Syllabus**

Part 1 – Theatre Events and Practitioners (2½ hours)

1.0 Introduction

The Intermediate Theatre and Performance Syllabus introduces candidates to theatre as a phenomenon which involves communities. As an area of study and research, theatre studies investigates the performative nature of these events, how communities express themselves through performance, the contexts and structures within which they operate, and the reasons and outcomes of this behaviour. The field of theatre studies investigates how people relate to their immediate social, political, and religious contexts, and how these in turn inform the performance of events. Theatre studies therefore bridges daily with extra-daily activity, in a process which deals with the aesthetics and ethics of performance.

- **content** – the material the candidates will be working with, which may include texts, music, lights, costumes and other props needed for the performance; and
- **working process** – the process of construction throughout the duration of the studies based on the structure and content.

Lights to be used in the performances should be kept at a basic level. One space, not exceeding 10m by 10m, will be used for all the performances.
