designed to help participants develop a clear picture of how different materials within a building interact, how Baroque buildings are constructed and the mechanisms of most building elements. The course also helps participants assimilate the theoretical aspects and develop manual skills to carry out conservation works on existing buildings.

ENTRY REQUIREMENTS

Applicants should be in possession of technical background and/or experience relevant to the area *and* are required to pass an admissions test set by the Board of the Institute.

Pre-Tertiary Certificate in the Baroque Culture of the Maltese Islands

The course takes a multi-disciplinary approach to the study of the Baroque culture of the Maltese Islands and is designed to satisfy the knowledge requirements of individuals concerned with disseminating this knowledge responsibly to third parties. The course is intended to improve the student's general knowledge of the historical context and traditions of Baroque culture. It equips the student with the skills necessary to observe, identify and analyse works of visual culture as well as with the critical tools required to understand the culture of preservation and conservation. The course is primarily intended for individuals with a technical background and/ or working experience in the cultural heritage field and who are actively involved with the protection and promotion of the Baroque cultural heritage. It is also intended for students who aspire for a rewarding career in the management of historical sites.

ENTRY REQUIREMENTS

Applicants should be in possession of technical background and/or experience relevant to the area *and* are required to pass an admissions test set by the Board of the Institute.

Diploma in Baroque Architecture

The Diploma in Baroque Architecture promotes awareness of Baroque architecture, provides a grounding of Baroque European heritage in all its major dimensions and presents insights into the conservation of Baroque architecture. The course is designed to guide students into various aspects of the Baroque age and to encourage students to develop skills to understand Baroque architecture. This helps students develop a greater sensitivity for the Baroque built environment and to develop manual skills to carry out sensitive interventions on existing Baroque buildings. Training is provided both through formal lectures and on-site discussions.

Bachelor of Science (Honours) in Earth Systems

This degree programme considers the various components that make up the Earth system - the lithosphere, hydrosphere, atmosphere, biosphere and cryosphere - and the various interactions between these within the broad context of environmental, social, economic and cultural sustainability. It thus promotes an integrated and holistic approach to the study of our planet. The programme of study employs a variety of teaching methods, including lectures, laboratory and field-based practical sessions, residential field trips (both locally and overseas), seminars and supervised independent research. The focus is on developing an interdisciplinary and practice-oriented outlook, and graduates will thus be ideally placed to join professional ranks in addressing the management and planning of activities at the human-nature interface. Graduates can also expect a wealth of opportunities for postgraduate study, either with the University of Malta or at universities abroad.

Preparatory Course for Diploma in Agriculture

This preparatory course is specifically designed for students who intend to follow the Institute's Diploma in Agriculture. The programme of study focuses on agricultural biology and chemistry, and serves as an introduction to the rural sciences. Students are introduced to the concept of agriculture as a science requiring specialised personnel who are expected to balance the needs of agricultural activity, the problems of disposing of waste generated by such activities and the protection of the environment. Successful completion of the programme provides students with a basic understanding of the science behind rural activities.

ENTRY REQUIREMENTS

- a) **six** passes at the Secondary Education Certificate Level at Grade 5 or better, including **English Language, Maltese, Mathematics** and a **Science subject**; or
- b) a diploma obtained from the College of Agriculture of the Department of Education with a Grade of Merit or better, or a similar qualification which, in the opinion of the Board of the Institute, is equivalent to this qualification.

Diploma in Gozo Studies

Eligible for tax rebates under the Get Qualified Scheme

This part-time diploma course covers a variety of topics related to Gozo, including economic development, doing business in Gozo, visual arts and music in Gozo, the physical environment, history, governance, culture and dialects. On completion of this diploma course, students would acquire a sound knowledge of past and present realities related to Gozo and to understand the special constraints and opportunities faced by this small island. Students would be able to link theoretical analysis to real world situations associated with the various disciplines involved in the course. Graduates will find such skills useful for career improvement and for personal development.

Bachelor of Arts (Honours)

Tourism Studies

The main objectives of the Tourism Studies programme are to provide a comprehensive background to the local and international dimensions of the tourism industry and to equip students with skills to critically analyse the tourism industry and its impacts on society, the environment and the economy. It is an inter-disciplinary programme, covering a wide range of subjects. Students will also be expected to carry out two supervised industry placements, where they will gain valuable work-place insights and skills. In Year 2, students are encouraged to apply for student exchange programmes for one or two semesters at one of the universities which have links with the Institute for Tourism, Travel and Culture.

The Institute works closely with local tourism stakeholders, such as government entities and ministries, hotels, restaurants, heritage agencies, and is an active member of several European and international networks. These links ensure that programmes of study offered by the Institute are relevant and useful for anyone who wishes to develop an interest or a career in the tourism sector.

ENTRY REQUIREMENTS

General Entry Requirements

Applicants who are in possession of a qualification comprising not less than 60 ECTS credits classified at MQF Level 5 on the Malta Qualifications Framework, in an area of study related to Hospitality Management or Tourism Studies, may be admitted to Year 2 of the Course.

Master Chef Diploma

Eligible for tax rebates under the Get Qualified Scheme

The Master Chef Diploma programme offers core modules of specially designed topics to all participants based on the required knowledge of the international culinary current issues which do not include cooking. The programme will equip the students with the tools required to be able to research, develop and communicate culinary innovations. It is also the objective of the programme that the students will become mentors to their staff in achieving higher standards and quality in the food service industry. They will also be able to move up the ranks in the kitchen brigade ladder.

Bachelor in Occupational Health and Safety (Honours)

Due to legal obligations, as well as for financial and moral reasons, occupational health and safety is a highly relevant topic for organisations. As this area of specialisation continues to develop, the need for qualified and skilled professionals in this area continues to increase. The programme of studies adopts an inter-disciplinary approach, including perspectives from occupational safety; health and safety law; occupational health; psychology; management; ergonomics; sociology; toxicology; environmental health; health promotion; statistics and research. The curriculum provides students with the necessary knowledge and skills to work in the capacity of an occupational health and safety professional.

