Sharing our Members' Research – The Online Research Symposium

Written by Emanuel Mizzi, Malta

Well done to Ms Lorna Ciantar and Mr Xiaobo Jiang for enthusiastically discussing their ongoing Master's research with the international business education community at an online symposium held on the 5 March 2024.

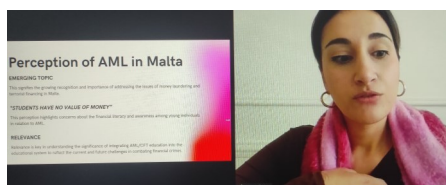

Emanuel Mizzi

Lorna's research related to 'Empowering Young People against Financial Crime', while Xiaobo shared his research about 'Enhancing Entrepreneurship Education in the Business Education Subjects at Secondary School Level'. The session was introduced by the General Secretary, Dr Tamra Connor, and moderated by the International President, Dr Emanuel Mizzi.

The members had the opportunity to reflect about these issues and participate in the discussion that ensued, providing valuable feedback to both presenters.

The recordings are available at <https://www.siec-isbe.org/global-exchange-recorded.html>

SIEC-ISBE Professional Development Session: Business Education in the age of generative AI

Written by Emanuel Mizzi, Malta

This workshop was led by Professor Leonard Busuttil, an experienced academic in technology education from the Faculty of Education at the University of Malta. He has recently collaborated with teachers and academics on seminars exploring the pedagogic applications of generative AI.

The session covered the history and advancements of AI, highlighting its pervasive presence in everyday life, the challenges, generative AI prompting (hands on activities), and the implications for teaching and assessment. The session was very interesting and interactive.

We thank Prof Busuttil for graciously sharing his expertise on this timely subject. The participants expressed their gratitude for this insightful session. May SIEC-ISBE continue providing such nourishing sessions that can be followed from the comfort of one's home or office.

The recording will be available at <https://www.siec-isbe.org/global-exchange.html> soon.
