NEW TOOLS FOR ASSESSMENT FOR FORTIFIED TOWNS: A CASE STUDY, THE SOUTH EAST REGION AND ITS SISTER CITIES – A GEO-SPATIAL APPROACH

Global Compact
Cities Programme

DR MALCOLM BORG
PROF SAVIOUR FORMOSA

CONTEXT:

THE SE REGION 5 FORTIFIED MARITIME CITIES

GOVERNANCE: ROLE OF SERC

UNGCCP: OBLIGATIONS

ASSESSMENT TOOLS: FROM COS TO CITY SCAN

APPLICATIONS: ASSESSING THE CITIES 2013-18

THINKING GEO-SPATIALLY: ASSESSING TOOLS

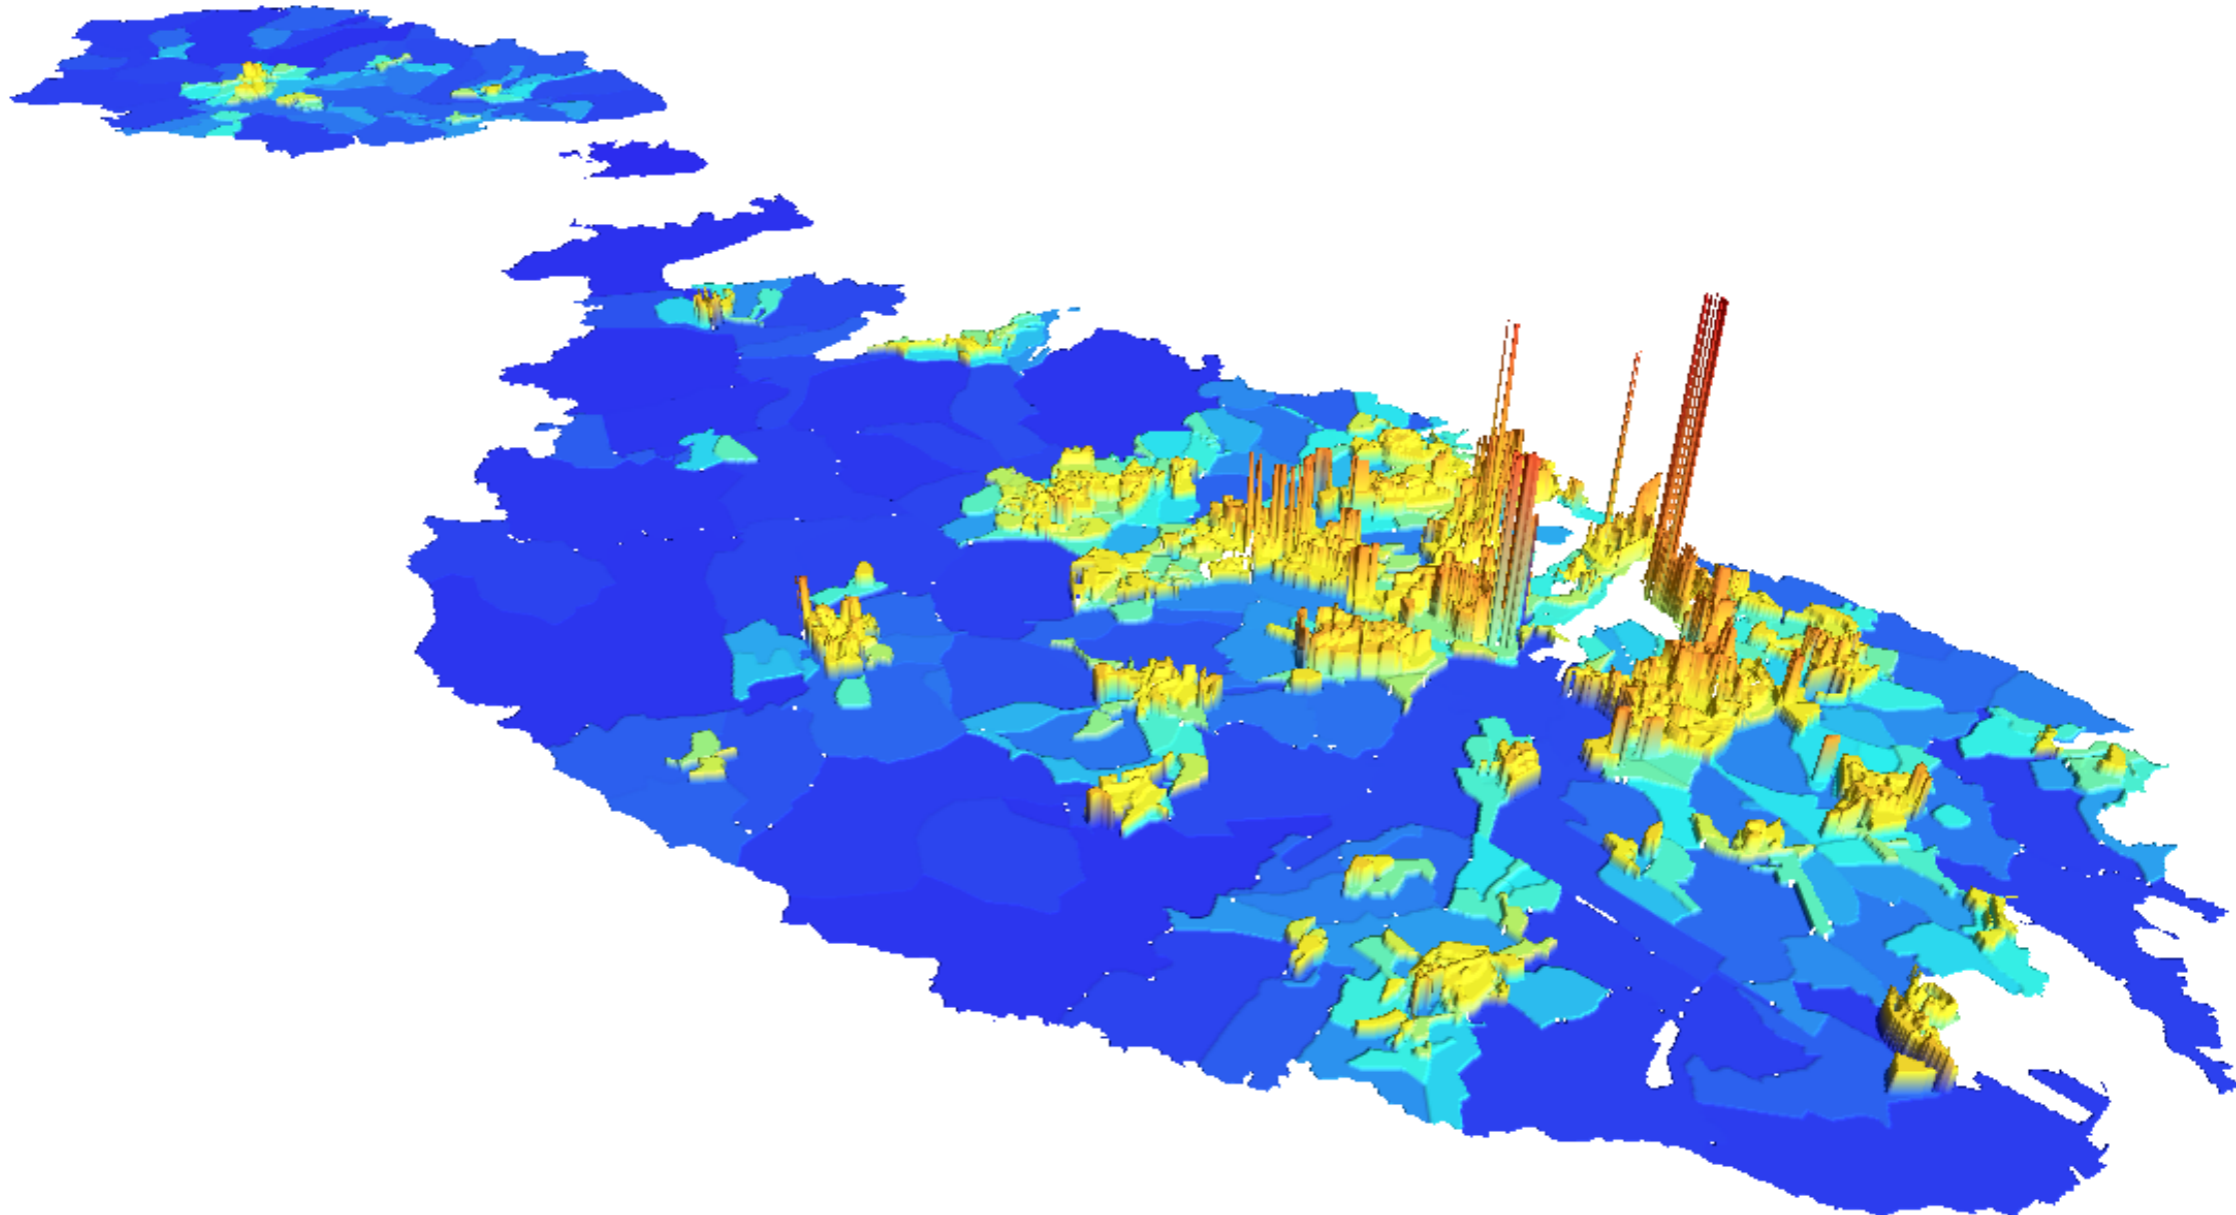

APPLYING AND DOVETAILING NEW TOOLS

1

1 CONTEXT

- ▶ The South-East Region is one of the most populated and with the highest densities in the Maltese Islands. Its density is **24 times the EU** European Ci

- ▶ The region with **sparse** has an ind developed in and ports. The **vertical cliff** Grand Hark Delimara an area. Sparse located an concentrate Marsascala.

NEW TOOLS FOR ASSESSMENT FOR FORTIFIED TOWNS: A CASE STUDY, THE SOUTH EAST REGION AND ITS SISTER CITIES – A GEO-SPATIAL APPROACH

1 CONTEXT

area S.E. region: 34.32 sq km area
Malta: 246.49 sq km

