# Pulling Strings

As I read these papers, I [find] myself being drawn away from the Canadian experience, which has severely limited our perspective as a people, and into a new perception of our uniqueness, and to a recognition of the potential that we have so improvidently constrained. —*John Eldon Green*

The focus on sub-national island jurisdictions allows us to re-imagine island communities and to re-invent spatial configurations by bringing these territories together in ways that compare and contrast the differences and similarities amongst them... with this repositioning of islands, their potential is amplified and their dependency displaced. —*Jean Mitchell*

In recognizing Prince Edward Island as a jurisdiction in this very active and strategic sense, the emphasis is not on being a *small* province, but on being a *Province*. —*Godfrey Baldacchino*

This book represents the most local output of a major research project developed at the University of Prince Edward Island, and supported by the Social Sciences and Humanities Research Council of Canada. Contributors were guided to look specifically at what lessons Prince Edward Island may care to scrutinize from a global review of over 100 islands that enjoy similar measures of policy autonomy: from Bermuda to Tasmania, from the Cook Islands to the Faroes. While respectful of diversity, this book collates policy papers that emerge as particularly salient in the development strategies of most sub-national (or non-sovereign) island jurisdictions today, and locates them within Prince Edward Island's own context. The outcome, we hope, is a handy manual for reflection for all those engaged in, and concerned with, governance on PEI.

ISBN 978-0-919013-54-4

9 780919 013544

Godfrey Baldacchino is Canada Research Chair (Island Studies), and Kathleen Stuart is a sessional professor of Island Studies, both at the University of Prince Edward Island, Canada.
