TAQSIMA A

Aqra t-test u wieġeb il-mistoqsijiet KOLLHA.

L-effetti tal-użu tal-midja fuq is-**soċjalizzazzjoni** gew identifikati f'ħafna studji dwar il-vjolenza, il-problemi fin-nutriżzjoni, l-esperjenzi sesswali, il-perċezzjoni tal-ġeneru, l-attitudnijiet politici, u l-**isterjotipi** tal-**minoranzi** fost oħrajn. Studji bħal dawn minn dejjem iffokaw fuq **il-midja tal-massa** bħat-televixin, ir-radju, u l-midja stampata (kotba, gazzetti, u rivisti). Id-dħul ta' varjetà t'apparati fil-qasam digitali u l-abbundanza ta' kontenut tal-midja digitali ttransformaw ir-riċerka dwar l-identità b'mod korrispondenti.

Fl-era digitali, il-midja tinfluwenza l-oqsma kollha tal-ħajja f'etajiet differenti. Il-midja hija preżenti fil-kmamar tat-tfal, fl-iskejjel, fil-familji, u fid-djar tal-anzjani. It-tfal u ż-żgħażaq fuq normalment jitqiesu li huma aktar esposti għall-effetti tal-midja, ma jadattawx b'mod passiv għall-ambjent ta' madwarhom. Huma b'mod attiv joħolqu stampa ċara tad-dinja permezz ta' interazzjonijiet mal-ambjent soċjali u kulturali tagħhom. Jużaw il-midja biex iwettqu ġertu sfidi bħall-iżvilupp tal-identità, l-it-testjar tal-konfini, is-separazzjoni mill-ġenituri, jew l-ewwel relazzjonijiet intimi. Generalment, l-adulti jqattgħu ħafna aktar ħin jaraw it-televixin mit-tfal u ż-żgħażaq fuq. Anki jekk in-numru ta' utenti adulti tal-midja soċjali għadu qed jiżdied, il-perċentwal ta' utenti tal-midja soċjali fost iż-żgħażaq fuq.

TAQSIMA B

Aqra t-test u wiegeb il-mistoqsijiet KOLLHA.

Il-popolazzjonijiet umani kellhom it-tendenza li jiżdiedu maž-żmien. Hekk kif twieldu aktar persuni, gruppi żgħar sabu raġunijiet sabiex jingħaqdu flimkien u dan wassal għall-formazzjoni ta' komunitajiet akbar. Il-wasla tal-agrikoltura kellha rwol kruċjali f'dan il-process billi pprovdiet provvista tajba tal-ikel li ppermettiet lil dawn il-komunitajiet jibqgħu b'mod permanenti. F'medda ta' ffit sekli, id-dinja rat tkabbir sinifikanti tal-**popolazzjoni** flimkien mal-industrializzazzjoni tal-ekonomiji. Din it-trasformazzjoni wasslet għaż-żieda sostanzjali fl-urbanizzazzjoni, b'numru akbar ta' nies li mxew fl-iblet. Il-popolazzjoni dinjija kibret b'mod sinifikanti u l-ekonomiji tagħna saru aktar industriałizzati din l-aħħar mitt sena. B'rızultat ta' dan, ħafna aktar nies marru jgħixu fl-iblet. Anke wara li ġew stabiliti l-iblet, madanakollu, maġgoranza kbira tan-nies għexu u ħadmu f'żoni **rurali**. Kien biss waqt l-**industrializzazzjoni** fuq skala wiesgħa fis-seklu tmintax li l-iblet verament bdew jikbru sew. Illum kważi nofs il-popolazzjoni kollha tgħix f'żoni urbani. In-nies huma attirati minn impjieg fil-manifattura u l-professionijiet, kif ukoll minn opportunitajiet akbar għall-edukazzjoni u d-divertiment.