population S.E. region: 96,316
population Malta: 417,432

density S.E. region: 2,806 per sq km
density Malta: 1,566 per sq km Europe
average: 116 per sq km

15 COUNCILS

2 DISTRICTS

CAPITAL CITY VALLETTA (WHC)

28 km of FORTIFICATIONS

NEW TOOLS FOR ASSESSMENT FOR FORTIFIED TOWNS: A CASE STUDY, THE SOUTH EAST REGION AND ITS SISTER CITIES – A GEO-SPATIAL APPROACH

increase in sea-resorts: 80%

11 out of 15 Councils in the region are **maritime** with a concentration over the harbour area with an annular formation of historical sister fortified cities.

The region does not only encompass the most important ensemble of fortifications (**UNESCO Tentative List**) it also has the highest concentration of archaeological World Heritage sites with Tarxien Temples and the Hal-Saflieni Hypogeum. The UNESCO list for Malta includes Valletta both capital and World Heritage City.

These are important resources contributing in diversifying the local predominantly industrial economy to a tourism orientated one. The industrial sector still predominates with **4 out of 10 industrial estates** located within the region without considering the docks, shipbuilding and maritime industrial zones.

increase of shipping tonnage: 70%

increase marina berths: 66%

2 GOVERNANCE

- ▶ CAP 363 LEGAL PARAMETERS
- ▶ MISSION

The South-East Regional Committee (SERC) will try to gather all resources possible to direct actions for better governance through better coordination, increased information and communication. The SERC will seek funds to sustain research and development to promote; management tool development; capacity building. SERC will also spur alliances with other regions, councils and stakeholders to secure the implementation of the UN Ten Principles.

- ▶ VISION

The South-East Regional Committee (SERC) will seek the means to spur actions to guarantee a sustainable development for future communities. The Councils in partnership will plan, design and develop projects to ensure that the communities within the region are more liveable.