ENTRY REQUIREMENTS

General Entry Requirements

Applicants in possession of the **Diploma in Social Studies (Occupational Health and Safety)** of the University of Malta with an average mark of 60% or over, or a comparable qualification in an area related to Occupational Health and Safety, or who have obtained ECTS credits for study-units considered by the Board of Studies to be equivalent to those in the programme of study, may also be admitted to the Course. Such applicants may be allowed by the Board of Studies to transfer these credits to the Course. The number of credits so transferred shall not exceed 60 ECTS credits.

Through the aid of hands-on, professional and seasoned tutors, as well as a comprehensive and informative course, I was able to broaden my knowledge of Health and Safety, and its various applications across multiple fields and workplaces. The Bachelor in Occupational Health and Safety (Honours) course has changed the way I approach risks and hazards, and has also honed my ability to tackle daily challenges in the workplace in a professional manner.

Bachelor in Work and Human Resources (Honours)

(offered under the auspices of the Centre for Labour Studies in collaboration with the Faculty of Economics, Management & Accountancy)

As organisations strive to adapt to the ever increasing challenges of globalisation, the need for skilled and qualified human resources professionals increases. This programme of study aims to fill a gap in this much needed area of specialisation. Students are provided with sound underpinning knowledge and the necessary skills to work professionally in settings related to human resources. The programme of studies covers the following six major themes: Work, Labour Market and Society; Organisational Behaviour and Development; Industrial and Employee Relations; Work Design and Occupational Health and Safety; Personal and Occupational Skills Development; and Research.

ENTRY REQUIREMENTS

General Entry Requirements

Applicants in possession of the **Diploma in Social Studies (Industrial Relations)**, the **Diploma in Gender, Work and Society**, or the **Diploma in Social Studies (Gender and Development)** of the University of Malta with an average mark of 60%, or a comparable qualification in an area related to Industrial Relations or Labour Studies or Gender Studies who have obtained credits for study-units considered by the Board of Studies to be equivalent to those in the programme of study, may also be admitted to the Course. Such applicants may be allowed by the Board of Studies to transfer these credits to the Course. The number of credits so transferred shall not exceed 60 ECTS credits.

Applicants in possession of the Diploma in Social Studies (Gender and Development) are required to obtain up to 16 ECTS credits as directed by the Board of the Centre prior to acceptance on the Course.

Bachelor in Dance Studies (Honours)

The Bachelor in Dance Studies (Honours) course is designed to develop graduates with skills and understanding in Dance Techniques, Choreography, Dance Performance Theory, Pedagogy and Technology, and to cultivate a community of dance artist practitioners and dance scholars in Malta who wish to pursue careers in dance-related fields such as performance, education, community, and management. The programme provides an integrated learning experience which rediscovers and develops the intimate links between theory and practice. This is achieved through intensive practical classes and workshops, lectures and seminars which are interspersed with student-led and independent work and study supported by regular tutorials.

ENTRY REQUIREMENTS

General Entry Requirements

Applicants shall be interviewed and/or auditioned and are also required to submit a completed medical fitness form, and a 250-word essay on dance performance or a dance book. Applicants unable to attend the interview and dance audition in person may arrange to complete the process through electronic means of communication.

Bachelor of Music (Honours)

The Bachelor of Music (Honours) is intended for students wishing to pursue a professional music career. The first year of study provides students with the foundation musical knowledge and skills for more advanced work later in the course. In their second and final years, students follow pathways in either performance, composition or musicology and ethnomusicology. The programme also includes a placement that should help students experience work in the cultural sector, particularly in the music business. During this programme, students will develop a wide range of transferable skills, including communication, interpersonal skills, creative thinking, teamwork, leadership, planning, time-management and problem-solving.

ENTRY REQUIREMENTS

General Entry Requirements

Applicants shall undertake an interview and an audition, provided that applicants with an Advanced Level pass at Grade C or better in Music shall be exempted from both the interview and the audition.

Information about the interview and audition will be available at:

um.edu.mt/performingarts/music/students

Applicants in possession of the Diploma in Wind Band Studies of this University, who have obtained ECTS credits for study-units considered by the Board of Studies to be equivalent to those in the programme of study, may also be admitted to the Course. Subject to the provisions of the Principal Regulations, such applicants may be allowed by the Board of Studies to transfer these credits to the Course. The number of credits so transferred shall not exceed 60 ECTS credits.

Bachelor in Performing Arts (Honours)

The Bachelor in Performing Arts (Honours) is aimed at students interested in pursuing a combined degree in the Performing Arts with an emphasis on an interdisciplinary approach. The course allows students to take study-units from three different performance disciplines - Dance Studies, Music Studies, and Theatre Studies - and follow a programme of study according to their aspirations. Students will be required to register for 60 ECTS credits every year, which will be divided approximately equally among the three areas of study. Students will also write a dissertation in combined performing arts involving at least two, or all three named disciplines.

Bachelor in Theatre (Honours)

The Bachelor in Theatre (Honours) programme provides students with a wide perspective on the practices, histories, and theories related to theatre and performance. The first year of study equips students with foundational knowledge and skills for more in-depth study later in the course including practical units in performance (training and festival), in staging skills (for example lighting, sound, and stage design) as well as historical perspectives. The second and third years of the course focus on more specialised subjects including devising and composition processes, performance criticism, applied/ community performance, focused aspects of theatre history and theory as well as arts and cultural management.

Certificate in Foundation Studies

AREAS OF STUDY

- Business Studies
- Business Studies (Tourism)
- Engineering and ICT
- Health Sciences (Applied Food and Nutritional Sciences) *max. 2 students*
- Health Sciences (Nursing) *max. 5 students*
- Health Sciences (Occupational Therapy) – *maximum intake applies*
- Health Sciences (Podiatry) – *maximum intake applies*
- Humanities
- Medical and Dental Sciences – *maximum intake applies*
- Science (Chemistry)
- Science (Physics)

This course is designed to help applicants who have not followed the Maltese educational system attain the necessary qualifications for entry to undergraduate courses at the University of Malta. Students will follow one of the following tracks: Business Studies; Humanities; Science; Engineering and ICT; Medical and Dental Sciences; or Health Sciences. The programmes of study consist of two main components: the English Language Core and the Special Course Requirements study-units, the latter directly related to the undergraduate course that students intend to apply for after successful completion of the Foundation Studies Course. Successful completion of the Foundation Studies Programme guarantees progression to the chosen undergraduate degree course. Restrictions may apply in certain areas including Dentistry and Health Sciences.

