"Effective training and education, along with the right social and communicative skills and in the context of an effective legal code, are key requisites for a healthy industrial relations system. This book and its contents, as well as the research tradition that it embodies, will be able to support the development of expertise in this critical area, both among practitioners as well as among students. I am confident that Evolving Industrial Relations in Malta will complement the professional formation of managers, trade union leaders, policy makers, labour officers, mediators and others in the crucial task of working together."

Frank Pullicino
Director
Department of Employment & Industrial Relations