4 ASSESSMENT TOOLS

The UNGCCP methodology

The Urban Profile Process

The Circles of Sustainability was introduced in 2007 as a joint project between UNGCCP, chaired by Prof. Paul James at RMIT University Australia, and United Cities and Local Governments UCLG

It introduces a comprehensive methodology to understand and assess the sustainability performance of a territory

The analysis is based on **FOUR** domains
Ecology - Economics - Politics - Culture

domains are composed by seven perspectives, each has seven aspects used to generate a finer assessment

City of Barcelona, Spain

City Scan Report 2015

This report summarises the City Scan submission from Barcelona City Council, which joined the United Nations Global Compact in February 2011.

The City Scan, launched in February 2015 by the Global Compact Cities Programme (or Cities Programme), assists cities in the identification of critical issues they are facing, and helps them to recognise and report on their strategies and initiatives to address these challenges using the lens of the Global Compact's Ten Principles. It also seeks to identify the strengths of each city and celebrate their contribution in fostering sustainable, equitable and just urban communities.

The survey covers three main categories of municipal activity: City Development, City Sustainability and City Governance. Within these three categories, the cities are required to report on 22 topics areas, broken down into 157 issues or challenges. The data is collected from across the city or municipal government by the nominated focal point for the UN Global Compact (or another delegated staff member).

The City Scan also enables identification of engagement with the UN Global Compact and the Cities Programme and city-led initiatives that influence the business community to have better environmental and social practices.

4 ASSESSMENT TOOLS

Barcelona Global Compact City Scan 2015

What is the City Scan?

The Cities Programme, the urban arm of the United Nations Global Compact, has developed a diagnostic and reporting tool termed the 'Global Compact City Scan'. This has been done to support cities and regions who are playing an increasingly important role in tackling critical global issues.

The City Scan is based on an in-depth survey which requires contributions from across a municipal government. It takes a number of weeks to collate and input data and provides:

- The opportunity for cities to identify their region's challenges and their priorities, plans and initiatives that address these challenges.
- A holistic perspective of the environment in which the city government operates and enables a whole of city government view of strategy and action.
- A valuable platform from which to plan, set goals, monitor progress and recognise achievement – through the lens of the Ten Principles of the UN Global Compact in the urban context.

Strength/Leadership Example

Access to safe and potable water for all citizens is considered to be one of Barcelona's strengths. The consumption of drinking water in the city has dropped by 58 per cent in the past eight years as a result of increased groundwater use and improved water management. The total water use in 2012 was 362.2 litre per resident per day and, in the same year, the total annual use of drinking water fell below 97 million cubic meters for the first time.

Solid waste collection and management is also a key strength of the city. Since 2007, the level of municipal waste generated per resident has been falling every year and in 2012 stood at 1.27 kg per resident per day. The total amount of municipal waste in 2012 stood at 753,735 tonnes.

City Development

Critical Issues

- Poverty
- Women's rights
- Discrimination
- Access to education (early childhood, primary and post-primary)
- Access to sports facilities and/or programmes
- Access to and provision of social care services
- Access to adequate housing and support services and infrastructure

Critical Issues Cont.

- Evictions/Cleaner transport options
- Safe passage for bikes
- Safe pedestrian mobility
- Access to fair work and local employment
- Unemployment
- Access for women to employment opportunities
- Process to establish local enterprises
- Persistent and/or increasing poverty

Major Issues

- 25 major issues were identified

City Strengths

- None identified

LEGEND
 5 - City Strength
 4 - Not of Concern
 3 - Little Concern
 2 - Moderate Concern
 1 - Major Concern
 0 - Critical Issue

City Sustainability

Critical Issues

- Air pollution
- Greenhouse gas (carbon) emissions from industry and transport

Major Concerns

- 14 major concerns were identified

City Strengths

- Access to safe and potable water for all citizens
- Access to sufficient potable water
- Sewerage infrastructure
- Sewerage treatment and disposal
- Street lighting coverage
- Solid waste collection and management

City Governance

Critical Issues

- Public access to city government information
- Accountability of city leaders
- Accountability of bureaucrats
- Transparency of processes
- Transparent procurement
- Public reporting against urban objectives
- Recognised and/or formalised city process of community engagement
- Interest from the community in engaging with the local government

Critical Issues Cont.