ENTRY REQUIREMENTS

The Course is open to applicants who:

- a) present a secondary and/or high school certificate issued abroad and who studied within an educational system that is not comparable to the Maltese educational system (in terms of curriculum, years of study, etc.); *and*

- b) are in possession of one of the following qualifications in English at the required level:
 - i. a Secure English Language Test (SELT) Certificate (details available at: um.edu.mt/englangreq); *or*
 - ii. any other equivalent qualification approved by the Admissions Board; *and*
- c) are in possession of qualifications allowing access to an undergraduate course in the selected discipline in the country where such qualifications originate; *but*
- d) are deemed to require further study to be admitted to undergraduate degree courses at the University of Malta.

At the discretion of the School Board applicants shall be required to pass a qualifying interview and / or a written test.

EU, non-EU and Maltese dual citizens who previously studied abroad and then joined higher secondary schools in Malta for more than one year shall not be admitted to the course.

At the discretion of the School Board, applicants who are deemed ineligible to join the Course, may be allowed to register for the Foundation Commencement Programme, prior to their acceptance as regular students on the Course.

Programme of the Liberal Arts and Sciences

The University's Programme in the Liberal Arts and Sciences (PLAS) offers an excellent and flexible opportunity for personal and professional development. It is targeted mainly, although not exclusively, at adult and returning learners who wish to study subjects in the Arts, Humanities, Social Sciences and Natural Sciences. Taught by some of the leading scholars in their respective fields, these include areas as diverse as the Maltese History, Archaeology, Dante's Divine Comedy, Herbal Science, Psychology, Sociology, the Maltese Legal System, the History of the Universe, Blockchain, Health and Lifestyle, Honey, Wine and Cheese Making, History of Art and more.

PLAS also includes a series of practical technology-oriented units focusing on current and emerging software technologies and tools, such as Smart Contract Programming, Modern Java, Data Science, Enterprise Architecture, Reactive Microservices. These Units serve as a practical supplement to the concept-oriented academic degree programmes, and are aimed at ICT companies seeking training opportunities for their employees, professionals or members of the public interested in such technologies.

The diversity and breadth of this programme enriches students with transferable analytic, creative and critical-thinking skills enabling them to approach the complexity of academic, cultural, scientific, and socio-political issues,

with the purposes of broadening one's knowledge for its own sake, improving one's qualifications, giving oneself better prospects in the job market, and benefiting from the opportunity to study at University. This cross-disciplinary programme offers maximum flexibility by allowing students to apply for any and as many Units as they wish from the broad range of 'standalone' PLAS Units on offer. All Units are open to any person who has the ability to follow such Units with profit and in most cases there are no specific entry requirements. Applications for Units on offer are received every semester. Most lectures and seminars are held between 18:00 and 20:00.

Another innovative aspect of PLAS is that while students apply to follow individual Units rather than a complete programme of studies, they may use accumulated Units to achieve a Certificate, a Diploma, a Higher Diploma and eventually a Bachelor's Degree in Liberal Studies, without any limits of time. This flexible route is ideal for those whose current commitments may prevent them from following traditional full-time or part-time courses.

Matriculation Examination

The Matriculation Examination is held at two levels: Advanced (AM) Level and Intermediate (IM) Level. The Examination is offered in a wide range of subjects as follows:

Group 1: Maltese, Arabic, English, French, German, Greek, Italian, Latin, Russian, Spanish;

Group 2: Accounting, Classical Studies*, Economics, Geography, History, Marketing, Philosophy, Psychology*, Religious Knowledge, Sociology;

Group 3: Applied Mathematics (Mechanics), Biology, Chemistry, Environmental Science*, Physics, Pure Mathematics;

Group 4: Art, Computing, Engineering Drawing†, Engineering Drawing and Graphical Communication*, Graphical Communication†, Home Economics and Human Ecology, Information Technology, Music, Physical Education*, Theatre and Performance;

Systems of Knowledge*

*offered at Intermediate level only | † offered at Advanced level only

Choice of Subjects

Candidates are required to choose:

- one subject chosen from each of Groups 1, 2, and 3
- two other subjects chosen from Groups 1, 2, 3, and 4
- Systems of Knowledge.

Two of the six subjects must be at Advanced Level, three other subjects at Intermediate Level and Systems of Knowledge.

Any subject may be chosen but the following restrictions apply for the award of the Matriculation Certificate:

- No subject may be presented at both Advanced and Intermediate Levels;
- Not more than two of Accounting, Economics, and Marketing may be presented;
- Classical Studies may not be presented with Latin or Greek;
- Environmental Science may not be presented with IM and AM Biology, Chemistry, or Physics;
- Computing may not be presented with Information Technology;
- Engineering Drawing may not be presented with Graphical Communication; and
- No subject may be taken at both Advanced and Intermediate Levels and in the Secondary Education Certificate (SEC) Levels in the same session of examinations.

Examination Sessions

There are two Examination Sessions: the First Session is held during the period April to June and the Second Session is held in September of each year.

First Session

Candidates may sit for as many subjects of the Matriculation Examination at Intermediate and Advanced Levels as they wish.

Second Session

Candidates may sit for a maximum of six subjects as follows:

- › Any one subject at Advanced level; and
- › Any one subject from Group 1 at Intermediate level; and
- › Any one subject from Group 2 at Intermediate level; and
- › Any one subject from Group 3 at Intermediate level; and
- › Any one subject from Group 4 at Intermediate level; and
- › Systems of Knowledge.

Candidates may sit for examinations at the Second Session irrespective of whether they registered for the First Session or not.

Award of the Matriculation Certificate

To qualify for the Certificate, candidates must pass the examinations taken within a period of five years from the first sitting of any examination offered within the Examination. The Certificate shall be awarded to candidates who sit for one subject chosen from each of Groups 1, 2, 3 and Systems of Knowledge and two other subjects chosen from Groups 1, 2, 3 and 4; and two of the six subjects must be at Advanced Level, three other subjects at Intermediate Level and Systems of Knowledge; and obtain a pass in at least one of the subjects offered from each of Groups 1, 2 and 3, and a pass in Systems of Knowledge; and a minimum of 44 grade points obtained as a total from the results awarded in six subjects.

