

Research on bike users at the Junior College

No personal details are required for the completion of this questionnaire, so that the survey is **anonymous** unless you wish to include these voluntarily at the end of this sheet where you may write: your name and surname, email address and mobile number for any follow-up questions.

Feel free to answer ANY or ALL of the questions.

You may answer by a ‘yes’ or ‘no’ where applicable, but some questions may need some comments for you to fill. Any further relevant information may be added since this will be useful to support the Environment Committee in all promotional campaigns so as to encourage further use of sustainable modes of transport, and promote healthy living.

Your response is greatly appreciated.

The questions refer:

1. What drives you to use the bike to come at JC?

2. What support have you found to use the bike (parents, peers, others – please mention)?

3. Suggest one or more reasons why you make use of the bike to come to the Junior College:

4. Where do you live (you may specify Town/Village and/or approximate km) or from which town/village do you normally cycle to the College?

5. How much time does it take you to come to the College?

6. Do you use the bike in bad weather?

7. Do you consider it of importance to be physically fit to use the bike?

8. Do you think that it is expensive to have and maintain a bike for the average family income?

9. Do you think that safety is an issue which keeps a lot of students from not using the bike?

10. Please specify any other barriers that you may think hinder other students from using the bike to come to the JC apart from the list below:

- a) No safe bike routes
- b) Lack of driver education
- c) There is not enough driving law enforcement

Specify Others: _____

11. Do you recommend the use of the helmet while riding the bike to JC and going back home?

12. Which other safety recommendations do you follow?

13. Why do you think that from Maltese statistics, female use less bikes, especially for those attending at JC. Why do you think that fewer females than males use bikes in Malta?

14. What do you expect more at the JC to make your bike usage more attractive?

15. Any other issue that you may want to add that was excluded from the above questions?

Note: Optional for those participants who wish to be contacted and informed with any updates from time to time by the Environmental Committee.

Name, surname, email address and mobile number