L-urbanizzazzjoni spiss tiġi diskussa b'referenza għal pajjiżi li bħalissa qeqħid fil-process ta' industriałizzazzjoni u urbanizzazzjoni. Iżda n-nazzjonijiet industriałizzati kollha esperenzaw urbanizzazzjoni f'xi ħin jew ieħor fl-istorja tagħhom. Barra minn hekk, l-urbanizzazzjoni qed tiżdied madwar id-dinja kollha. Wieħed mill-effetti ta' din iż-żieda enormi fin-nies li jgħixu f'żoni urbani huwa ż-żieda tal-megacity. Ngħidu aħna Tokyo, il-Ġappu, għandu kważi 40 miljun residenti. Effett ieħor tal-urbanizzazzjoni huwa t-**tixrid urban**. It-tixrid iżid ukoll il-ħtieġa għall-infrastruttura tal-ivvjaġġar, bħat-toroq, minħabba li d-djar tan-nies x'aktarx ikunu aktar 'il bogħod minn fejn jaħdnu u l-kumditajiet li jgawdu.

Answer **ALL** the questions from both sections.

SECTION A

Read the text and answer ALL the questions.

The effects of media use on **socialization** have been identified in numerous studies on violence, eating disorders, sexual experiences, perception of gender, political attitudes, and **stereotypes** of **minorities**; among others. Such studies have traditionally focused on **mass media** such as television, radio, and printed media (books, newspapers, and magazines). The advent of a variety of digital and mobile media devices and the abundance of digital media content have transformed research on identity correspondingly.

In the digital era, media influences all spheres of life at different ages: they are present in children's rooms, in schools, in families, and in senior citizens' homes. Children and youth, who are generally considered to be more exposed to the effects of media, do not adapt passively to their environment. They actively create an understanding of the world through interactions with their social and cultural environment. They use media to accomplish tasks such as **identity development**, testing boundaries, separation from the parents, or first intimate relationships. Generally, adults spend much more time watching television than children and youth. Even though the number of adult social media users is still on the rise, the percentage of social media users among the young remains significantly higher.

Human populations have tended to increase over time. As more individuals were born, small groups found reasons to unite, leading to the formation of larger communities. The advent of agriculture played a crucial role in this process, providing a stable food supply that allowed these communities to settle permanently. In the span of a few centuries, the world has witnessed significant **population** growth alongside the industrialisation of economies. This transformation has led to a substantial increase in urbanisation, with a growing number of people relocating to cities. The world population has grown significantly, and our economies have become more industrialized over the past few hundred years. As a result, many more people have moved into cities. Even after cities emerged, however, a large majority of people lived and worked in **rural** areas. It was not until large-scale **industrialization** began in the eighteenth century that cities really began to boom. Nearly half of all people now live in urban areas. They are attracted by jobs in manufacturing and the professions, as well as by increased opportunities for education and entertainment.

Urbanization is often discussed in reference to countries that are currently in the process of industrializing and urbanizing, but all industrialized nations have experienced urbanization at some point in their history. Moreover, urbanization is on the rise all over the globe. One effect of this huge increase in people living in urban areas is the rise of the megacity. Tokyo, Japan, for example, has nearly 40 million residents. Another effect of urbanization is **urban sprawl**. Sprawl also increases the need for travel infrastructure, such as roads, because people's homes are likely to be farther away from where they work and the amenities they enjoy.

 b) Name **TWO** migration support services found on the Maltese islands. (4)

8. a) Explain what is meant by return migration. (4)
 b) Explain how economic factors can influence population density. (6)

9. In 2020 the WHO established the Health and Migration Programme (PHM) to provide global leadership in health and migration issues in the context of WHO's own Global action plan: promoting the health of refugees and migrants 2019–23.
 - a) Explain the difficulties which international migrants may face when moving to, and settling in, another country. (4)
 - b) Mention **THREE** reasons how human population expansion may lead to the degradation of natural resources. (6)

10. In a paragraph of about 80 words discuss the advantages of urbanization. (10)