Candidates who sit for three or more subjects at Advanced Level shall be entitled to have one or more of the results of these subjects considered as substitutes for one or more of the Intermediate Level subjects as outlined under 'Choice of Subjects'. In such cases, the subject or subjects that are substituted shall be considered as Intermediate Level passes, grade for grade, for the purpose of calculating the number of grade points. Candidates shall be required to inform the MATSEC Board in writing which subject/s they wish to be substituted.

Candidates who satisfy all the criteria shall be awarded the Matriculation Certificate on the basis of the best results obtained. The Matriculation Certificate shall be issued once only and it shall indicate that the candidate has satisfied the criteria for the award.

Further information may be obtained from: um.edu.mat/matsec | [+356 2340 2815/2241](tel:+356234028152241)

The information contained herein is intended for guidance purposes only and is a reflection of the Matriculation Examination Regulations and approved administrative practices currently in force. However, for the purposes of interpretation of this information, said Regulations shall prevail.

Updates to Special Course Requirements

Bachelor of Arts (Honours) in Early Childhood Education and Care (refer to page 75)

General Entry Requirements together with an Advanced Level pass at Grade C or better in any subject.

Admission to this course is also open to applicants in possession of:

- a) the MCAST Advanced Diploma in Children's Care, Learning and Development or any other comparable and equivalent recognized qualification; *and*
- b) an Advanced Level pass at Grade C or better in any one of the following subjects: **Art, Biology, Chemistry, Computing, English, French, Geography, German, History, Home Economics and Human Ecology, Information Technology, Italian, Maltese, Mathematics (Applied or Pure), Music, Philosophy, Physics, Religious Knowledge, Sociology and Spanish**; *and*
- c) passes at SEC level at Grade 5 or better in **English Language, Maltese and Mathematics**.

Students who on admission into the Course are not in possession of passes in **English** and **Maltese** at Intermediate or Advanced Matriculation Level at Grade C or higher, or qualifications deemed to be equivalent by the Faculty Board, shall be required to follow and successfully pass from proficiency course/s approved by the Faculty Board in Maltese and/or English (as applicable) before the end of the fifth semester of the Course. Students who do not satisfy these requirements by this period shall be required to interrupt their studies for up to a maximum of twelve months during which time they are expected to obtain these requirements. Students shall only be eligible to proceed with their studies if they comply with these requirements.

Bachelor of Arts (Honours) in Early Childhood Education and Care (Top-up degree) (refer to page 77)

- a) The MCAST Higher Diploma in Advanced Studies in Early Years; or any other comparable and equivalent recognised qualification; *and*
- b) passes at SEC level at Grade 5 or better in **English Language, Maltese and Mathematics**; *and*
- c) passes in proficiency tests in English and Maltese, approved by the Faculty. Applicants shall be exempted from sitting for the proficiency tests in English and Maltese if they are in possession of passes at Intermediate or Advanced Matriculation Level at Grade C or higher in each of the two subjects.

Bachelor of Fine Arts (Honours) in Digital Arts (refer to page 134)

General Entry Requirements together with an Advanced Level pass at Grade C or better in **Art**.

Admission to this course is also open to applicants in possession of:

- a) the **Diploma in Design Foundation Studies** from the University of Malta; or
- b) a qualification comprising not less than 60 ECTS credits (or equivalent), pegged at Level 5 on the Malta Qualifications Framework in an area deemed relevant by the Faculty Board, together with an Advanced Level pass at Grade C or better in one of the following subjects **English, Graphical Communication, History, Information Technology, Marketing, Philosophy, Sociology**, or a subject (other than Art) deemed comparable by the Faculty Board, together with passes at SEC Level at Grade 5 or better in **English Language, Mathematics and Maltese**; or
- c) a transcript showing passes in 120 ECTS credits in respect of the first two years of study in a three-year MCAST Bachelor's degree course in an Art and Design related subject, together with passes at SEC Level at Grade 5 or better in **English Language, Mathematics and Maltese**.

All applicants shall be required to attend for an interview and present to an interviewing board a portfolio of their recent works. Applicants who are unsuccessful in the interview shall not be admitted to the Course.

New Courses in Preparation

Faculty of Education

Diploma in Education for Cultural Mediation

Faculty of Theology

Diploma in Archival and Cultural Appreciation of Ecclesiastical Patrimony

Centre for Environmental Education & Research

Certificate in Environmental Interpretation and Education

Notes

- Unless otherwise specified, passes refer to passes at Advanced or Intermediate Levels of the Matriculation Examination of the University of Malta. The University may accept other qualifications which it deems to be comparable.
- Saving any other provision in course regulations and bye-laws, for the purpose of satisfying the Special Course Requirements, grades at Advanced Level shall be equated to the grades at Intermediate Level as follows:
 - Grade E at Advanced Level is equated to Grade C at Intermediate Level;
 - Grade D at Advanced Level is equated to Grade C at Intermediate Level;
 - Grade C at Advanced Level is equated to Grade B at Intermediate Level;
 - Grade B at Advanced Level is equated to Grade A at Intermediate Level;
 - Grade A at Advanced Level is equated to Grade A at Intermediate Level.

This does not apply for exemption from the English Communicative Aptitude (ECA) programme and from the English and Maltese Proficiency tests which are indicated as compulsory Entry Requirements for particular courses.

