

Brandon Debrincat

Aircraft maintenance student
Institute of Mechanical Engineering
Malta College of the Arts, Sciences
and Technology (MCAST)

Personal Profile

Brandon is presently studying towards a diploma in Aircraft Maintenance. This will help him gain further training and hopefully later on a job in the world of aircraft maintenance and repair, which is becoming an increasing business in Malta.

Research Profile

Brandon studies how to repair the various moving parts on planes, including ailerons, cables, rivets and other machinery parts.

Here he is demonstrating a model showing the movement of the ailerons as controlled by cables mimicking the movement they would normally perform at the bequest of the pilot.
