

# 100 WORD ideas to change MALTA

## High-tech Test Bed

by DR ALEXEI DINGLI

Size can be both a limitation and an opportunity, depending on how you look at it. My idea is to turn Malta into a high-tech test bed. Malta has all the complexities of modern countries: high density, traffic, etc. yet it is tiny, manageable and low cost compared to most countries in the western world.

What if we invite companies to come here, test their systems, and then once they're happy they could implement them in larger countries? We could easily introduce an Intelligent Traffic Management System, Ambient Assisted Living in all the homes; basically the sky is the limit! ●

## [Don't] THINK!
