

# Business Education in the Age of Generative AI

What is Generative AI (such as ChatGPT)? How does it work? What are the possibilities of incorporating Generative AI in the teaching and learning process of the business education subjects?

This was a professional development session organised by Dr Emanuel Mizzi (Business Education Co-ordinator) and led by Dr Leonard Busuttil.

Business Education teachers from state, church and independent schools and lecturers from the Junior College and MCAST had the opportunity to discuss how Generative AI facilitated deep learning in the business subjects.