- Any grade at Intermediate Level DOES NOT satisfy the requirement of a pass at Advanced Level.
- 'Business Studies', 'Business and Management', 'Government and Politics', 'Global Politics', 'Political Science' and 'Classical Civilization' subjects taken in the IB Diploma satisfy the requirement of a humanistic subject from Group 2 of the Matriculation Examination, while 'Environmental Systems and Societies' subject taken in the IB Diploma satisfy the requirements of a science subject from Group 3 of the Matriculation Certificate respectively.
- 'English Language and Literature' taken at Advanced Subsidiary Level is comparable to a pass in 'English' at Intermediate Matriculation Level. 'English Language' and 'English Literature' at Advanced Level are considered as two separate subjects. 'Mathematics' and 'Further Mathematics' at Advanced Level are also considered as two subjects for the purpose of admission. 'English Literature' does not satisfy the requirement of a humanistic subject from Group 2 of the Matriculation Examination.
- Applicants choosing an area of study in a Faculty other than the Faculty where their degree course is offered shall also be required to satisfy any Special Course Requirements indicated for that area of study by the Faculty offering the area of study. For example, applicants submitting an application for the Bachelor of European Studies (Honours) with Italian must satisfy the Special Course Requirements for the Bachelor of European Studies (Honours) course offered by the Institute for European Studies (i.e. an Intermediate Level pass in English) and the Special Course Requirements for the Italian secondary area offered by the Faculty of Arts (i.e. an Advanced Level pass at Grade C or better in Italian).
- Unless indicated otherwise, all qualifications and courses referred to in this booklet are awarded by the University of Malta.
- The Malta Qualifications Framework (MQF) referencing is indicated for every course being offered. The MQF, referenced to the European Qualifications Framework (EQF), is a common reference point for all nationally recognised qualifications, characterised by eight levels of qualifications. Further information about the level descriptors for the MQF may be obtained here: www.ncfhe.gov.mt

- › The University's academic year is spread over two semesters: the first semester runs from October to January, whilst the second semester runs from February to June, with the examinations period being in January and June. Some courses may include a summer semester (June to September).
- › **No late applications are accepted for courses in which the number of students is limited.**
- › **In courses where a limited number of students is indicated, and if specified in the bye-laws, those applicants who apply by the first deadline and are fully qualified including submitting all required documents by 31 August will be considered first and placed in rank order according to the selection criteria approved by Senate and those for whom places are available will be informed immediately.**
- › **If, after this initial ranking, vacant places are still available, applicants fulfilling all General and Special Course Requirements and any other requirements imposed by the respective Faculties, Institutes, Centres or Schools before 30 September shall be considered for selection to take up any remaining places. For the selection criteria please refer to the University's website: um.edu.mt/registrar/regulations/faculties**
- › For courses which require the submission of a Police Certificate of Conduct, on acceptance on the course, applicants shall be required to submit the Certificate (not more than 6 months old) to the respective Faculty/Institute.
- › In this prospectus, unless the context otherwise requires, the Board means the Board of the Faculty/Institute/Centre/School concerned.
- › The language of instruction and assessment at the University of Malta is English. Applicants who have completed their education overseas are obliged to satisfy the University's English Language requirement by presenting a Secure English Language Test (SELT) result at the required levels. For further information please refer to: um.edu.mt/englangreq
- › Lectures for study-units relating to courses offered on a full-time and part-time basis may be held on any day from Monday to Friday between 08:00 and 20:00. The University shall endeavour to announce the days on which a course is to be held prior to its commencement. However, it cannot be bound by fixed days and times for the duration of the whole course. Applicants are encouraged to consult the respective Faculty/Institute/Centre/Schools for further information.
- › Tuition fees are payable for some courses. The fees are indicated through the Search for your Course Facility on the University webpage.
- › The commencement of any course/area of study is subject to there being a sufficient number of qualified applicants, availability of resources at the time of opening and other factors beyond the University's control.
- › The information provided in this prospectus reflects the Regulations and Bye-laws in force at the time of publication and is intended for guidance purposes only. For the purposes of interpretation of this information, said Regulations and Bye-Laws shall prevail.
- › Other courses may be announced at a later date. An updated list of courses is available at: um.edu.mt/admissions

Services

IT Services

The University IT Services has the primary role of proactively supporting the teaching, research and related activities of the University of Malta (UM) through coordinated, efficient and effective use of information and communication technologies.

IT Services provides all students with a UM IT Account that grants them access to a range of IT facilities and services, including a University email address, Google Workspace for Education services, and other resources available on the University campus network.

IT Services maintains open access learning spaces equipped with computer workstations (Windows and Mac) for individual and group study at various University buildings, including IT Services, the University Library, the Health Sciences Library (Mater Dei Hospital) and the Faculty of Media & Knowledge Sciences (Mac computers). These workstations offer the use of standard software packages, email, web browsing, networked file storage, printing and scanning facilities. Black and white and colour laser printing facilities are operated on a self-service basis using printing credits that can be purchased online. Wide format printing (up to A0) and scanning facilities are also available.

The wireless network is available throughout the University for students to connect their personal devices. The University of Malta is a participating institution in the eduroam (education roaming) Wi-Fi service. Students visiting other eduroam participating institutions will be able to connect to the wireless network of these institutions using their UM IT Account.

IT Services maintains the University Virtual Learning Environment (VLE) based on the Moodle platform. The VLE provides a range of tools to support tutors and students with teaching and learning. Students can access teaching material and resources, lecture recordings (Panopto) and the web conferencing platform (Zoom), as well as submit coursework through the VLE. Plagiarism detection software (Turnitin) is available to help students improve their academic writing skills.

At the start of each semester, freshers are invited to attend an orientation session to learn more about the various IT facilities and services offered by IT Services. Students are also invited to follow courses organised by IT Services, including training on the use of the plagiarism detection software (Turnitin) and quantitative data analysis software (IBM SPSS).

IT Services provides software (e.g. IBM SPSS, Microsoft, NVivo, ArcGIS, Autodesk) for academic-related purposes. Some software is available against a fee.

The IT Service Desk is the primary point of contact to report IT-related issues, seek further information and find self-help guides. Students can find advice on common IT-related issues in the Self-Service Portal, chat online with a support agent or submit a request if they require further help.