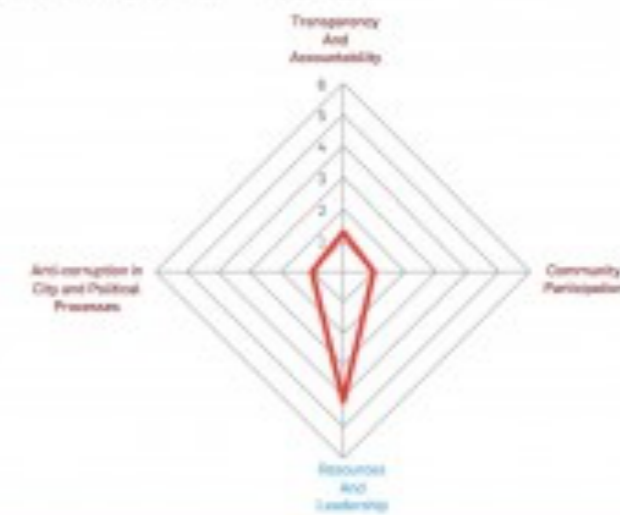

- Processes where community engagement can affect change
- Capacity and skills within the community to engage with the local government
- Political, bureaucratic and private sector corruption
- Arbitrary and impartial judicial processes

Major Concerns

- 5 major concerns were identified

City Strengths

- Capacity to secure external funding
- Appropriate number of staff
- Adequate staff skills
- Strength of community institutions
- Modern IT infrastructure
- Adequate and appropriate remuneration of public sector staff

Ten Principles of the UN Global Compact

Human Rights

Principle 1: Businesses should support and respect the protection of internationally proclaimed human rights and

Labour

Principle 2: Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining.
Principle 3: The elimination of all forms of forced and compulsory labour

