

## Collaboration with VIVES University College

What constitutes active learning in the business education subjects? What teaching approaches include all students in learning accounting, economics, and business studies? This was the theme of the collaboration between Dr Emanuel Mizzi, Business Education coordinator, and Ms Inge Castryck, a lecturer in the Educational Bachelor of Secondary Education, VIVES University College, Belgium.

Ms Castryck had the opportunity to share her expertise with the MTL Business Education students. This collaboration fostered a culture of networking, creativity, and collaboration between the two universities.