Health & Wellness Centre

The Health and Wellness Centre at the Msida Campus, close to the old University Gate, offers services aimed at enhancing the wellbeing of UM staff and students. In line with WHO, we are committed to promote mental health awareness, contribute towards the wellbeing of staff and students during their experience on Campus, supporting them to reach their full potential, so they can cope with life stressors, work productively and make valid social contributions. Counselling Professionals inclusive of psychologists, psychotherapists, counsellors, and social workers provide services to improve the quality of life and health of this community. Supporting self-actualisation and self-development of staff and students is a service which is regularly offered. This support aims at enhancing resilience and empowering staff and students take on the challenges and grasp the opportunities that may arise as a result of everyday life situations. Students with financial constraints may contact our social worker to obtain further information regarding their eligibility to apply for the Student's Solidarity Fund. Prevention and psycho-education form part of our list of services including staff training in handling suicidal and/or challenging students, leadership and mentoring skills. This training is carried out in collaboration with HRMD. Students may consider joining stress and study skills groups. At times life issues may adversely affect our mental health, which if not tackled effectively, may adversely affect our life, relationships and self-esteem. To this end, the Centre offers Mental Health Services. Addiction services are also offered at the Counselling Services Unit. In the same building, one can also find services on alternative medicine at the Traditional Chinese Medicine Centre. Beyond these services, there are other services that continue to help students outside these premises like the Students' Advisory Services, the Chaplaincy, as well as the ACCESS Disability Support Unit. For a full list of services offered by the Health and Wellness Centre, please refer to um.edu.mt/services/health-wellness

Campus FM

Campus FM is the University of Malta's radio station, broadcasting educational and infotainment programmes.

Built on a tradition of high-quality broadcasting, the station has collaboration agreements with a number of entities. Students, lecturers and staff at University are involved in the radio's operations and contribute towards various productions and initiatives. Campus FM has been the recipient of a number of broadcasting awards since it was set up in 1994. Campus FM transmits 24 hours a day on the analogue frequency 103.7 FM, as well as on the latest digital radio transmission technology, DAB+ and also online.

Counselling Unit

The Counselling Unit at the University of Malta provides counselling services to students and members of staff, to empower them towards achieving their goals. Counselling is a process whereby one can talk freely through a troubling issue or concern with a person trained to facilitate understanding. Short-term personal counselling is offered on an individual basis and in a confidential setting. Students and members of staff approach the Counselling Unit for many reasons including difficulties with relationships, emotional difficulties, confusion about their identity and distressing feelings such as depression, eating disorders and anxiety.

Different kinds of difficulties that emerge as part of academic life are also tackled. Counselling enables students who have difficulties with their studies to work through these problems. Students are helped in times of stress, especially before and during examination time and whilst writing their dissertation. Apart from individual counselling, periodically, the Counselling Unit organises seminars that target different students' needs such as stress management and study skills.

Any University student or member of staff is welcome to consult the Counselling Unit that provides its services free of charge. All communication with the Counselling Unit is kept confidential and all Unit staff members are qualified and experienced practitioners.

Chaplaincy

Located on campus, next door to the old gate of University, with comfortable facilities, wireless internet access, quiet study rooms and comfortable meeting rooms, the Chaplaincy is probably one of the most relaxing places on campus. Students and staff members alike can pop in at almost any time and find someone who has just put the kettle on and is ready to listen!

One is also welcome to get involved in the numerous events held by the Chaplaincy during the year. These range from voluntary work to activities that help the person grow on all levels. As expected, the Chaplaincy is also very active and holds spiritual activities which are meaningful and appealing to young people. Why not just drop by to find out more about what we have to offer? A meeting for first year students taking place towards the end of September 2022 (date to be communicated later) at the University Chaplaincy would be the perfect opportunity where one can meet other students who have already started their spiritual journey and who could help reflect on doubts or fears related to one's choice of study.

ACCESS – Disability Support Unit (ADSU)

The University of Malta is proud to welcome students with disability and acknowledges the contribution they can make to the University as an inclusive learning community. The University is intent on removing all barriers and obstacles within its power in order to enable students to choose and follow the course they would like to take up and for which they have the necessary academic requirements. The University of Malta aims to facilitate their full participation in all student activities throughout the time they spend on campus. The University will also strive to sensitise all staff and students as well as visitors to ensure an inclusive community.

Arrangements at the University are tailor-made, whenever possible, to meet the needs of the individuals requiring them. These provisions include access needs for persons with sensory impairments and also with specific learning difficulties, among others. They may take the form of soft copies of printed text that can be accessed through text-to-speech software, sign language interpreting and predictive text technology. The ADSU office is equipped to provide more comprehensive support services for students with disability on campus. The coordinator on campus is the referral point for all requests for access arrangements and has the following roles:

1. Receives requests for access arrangements;
2. Liaises with the Access Disability Support Committee (ADSC) regarding any requests for access arrangements;
3. Coordinates the necessary resources for the implementation of the decisions; and
4. Liaises with University staff about matters related to disability issues. Examination arrangements, both for the University's examinations (Matriculation & SEC) and its Certificate, Diploma and Degree programmes, as well as arrangements for teaching sessions are designed to make the University more accessible.

Search for your Course Facility

The Search for your Course facility is a feature which allows you to select the areas of study which are of interest to you. By clicking on the area of study of your choice, you will access courses which are relevant to your search criteria. The Search for your Course Facility is available from the University's main portal as well as through the webpages of the faculties and other entities. The information which is available under each of the individual searches includes the following:

- Course Title
- MQF Level of the qualification
- Duration and mode of study
- Total ECTS credits
- Course overview and the overarching learning outcomes for the programme
- Details of career opportunities and access to further studies
- Admission requirements
- The programme of study with detailed descriptions of all study-units

Stipends

The Stipends Office on campus, administers the Students Maintenance Grants, which are provided by the Government of Malta to eligible students who are reading for a course at the University of Malta. The Stipends Office, in collaboration with the Office of the Registrar, Faculties, Institutes, Centres and School, the Students' Maintenance Grant Board, and the Treasury Department, works to maintain the correct information regarding University students to ensure that the maintenance grant is issued correctly and on time.

Under the Maintenance Grant Scheme, eligible students qualify for a monthly fixed rate (stipend) as well as a fixed sum per academic year, as well as a one-time grant at the beginning of the first year of the undergraduate course. Students following prescribed courses qualify for a higher maintenance grant for the duration of their course. The list of Prescribed courses is issued by the Ministry for Education, and is available at: um.edu.mt/registrar/stipends/grants.