Environment

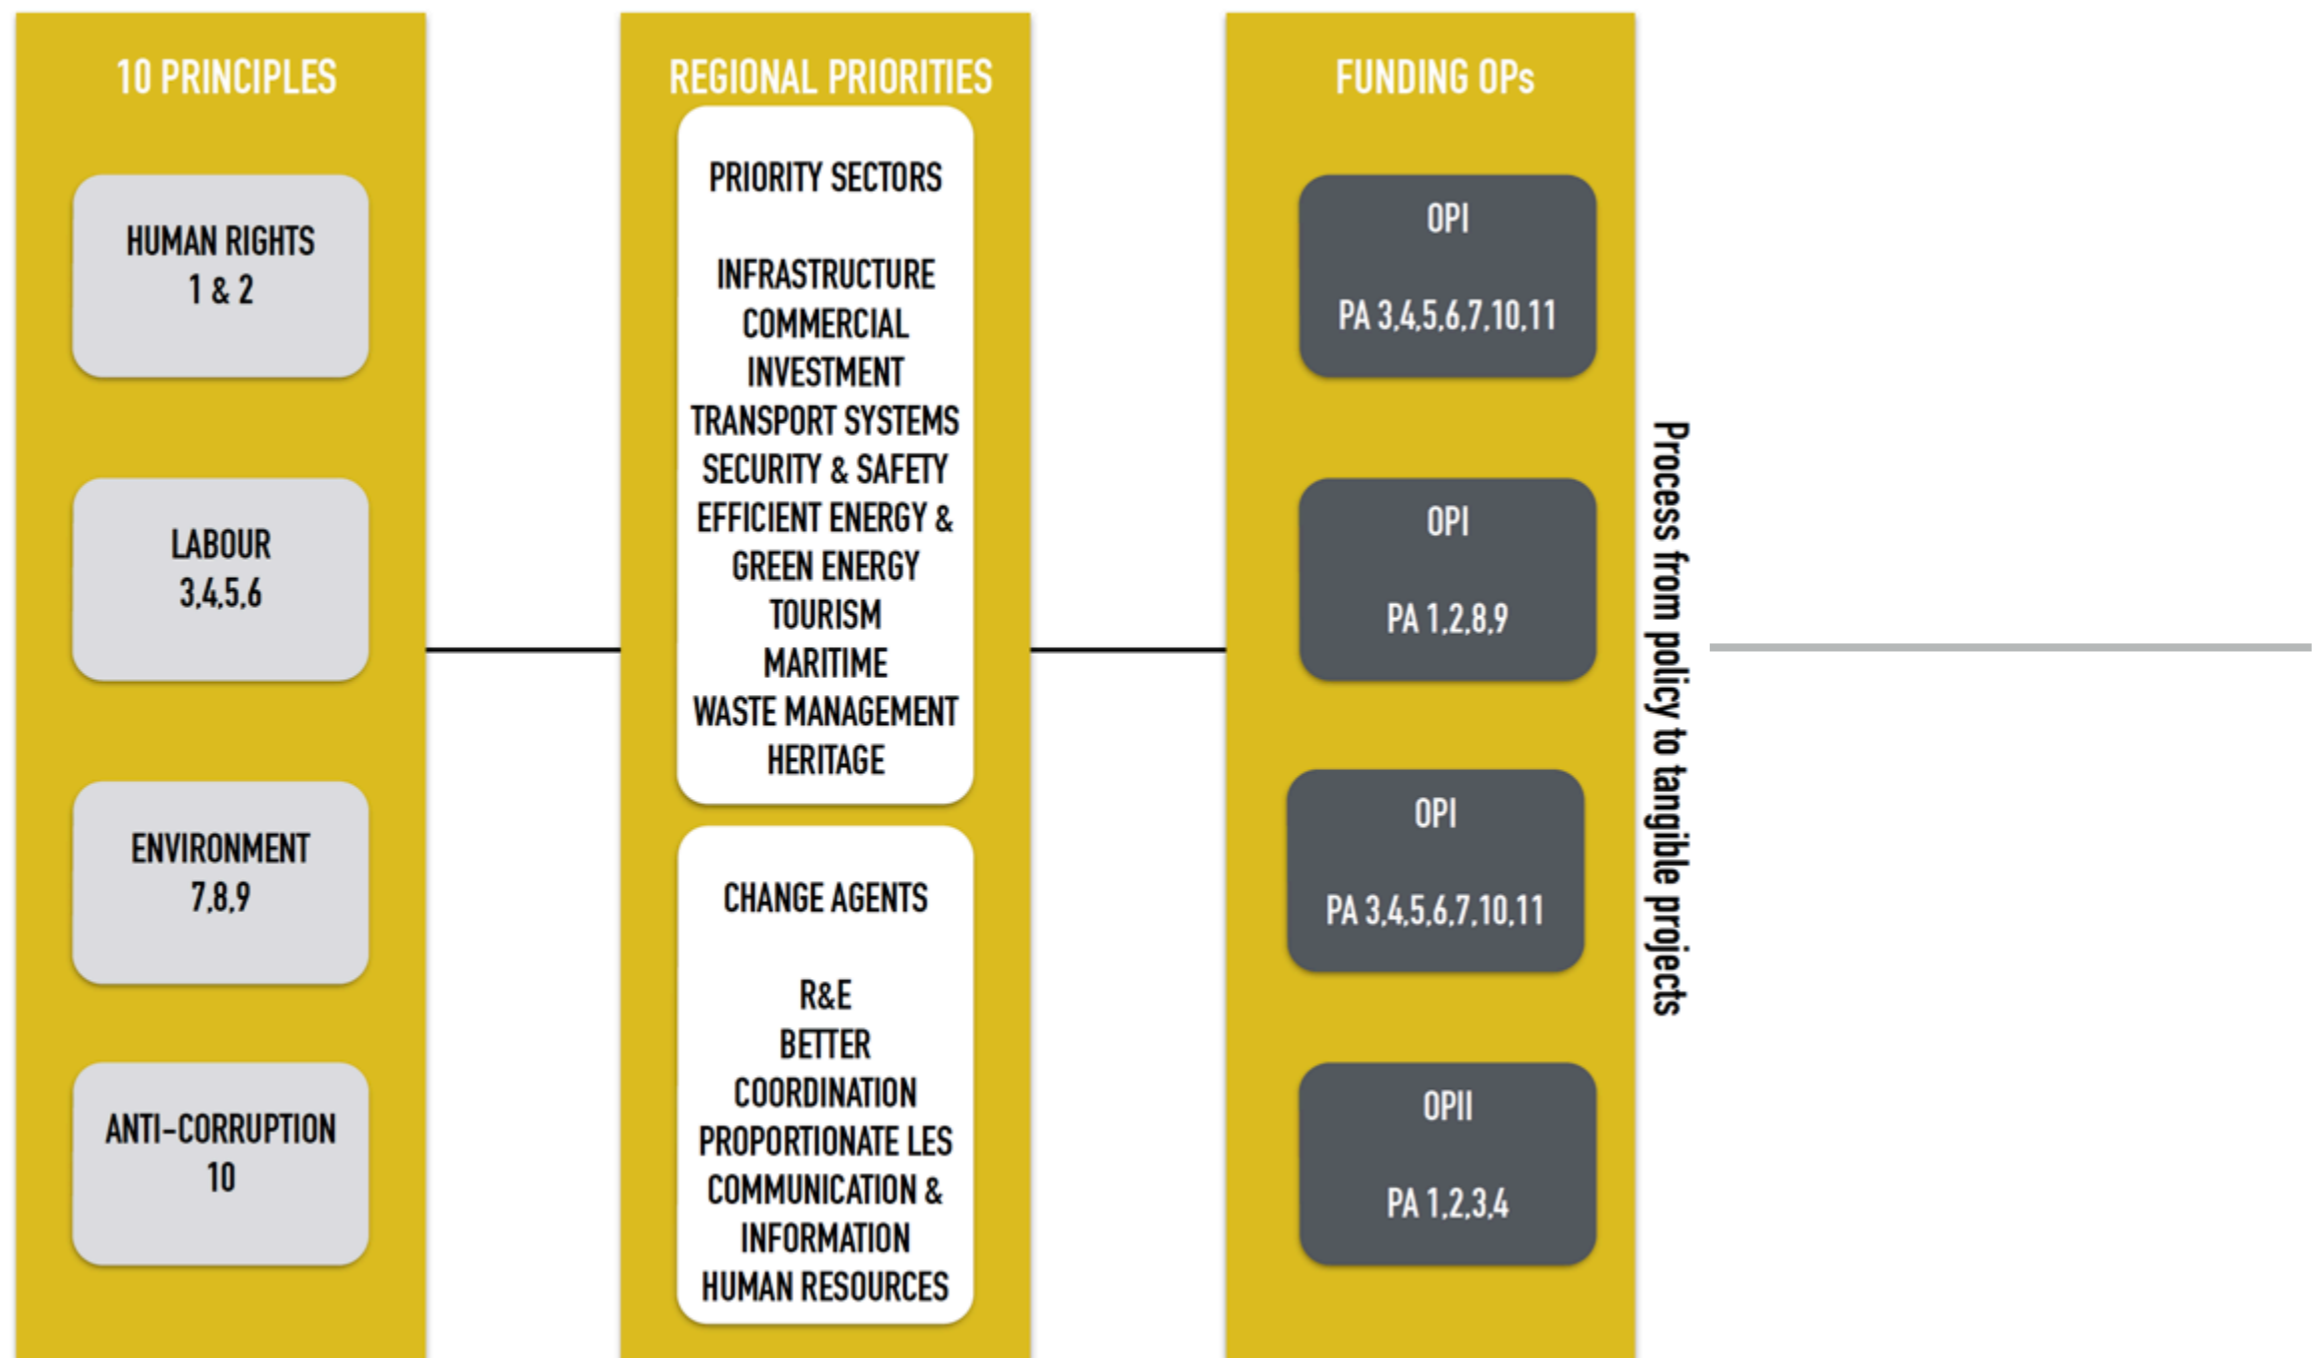

Principle 7: Businesses should support a precautionary approach to environmental challenges;
Principle 8: Undertake initiatives to promote greater

Anti-Corruption

Principle 10: Businesses should work against corruption in all its forms, including extortion and bribery.
