

## Ray Ellul PhD

(and Martin Saliba)

Associate Professor and Student  
Department of Physics  
University of Malta  
Speciality : Atmospheric pollution.

### Personal Profile

Ray is an Associate Professor in the department of Physics at the University of Malta. Despite being originally Maltese, he emigrated and now lives across the channel in the quieter and cleaner sister island of Gozo.

Martin Saliba is Gozitan and has done a Masters in Atmospheric physics under Prof. Ray Ellul's supervision. He is now employed as a technical officer in the department.

The Hilly greenery of Gozo

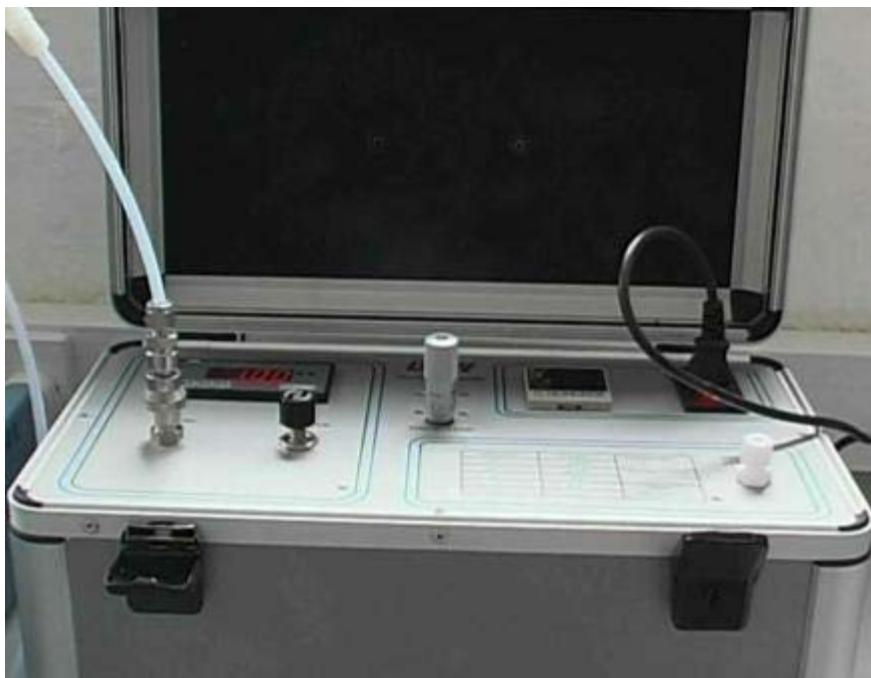

Both of them enjoy the peace and greenery of Gozo as well as its beautiful scenery.

### Research Profile

Using equipment positioned at the Ta' Gordan lighthouse, which is elevated and towards the coast, Ray and Martin can measure the air content of several pollutant gases. The site is very important since it must be a clean place where no adjacent source of pollution is found. This allows them to measure general pollutant levels for the Maltese islands.