The yearly grant is intended to defray expenses related to educational material and equipment throughout the academic year.

Students who are eligible for the maintenance grant and have particular financial difficulties may also apply for the Supplementary Grant Scheme, whereby they may be eligible

to receive an additional sum to their maintenance grant. It should be noted that all decisions regarding applications under the Supplementary Grant Scheme are taken solely by the Students' Maintenance Grant Board.

All students are to apply for their maintenance grant and the supplementary grant through the Ministry for Education's portal – www.education.gov.mt – in the first year, and details must be reconfirmed on a yearly basis.

Students are bound to repay the pro-rated amount of money indicated by the Students' Maintenance Grant Board should they absent themselves from the course, fail to register satisfactory progress, or discontinue their studies.

Winter: Mondays and Friday – 08:30 – 12:00

Wednesdays – 14:30 – 16:00

Library

The University of Malta Library (UML) consists of a central building on the main campus, with satellite libraries at the Faculties of Arts, Laws and Theology, the Valletta Campus in the capital city of Malta, the pre-University Junior College in Msida and the Gozo Campus on the island of Gozo. The Library's catalogue also includes holdings at the European Documentation Centre, Confucius Institute Library, German Language Resource Centre and the Faculty for the Built Environment Library.

The UML is the leading research library in Malta with a collection of nearly a million monographs, some 60,000 e-journals, e-books collections and a growing collection of UM electronic theses and dissertations. Its holdings include a prestigious Melitensia Special Collection, which embraces works about all aspects of Maltese history and culture, the Order of St. John, and publications written by Maltese authors. The Archives and Rare Book Department houses a significant range of literary manuscripts, historical papers and archival records including the historical records of the University of Malta since 1800, as well as, a prestigious collection of rare books and maps of Malta.

The Library offers orientation tours to first year students and regular instruction sessions pertaining to the use of online resources, the management of bibliographies and information sessions on the University's Institutional Repository OAR@UM to students, academics and support staff, in both group and individual settings. The main Library building provides a blend of study spaces ranging from group to single study areas. The group study area, with its attractive furnishings and relaxed atmosphere, is a regular hub for students, with power and computer support facilities. The Library also responds effectively to students' requirements and study habits by offering extended opening hours during the examination periods.

Library Services includes full UM access to its resources, both printed and electronic, in all areas of the sciences, including Biology, Chemistry, Computing, Engineering, Environmental Science, Mathematics, Physics, Health, Dental and Medical Sciences, as well as, the Arts and Humanities, Social Sciences and Business. Students and academics also benefit from remote access to a wide range of licensed online journals and databases across all disciplines. Furthermore, the Library continues to provide traditional reader services in book circulation, inter-library lending and reference assistance to patrons. Additional services include access to wireless networking, photocopying, scanning and printing. The Library also mounts various exhibitions throughout the year, highlighting local and foreign history, notable authors and current events.

The Library Management System (LMS) enables the Library operations and services to be in line with academic demands and international standards. The dynamic portal - HyDi service - searches both print and online resources through a single search and presents users with one result list which incorporates books, journal articles, dissertations and any audiovisual material related to the search terms. The Library's collections are classified by the Library of Congress Classification Scheme and catalogued according to AACR2 standards.

The UML is committed to Open Access initiatives and is contributing towards OpenAIRE, SEA-EU and reSEArch-EU projects. To this end, the Library launched an institutional repository (IR) OAR@UM. The scope of this initiative is to enhance the visibility as well as preserve the intellectual output and research being carried out at the UM. This digital repository contains the research publications of scholars affiliated to the UM, together with digital items including audio, video and images.

Student Advisory Services

The Student Advisory Services aims to provide prospective and current students at the University of Malta with the necessary information and advice in order to make informed and sensible choices. This is done through, the provision of information and advisory services at the University, youth work services at the Junior College, research and constant contact with fellow stakeholders.

- The Unit, which integrates both public relations and an administrative function, serves students:
- by providing advisory services on practical or personal issues related to career paths and courses of study within the Maltese context;
- by establishing and maintaining links with schools particularly those at post-secondary levels;
- by assisting the Office of the Registrar when dealing with enquiries relating to courses of study; and
- by providing vocational advice.

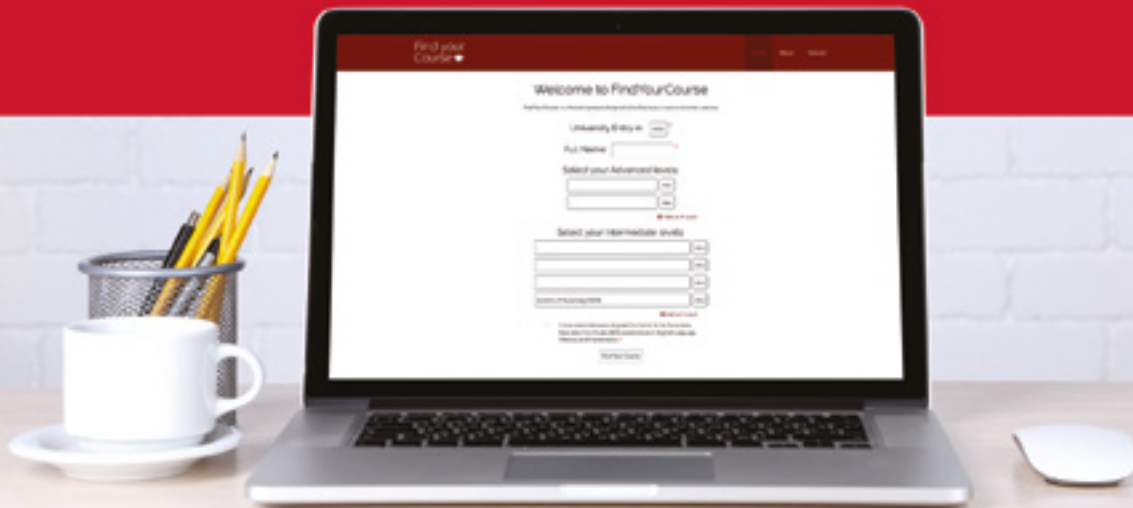

The service operates in close liaison with other University specialised service units, in particular those within the Office of the Registrar like the Admissions and Records Office, as well as with other units within the Health and Wellness Centre.

Sports

The Tal-Qroqq Fitness Centre and National Pool Complex at Tal-Qroqq are a five-minute walk away from the main campus. University students can benefit from special rates for the usage of both the Olympic sized swimming pool as well as the fitness centre. Squash courts are also available within the same building. The fitness centre is open daily between 05:00 and 23:00 and between 07:00 and 17:00 during weekends. The sports hall, adjacent to the National Pool Complex, may also be booked for basketball, handball, badminton, volleyball and netball. Students may also book five-a-side football pitches.

The Student Athlete Support Programme (SASP) strives to assist student-athletes who practice sport on a regular basis at national and/or international level. Through the SASP the University encourages and supports student-athletes to find a balance between their academic and sporting commitments. Further information may be obtained as shown below.

Child Care Services

The Child Care Services of the University of Malta provide child care facilities to members of staff, students, and the general public, both during the scholastic year through It-Tajra Child Care Facility which is on Campus, Ilwien Child Care Facility at the Junior College, as well as during the summer period through Kids on Campus.

It-Tajra and Ilwien Child Care Facilities provide pre-school education for children who are aged between 12 months and 3 years at Ilwien and between 18 months and 3 years 11 months at Tajra. The pre-school centre setup, where structured play is the predominant factor, reflects the belief that children learn best in a stimulating environment. The classrooms have an open plan layout and are divided into well-defined areas including role play corner, block centre, nature corner, and messy play area amongst others. The facilities' main goals are: the social and emotional (affective) development; the formation of good health habits; the physical (gross and fine motor) development; development of imaginative and creative capabilities; motivating to desire and seek information and understanding; and development of appropriate cognitive process with particular emphasis on communication skills.

Dates of Operation: *Throughout the year except holidays, the 26 December, 2 January, Easter Monday and 16 August.*

Both **It-Tajra** and **Ilwien** operate from 07:30–17:15 during the winter and from 07:30–13:30 in summer

Afternoon sessions during winter run from 13:30–17:00

Kids on Campus is a University-based eight-week summer programme that caters for children who are 3 years old by 1 July up to the age of 15. Kids on Campus offers a fun-packed programme between 07:30 and 13:30 full of activities.

Degree Plus

DegreePlus is a University of Malta initiative which aims to help students add value to their experiences in higher education by broadening their academic and non-academic horizons. University years, particularly those spent pursuing postgraduate studies, are a time for personal growth and development. The DegreePlus programme, designed cognisant of student needs and aspirations, includes units in Professional Communication, Entrepreneurship, Languages, Sport, Music, Voluntary Work, Creative and Performing Arts, and more. DegreePlus also co-administers a Placements Scheme through which students can spend some time in industry or in a work environment and hence augment their range of skills. For further information please visit the website or pop in at the DegreePlus office located at the Students' House. The DegreePlus team is confident that everyone will find something to meet their interests and expectations.

Kunsill Studenti Universitarji (KSU)

There's a thriving student life on campus at the University of Malta for all students to get involved in! The Kunsill Studenti Universitarji (KSU), the Students' Council, is one of the oldest Student Unions in Europe, founded in 1901. The main aim of the Council is the holistic representation of all students at the University and the Junior College, which involves intervening in matters that directly affect students. Empowering each and every individual to speak out and voice concerns and opinions on any associated matter is what the Council's work is based on. KSU, in addition, also organises a number of entertaining, social events which include Grad Ball and Students' Fest amongst others. Different issues are tackled via its four offices, which work hand in hand with the KSU Administrative team. These comprise the Education, International, Culture & Entertainment and Social Policy Offices.

Amongst the resources offered by the Council, there are various funds that students can be eligible for, graduation togas and laptops for rental as well as the KSU student card, which opens the doors to many discounts and opportunities. The KSU Website (www.ksu.org.mt) offers further details and information on the Council itself as well as on all the services which it offers. The campus is also home to other student organisations, some of them with a political or social dimension, or others that represent international organisations. Such student societies are the ideal platform for students not only to participate, but also to form an active part of the University. A full list of student organisations is available at um.edu.mt/studentlife/studentsocieties/

Furthermore, elected student representatives sit on the University Council, Senate, Faculty, Institute, Centre, and School Boards, and are therefore actively involved in policy-making.

Get Qualified Scheme

Get Qualified is an initiative that supports the personal development of individuals for the achievement of qualifications and certifications required by industry. The incentive is applicable to individuals following a course of studies leading to a certificate, diploma, Undergraduate degree or Postgraduate degree. Upon successful completion, the student will benefit from a tax credit thus recovering part of the costs incurred.

Students following courses approved by Malta Enterprise are granted tax credits on the following costs:

- fees paid by the individual to apply for a particular course/area of study;
- fees paid by the individual to the university, institution or other entity recognised by Malta Enterprise for the training and educational services leading to the approved qualification;
- fees for sitting for examinations required to achieve the approved qualification.

Students are reminded that their application should be submitted in accordance with the Incentive Guidelines.

The Get Qualified Scheme is managed through an online system. Students should consult the list of approved courses available at getqualified.maltaenterprise.com/applicablecourses

Students registered on approved courses may register themselves by accessing the Malta Enterprise website at getqualified.maltaenterprise.com/login

Once registered, students will receive a username and password enabling them to access the online system and submit their application. Students are reminded that, following registration, they are still required to submit their application in line with the Incentive Guidelines.

Students following a course which is not yet listed under the Get Qualified Scheme should fill the application requesting that the course be considered for eligibility under scheme.

For further information or assistance contact Business First on 153. Information regarding the forms and documents in connection with the Get Qualified Scheme can be accessed through maltaenterprise.com/support/get-qualified-2017-2023

It should be noted that the information within this Prospectus pertaining to courses marked as eligible for tax rebates under the Get Qualified Scheme is correct as at 1 July 2022.

Look out for the blue icon

Any Course which is eligible under the Get Qualified scheme is marked with a blue icon (as shown here). Some courses will only be eligible under the scheme when certain areas of study are chosen. This is clearly marked **in blue text** in the Course description.
